

**COUNCIL UPDATE
OCTOBER 19, 2006**

Traffic Signal Adjustments -Due to multiple construction projects occurring in the area, the signal timings at the intersection of Ballentine Boulevard & Princess Anne Road were adjusted by the Division of Transportation. This action was taken in response to concerns by local citizens impacted by the repaving of Vincent Avenue and the concurrent road work by Dominion Natural Gas. Construction work on Vincent Avenue is scheduled through the end of December. Broad Creek construction is also affecting the traffic flow in the area.

The Transportation Division will continue to monitor this intersection and make timing adjustments as necessary.
