Executive Summary

ES-05 Executive Summary - 24 CFR 91.200(c), 91.220(b)

1. Introduction

The U.S. Department of Housing and Urban Development (HUD), requires the City of Norfolk as a recipient of federal grant funds to develop a Consolidated Plan (ConPlan) every five years that describes the city’s community development priorities and multi-year goals, based on an assessment of housing and community development needs and an analysis of housing and economic market conditions and available resources.

The Consolidated Plan is a collaborative process whereby the City of Norfolk establishes a unified vision for community development actions. It is the city’s opportunity to shape the various housing, community and economic development programs into effective, coordinated neighborhood and community development strategies. It also creates the opportunity for strategic planning and citizen participation to take place in a comprehensive context, and to reduce duplication of effort at the local level.

In May 2012, HUD introduced an Econ-Planning Suite, an electronic template for producing ConPlan, Action Plan and other required reports, directly within the Department of Housing and Urban Development’s (HUDs) Integrated Disbursement and Information System (IDIS). As mandated by HUD, the city has developed the Five-year (FY 2017-FY 2021) Consolidated Plan and FY 2017 Annual Action Plan using HUD’s template.

The entitlement grant programs governed by these regulations are the: Community Development Block Grant (CDBG), the HOME Investment Partnership (HOME) Program, and the Emergency Solutions Grant (ESG) Program. These programs will address affordable housing, homeless, and community and economic development issues over the next five year period.

Community Development Block Grant (CDBG) Program

CDBG funds are used to develop viable urban communities by providing decent to moderate-income persons.

HOME Investment Partnership (HOME) Program

HOME funds are used for a wide range of activities including acquiring, developing, and/or rehabilitating affordable housing for rent or homeownership or providing direct rental assistance to low-income persons. The main goal for this program is designed exclusively to create affordable housing for low-income households.

Emergency Solutions Grant (ESG) Program
ESG funds engage homeless individuals and families living on the street; improve the number and quality of emergency shelters for homeless individuals and families; help operate shelters; provide essential services to shelter residents; rapidly re-house homeless individuals and families; and prevent individuals and families from being homeless.

To receive these federal funds, the city must assess local housing and community development needs and resources, and socioeconomic impediments toward building viable neighborhoods. The City of Norfolk’s Consolidated Plan will be developed according to this process.

The city was awarded the following entitlement funding allocations for Year One (FY 2017/ PY 2016) of the FY 2017 – FY 2021 ConPlan. At a minimum, the city anticipates funding throughout the implementation period of this ConPlan. The total anticipated over the next five years is $25,669,500. The breakdown is provided in Ad-25 under Attachments - The City of Norfolk Appendices.

2. Summary of the objectives and outcomes identified in the Plan Needs Assessment Overview

The City of Norfolk is required to use HUD’s Performance Outcome Measurement System (POMS). The POMS was developed to enable HUD to collect and aggregate standardized performance data on entitlement-funded activities annually from all entitlement communities nation-wide for use in reporting to Congress on the effectiveness of formula entitlement programs in meeting HUD’s strategic objectives. The city is required by federal law that housing and community development grant funds benefit primarily low- and moderate-income persons in accordance with the following HUD objectives: Provide decent housing; establish and maintain a suitable living environment; and provide expanded economic opportunities.

These objectives are combined with three performance outcomes categories: Accessibility; affordability, and sustainability. The performance outcomes measurement statements are: Accessibility, affordability and sustainability for providing decent housing; accessibility, affordability, and sustainability for the purpose of providing suitable living environment; and accessibility affordability and sustainability of creating economic opportunities. The FY 2017 through FY 2021 ConPlan outlines the various activities the city proposes to carry out to achieve the objectives and associated outcomes required by HUD. The city will undertake activities within these categories: housing rehabilitation and construction; public services and community development; business/economic development; and homeless prevention activities.

3. Evaluation of past performance

Much has occurred in Norfolk since FY 2009, when the city produced both its Three-Year and Five-Year Consolidated Plan through FY 2016. The largest impact on our city came from the ‘Recession’ that began in late 2008, triggered by the financial meltdown of Wall Street investments, and its ripple effects throughout the country. The economy of Norfolk began to take a hard hit, its longstanding economic reliance on a healthy real estate market and construction activity contributed greatly to unemployment rates that continue to be higher than the national average.
The city’s evaluation of past performance comes from several different sources. First, the city’s Consolidated Plan itself creates the opportunity for strategic planning and citizen participation to take place in a comprehensive context, and to reduce duplication of effort at the local level, and serves as a management tool that helps the city and citizens assess performance and track results.

