

What's New in Norfolk AIR 2.0?

The Interface – the interface has been completely redesigned to make it easier to use and allow more data to be displayed. This includes the ability to:

- Jump directly to the map and skip typing in an address or account number (click the GO button)
- Search for properties without an addresses (using account number or by manually zooming into the map)
- Display now has full screen mapping with information sliding in and out from left side
- Display zoning and flood zones maps over the parcel map
- Select 4 different years of aerial photography for the same location and compare years from 1999 to 2012
- Send a link of property to another users
- Transition from parcel map to aerial photography using a slider tool

The Information Tab – the new sliding “INFO” tab located on the left side of the screen contains lots of new data. Below are general descriptions of what has been added for each section.

Real Estate

- Building Description screen is now customized for residential, commercial, vacant land, apartments, and cell towers.
- Residential properties now have a new section called *Property Description* which includes information on pools, porches, shoreline structures, and other types of structures.
- Commercial properties with more than one building now will display multiple photographs and sketches if available. Data displayed is synced with each different photo/sketch.

Municipal Services

- Recycling dates can be printed, and contact information now included.

Planning

- Zoning information consolidated into a single window that can be printed, and also includes contact information.
- Neighborhood Service Areas added.
- GEM property identification and strategy added.

Public Safety

- Flood Zone window has been updated with links to zone definitions, and now includes contact information.
- Hurricane Storm Surge Zones added and link to definition included.

Civic

- Link to local, state, and federal representative websites added.

Schools

- Link to school websites added.

Code Enforcement

- Both active and historical cases now include origination date, inspector name, actions sorted in chronological order. The ability to print the information has been added.

Building Permits

- This section is entirely new and includes both active and historical building permits.