The economic crisis affected the city’s implementation of a Three- to Five-Year Consolidated Plans for FY 2009-FY 2011 and FY 2012-FY 2016. In part, the city benefitted from a number of HUD programs, starting in 2012, designated to address the national financial crisis, including a series of Neighborhood Stabilization Program (NSP) grants. The enactment of the American Recovery and Reinvestment Act of 2009 (AARA) provided a variety of new program funds for Norfolk and other jurisdictions hit hard by the recession. Many of these grant programs gave Norfolk the opportunity to create new program ‘infrastructure’, and to build new and enhance existing partnerships among city departments, private sector partners and stakeholders, local philanthropies, community development financial institutions, and advocates for housing, public transit, environmental sustainability, public services and many other local constituencies. The city’s housing, homeless and development agencies participated in these efforts.

The city’s Annual Action Plans and CAPERs (Consolidated Annual Performance and Evaluation Report) have for the past eight years provided many details about these innovations and special funds, in addition to other efforts started prior to the recession. All of these initiatives have contributed to the ideas in this plan, including the trail blazing innovative proposal to leverage Consolidated Plan resources with funds from public transit investments.

In the past eight years, the following initiatives involving the Consolidated Plan and other resources all of which were the result of governmental and non-governmental partnerships, were established or substantially enhanced:

**Continued Past Performance**

In the past eight years, the following initiatives involving the Consolidated Plan and other resources all of which were the result of governmental and non-governmental partnerships, were established or substantially enhanced such as:

- Permanent Supportive Housing Program
- Neighborhood Stabilization Program (NSP 1, 2 & 3)
- Homeless Prevention and Rapid Re-Housing Program (HPRP)
- CDBG-Recovery Program (ARRA)
- Community Services Block Grant (ARRA)
- Lead hazard remediation and healthy homes production programs
- Federal Emergency Management Agency (FEMA)
- Low Income Tax Credits
- Single Room Occupancy Facilities (South Bay Apartments, Heron’s Landing, Crescent Square)

Going forward, the city recognizes that evaluation of past performance is critical to ensuring that the city and its contractors are implementing activities effectively and that they align with the city’s overall
strategies and goals. In addition, to meet HUD reporting requirements, such as the CAPER, the city’s ConPlan administering agency, the Department of Neighborhood Development, has its own methods of program evaluation and outcome reporting. Projects are largely defined from the community needs assessment, housing market analysis and input from service providers and the general public. However, a review of past performances allows the city to determine progress towards achieving goals, what is left to be done and what adjustments are needed.

The city’s Department of Neighborhood Development reviewed goals and actual outcomes for the past eight years. As a result of the evaluation of several programs, it was determined that some are no longer top priorities. In addition, the amount of funding for programs has changed. An internal evaluation was combined with feedback gained from the affordable housing policy process, affordable housing survey and public forums to give this department a clear picture of goals to be accomplished in the next five years.

4. Summary of citizen participation process and consultation process

The citizen participation and stakeholder consultation process are key components of the development of the ConPlan as set forth in Subpart B of 24 CFR Part 91. The City of Norfolk strives to ensure that the ConPlan planning process includes opportunities for public participation, such as public hearings and public comment periods; involvement of concerned citizens; transparency and freedom of access to the proposed ConPlan and Action Plan; and consultation with public and private agencies that provide assisted housing, health services, and fair housing initiatives, including public hearings, on-line surveys and community meetings.

The city has adopted a Citizen Participation and Consultation Plan for the Consolidated Plan. All meetings are held in fully accessible facilities. Meeting announcements are sent to media outlets via press releases through newspapers, civic leagues, public libraries and through the city’s communications department.

The planning process was kicked off in the City of Norfolk with a Community Needs Assessment followed with a community meeting to discuss needs. Through the process, a variety of methods was used to ensure citizen participation: a resident and agency survey was publicized and the city received responses; and participation in multiple citizen advisory commission meetings, including focus groups representing a wide variety of populations and interests.

A summary of the activities for the development of the city’s Consolidated Plan follows:

- **Informal Meetings** were held during the months of December 2015, January 2016, and February 2016 to discuss the annual updates on the categories of Homelessness, Housing and Non-Housing Community Development. Notifications were posted on the agency’s website, and the meeting information was placed in the Virginian Pilot newspaper inviting all interested individuals to participate.

- **A Public Input Session** was held February 1, 2016 where all components were discussed. Notifications were posted on the city’s website, and the meeting information was placed in the Virginian Pilot newspaper inviting all interested individuals to participate.
• **A Public Hearing was held in February 2016.** As with the Public Input Session, the hearing was publicized through the resources mentioned above. As per HUD Citizen Participation requirements, the city accepted comments up to 30 days after the date of the formal Public Hearing.

• **2nd Public Hearing will be held in April 2016.** The hearing was publicized through the resources mentioned above. The city will accept comments up to 30-days through May 19, 2016.

Department staff participates in taskforces, committees, and councils. City departments are in constant dialogue with their non-profit services to ensure that programs respond to community needs and follow best practices. City departments engaged various advisory groups in the development of the ConPlan and the FY 2017 Annual Plan priorities through these discussions.

5. **Summary of public comments**

A summary of the public comments received will be included in the Appendix Section of the ConPlan. It will incorporate the comments received from the two public hearings and written comments. Furthermore, the city included comments received during the 30-day comment period that will conclude through May 19, 2016.

6. **Summary of comments or views not accepted and the reasons for not accepting them**

All comments have been accepted and considered in the development of the ConPlan which are provided in the Appendices Section of the document.

7. **Summary**

The City of Norfolk’s proposed FY 2017 – FY 2021 ConPlan and FY 2017 Annual Action Plan identifies the housing and community development needs of predominantly low-income areas in Norfolk. The objective is to target available resources to meet the identified needs in order to revitalize neighborhoods and improve the quality of life of Norfolk residents.

The ConPlan provides a unified vision for community development and housing actions with the primary goals of providing affordable housing and public services, revitalizing neighborhoods, supporting homeless and special needs populations, eliminating slum and blight and expanding economic development opportunities.

The FY 2017 (PY 2016) Annual Action Plan begins July 1, 2016 and identifies funding for projects that address Norfolk’s critical needs.

Listed below is the funding the city anticipates receiving from HUD for each of the entitlement programs in fiscal years FY 2017 – FY 2021.
The Process

PR-05 Lead & Responsible Agencies 24 CFR 91.200(b)

1. Describe agency/entity responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source

The following are the agencies/entities responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source.

Table 1 – Responsible Agencies

Narrative

The Department of Neighborhood Development (DND) serves as the lead department responsible for the CDBG, HOME and ESG Programs as well as the reuse of the funds allocated from the previous unspent funds. The DND is in charge of the administration of these programs as well as code enforcement activities.

Consolidated Plan Public Contact Information

Mr. James Rogers is the Director for the Department of Neighborhood Development at 401 Monticello Avenue, 1st Floor, Norfolk, Virginia 23510. The Consolidated Plan information point of contact is Leila LaRock, Program Administrator, at 757-664-4779 or email at leila.larock@norfolk.gov.
PR-10 Consultation - 91.100, 91.200(b), 91.215(l)

1. Introduction

The City of Norfolk’s consultation was achieved through a variety of methods that included a public input forum, a resident and public agency survey, and public hearings to obtain views and comments for stakeholders and citizens alike. Surveys were distributed to public agencies and residents to obtain more detailed information on community needs.

Provide a concise summary of the jurisdiction’s activities to enhance coordination between public and assisted housing providers and private and governmental health, mental health and service agencies (91.215(l)).

The City of Norfolk’s Department of Neighborhood Development (DND) coordinates the development of the Plan. The Plan is reviewed by the City Manager and input is sought from the general public and a variety of non-profit, business, governmental, professional and citizen organizations. The City of Norfolk enhances the coordination between public and private housing, health and social service agencies by maintaining involvement in the activities of local non-profit service providers, local advisory boards and commissions, other government agencies and professional associations especially through planning forums and community events.

The Strategic Plan builds on previous and ongoing community development efforts by the city, local public agencies, non-profit organizations, community development organizations, neighborhoods, and the private sector that includes three innovative elements: 1) Coordination of public and private sector investments; 2) The annual identification of areas that focuses the resources of multiple departments, agencies, and stakeholders in targeted areas to stimulate comprehensive community development; and 3) Implementation proposals, reporting, and evaluation rely on indicators and measurable outcomes derived from citywide real estate market value analysis.

Describe coordination with the Continuum of Care and efforts to address the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans, and unaccompanied youth) and persons at risk of homelessness

Annually, during the beginning of the fiscal year, one of the first questions city representatives are asked to consider is, “What would our community be like if we were to succeed in accomplishing our community development goals?” The response was to create and sustain a connected community comprising of:

- Sustainable neighborhoods that are safe, walkable, mixed-use, diverse, compact, green and well designed;

The response was to create and sustain a connected community comprising of:

- Sustainable neighborhoods that are safe, walkable, mixed-use, diverse, compact, green and well designed;

The response was to create and sustain a connected community comprising of:

- Sustainable neighborhoods that are safe, walkable, mixed-use, diverse, compact, green and well designed;
• An ample supply and diverse range of affordable, quality and green housing that is well-integrated into mixed neighborhoods;
• Physical infrastructure that supports community development;
• Economic opportunity accessible to residents in the form of jobs and workforce education resulting in living wages and increasing per capital income;
• Equitable services; and
• A clean and healthy environment with safe places and ready access to a wide range of case management and supportive service opportunities including medical, mental health, and additional services.

Describe consultation with the Continuum(s) of Care that serves the jurisdiction's area in determining how to allocate ESG funds, develop performance standards and evaluate outcomes, and develop funding, policies and procedures for the administration of HMIS

2. Describe Agencies, groups, organizations and others who participated in the process and describe the jurisdictions consultations with housing, social service agencies and other entities

Table 3 – Other local / regional / federal planning efforts

Describe cooperation and coordination with other public entities, including the State and any adjacent units of general local government, in the implementation of the Consolidated Plan (91.215(l))

In addition to the various strategic plans referenced in the above section, the city considered other local, regional, state, federal planning efforts and will continue its efforts to coordinate further with local, regional, state, and federal partners to create opportunities for a comprehensive strategic planning and to reduce duplication of efforts at the local level

Narrative (optional):
PR-15 Citizen Participation

1. Summary of citizen participation process/Efforts made to broaden citizen participation

Summarize citizen participation process and how it impacted goal-setting

HUD requires entitlement jurisdictions to provide citizen participation in developing the ConPlan. The City of Norfolk has encouraged citizens and non-profits to provide input throughout the process. A copy of the city’s revised Citizen Participation Plan is included as Appendix C. All meetings to include informal program specific input sessions, formal Public Input Session, and formal Public Hearing are held in handicapped accessible facilities. Meeting announcements were made via the Virginian Pilot newspaper and the city’s website.

A summary of the activities for the development of the city’s Consolidated Plan include:

- **Informal Meetings** were held during the months of December 2015, January 2016, and February 2016 to discuss the annual updates on the categories of Homeless, Housing, and Non-Housing Community Development. Notifications were posted on the agency’s website, and the meeting information was placed in the Virginian Pilot newspaper inviting all interested individuals to participate.

- **Public Needs Survey for Both Residents and Public Agencies** were available online at www.norfolk.gov beginning October 13, 2015 through November 30, 2015.

- **A Public Input Session** was held on February 1, 2016 where all components were discussed. Notifications were posted on the city’s website, and the meeting information was placed in the Virginian Pilot newspaper inviting all interested individuals to participate. Additionally, the session was listed on the HUD Entitlement webpage calendar.

- **A Public Hearing** will be held in May 2016. As with the Public Input Session, the hearing was publicized through the resources mentioned above. As per HUD Citizen Participation requirements, the city accepted comments up to 30 days after the date of the formal Public Hearing.

Drafts of the Consolidated Plan and Annual Plan were posted on the City’s website for its 30-day comment period and hard copies provided to all Norfolk public libraries. A 30-day comment period ran through May 19, 2016. Citizens, public agencies, or other interested parties wishing to comment on the plans could do so online, by email, or by mail and/or call the Department of Neighborhood Development.

Input from the community, including comments received from individual citizens as well as agencies, contributed to the establishment of housing and community development goals. This is particularly true regarding input received from city departments. Verbal and written
comments are extremely valuable. The city also relies on the input of community-based organizations to help identify housing and community development needs within neighborhoods.

Needs Assessment

NA-05 Overview

Needs Assessment Overview

The data provided in this section is from the 2000 and 2010 Census, and the 2007-2011 CHAS provided by HUD. Overall needs created a framework to base decisions in selecting projects to fund. Priority needs formed the basis for choosing specific projects for FY 2017 (PY 2016) in the Annual Action Plan, and for further Annual Action Plans.

Housing: The most common housing problem in the City of Norfolk is cost burden. Cost burden is the fraction of a household’s total gross income spent on housing costs. This was a problem for households across most income groups but significant for low-income renter households. Renter households comprised 93 percent of total households within the lowest income group that paid 50 percent or more of their income on housing. Owner households within this income group comprised 67 percent of total households.

The second most common housing problem was overcrowding, defined by HUD as more than one person per room, not including bathrooms, porches, foyers, halls or half room. Over 13,060 renter households and 5,150 owner households were overcrowded across all income groups, 15 percent of which were renter households. Of these, 1,095 were low- to moderate-income households earning between 0-50 percent AMI.

The City of Norfolk used the U.S. Census Bureau, The Bureau of Labor Statistics, Housing Agencies, the results of the City’s Consolidated Plan Community Needs Assessment Survey, and comments received during the public input session, as well as the consultation process to identify the affordable housing, economic development, community development and homeless needs for the next five years.

The city obtained additional input from citizens and representatives from local organizations, focus group, city staff, and comments from the public input session and online survey, as well as the consultation process to further refine these overall needs into priority needs acceptable to the City of Norfolk’s City Council. The following items represent the top recommended priorities from the online survey and the public input session.

According to the housing tables in this section, the primary factors contributing to significant challenges for low income individuals and families in finding affordable housing in Norfolk are a severe shortage of affordable rental units and limited housing opportunities for persons and families experiencing or at-risk of homelessness.
NA-10 Housing Needs Assessment - 24 CFR 91.205 (a,b,c)

Summary of Housing Needs

The population in the City of Norfolk is currently 245,428 according to the U.S. Census Bureau. However, according to Table 5 with 2011 being the most recent Housing Needs Assessment Demographics, Norfolk shows 241,943 total population from 234,403 in 2000. Norfolk has increased by three percent between 2000 and 2011; while household’s shows a decrease by one percent, from 2000 to 2011. Small family households comprise the greatest percentage and number of all households, followed by households with one or more children age 6 or younger.

Renters between 0-30 percent AMI make up the greatest percentage of households having at least one or more of the four housing problems: (lacks a kitchen, lacks complete plumbing, severe overcrowding and severe cost burden). On the other hand, owners between 50 – 80 percent AMI have the greatest percentage of having at least one of the four housing problems. The online survey and input session indicated a need for rehabilitation of both renter and owner-occupied housing units as well a need for rental assistance.

“Small Related” renter households, followed by “Other” renter households have a cost burden greater than 30 percent of their income. Within owner-occupied households, “Small Related” households, followed by “Elderly” households have a cost burden greater than 30 percent of their income. As residents age, there is a transitioning that occurs, directly impacting income and cost of living. Therefore, as Norfolk’s population continues to age, affordability for this group is expected to be a growing concern. To accommodate aging in place, elderly residents will increasingly require public assistance for home maintenance, accessibility and energy efficiency improvements to support independent lifestyles.

<tr>
<td>Single family households</td>
<td>280</td>
<td>495</td>
</tr>
<tr>
<td>Multiple, unrelated family households</td>
<td>60</td>
<td>70</td>
</tr>
</tbody>
</table>
Describe the number and type of single person households in need of housing assistance.

According to the 2010 – 2012 ACS, there were 50 non-family households, 280 single family households, and 130 unrelated family households below the poverty. While this statistic includes both single person households and persons living together who are unrelated, the city would estimate that perhaps these households would need assistance.

Estimate the number and type of families in need of housing assistance who are disabled or victims of domestic violence, dating violence, sexual assault and stalking.

The YWCA of South Hampton Roads’ Domestic Violence Hotline served more than 2,000 callers in 2015, and of those callers, 1,084 persons/ 620 households were seeking domestic violence shelter. Using data from the Help Line, the agency can document more than 4,596 victims with housing needs over the last five year Consolidated Plan (FY 2012-FY 2016).

YWCA of South Hampton Roads’ domestic violence services such as counseling, case management, legal advocacy and legal representation seek to keep domestic violence victims and children safely in their homes, instead of being forced to flee to shelters. For example, legal advocacy and legal representation can help a victim seek a remedy for exclusive possession of the home with an order of protection. That remedy would order the abuser to leave the home and allow the victim and children to remain safe in their own home. These additional supportive services are especially important due to the lack of shelter beds in the city for victims and their children. Domestic violence shelter clients often do not have the
resources to afford stable housing, including first month’s rent and a security deposit. This puts families at high-risk of becoming homeless.

In estimating the housing needs of the disabled, the reviews data collected by DHS through its Aging and Disability operated as of the City of Norfolk. The goal is to provide individuals with integrated access to public benefit programs, community-based services, long-term options and supports. Through DHS, the general public including persons with disabilities and older adults can receive information and services from a centralized source rather than contacting multiple organizations. In 2015, 183 elderly persons and 64 disabled persons called DHS requesting information about housing.

The needs of non-seniors who are disabled are typically more severe: these residents have a very high poverty rate and often have difficulty finding employment that meet their needs. Finding affordable housing with accessibility improvements and which is near transit is very difficult in the current rental market. According to the 2007-2011 CHAS Data an estimated 23,824 adults in Norfolk have disabilities and live below the poverty level and are likely to have critical housing needs.

**What are the most common housing problems?**

The most common housing problems are a housing cost burden greater than 50 percent of income for renter households and a housing cost burden greater than 30 percent of income for owner households. Renters with 0-30 percent AMI have the highest percentage of having one or more of the severe housing problems, while owners between 50-80 percent AMI have the highest percentage of having one or more of the severe housing problems.

Similar problems were seen within the 30-50 percent AMI group where 67 percent of renter households and 19 percent of owner households spent more than 50 percent or more of their income on housing. Overall, a total of 10,685 households earning between 0-50 percent AMI have a housing cost burden of 50 percent or over. Also significant is the number of households without income – 1,415 households had a zero income.

The second most common housing problem is overcrowding. Over 1,925 households were overcrowded across all income groups, 88 percent of which were renter households. Substandard housing was another problem facing a significant amount of Norfolk households. There were 18,210 households, including both renter and owner occupied housing with incomplete plumbing or kitchen facilities, of which 14,449 households earning within 0-50 percent of AMI. That is why the city has created programs to aid in the rehabilitation of households.

**Are any populations/household types more affected than others by these problems?**

The clear trend is that amongst those households who reside in housing, renters and extremely low-income households are much more likely to have housing problems than homeowners and higher income groups. According to the CHAS data for Renter households, “Small Related”, followed by
“Other”, have the greatest number of households with a cost burden of greater than 30 percent. Within Owner households, “Small Related”, followed by “Elderly”, have the greatest number of households with a cost burden of greater than 30 percent.

The CHAS data shows that renter households, and specifically, small related renter households and elderly renter households earning 0-30 percent AMI were affected more by cost burden than other household types. Approximately 2,800 and 1,005 of these households respectively were affected by cost burden. Cost burden also affected small related rental household types earning between 30-50 percent AMI at 14 percent of total renter household types. This highlights the need for an increase in the number of affordable housing units in Norfolk as the demand increases.

The City of Norfolk utilizes homeless prevention programs to serve individuals and families at risk of homelessness. These programs provide one time (in a 24 month period) assistance to households experiencing a temporary financial crisis and are at risk of homelessness as a result. The most common crises are loss of employment or decrease in work hours, a significant change in household composition, a medical emergency, a death in the family, homelessness, and the potential loss of subsidized housing. The most common characteristic of the households that received assistance their lack of savings to deal with a crisis.

In 2014 the city launched the Rapid Re-Housing (RRH) program under the Emergency Solutions Grant. Participating households ranged in size and the average monthly income was approximately $918. An estimated 92 percent of the households who exited from RRH to permanent housing situations, both individuals and families, graduated with a variety of stable housing barriers including rent burdens, low-wage jobs in fields with high turnover, low education levels, poor credit histories, mental health and substance abuse, and special needs. The most significant concern for households nearing the end of their RRH assistance is maintaining enough income to cover their housing expenses. Lower cost apartment units have drawbacks (example, older buildings with poor insulation can leave tenants with higher heating and cooling costs) but are chosen because they are affordable for the individual or family.

Describe the characteristics and needs of Low-income individuals and families with children (especially extremely low-income) who are currently housed but are at imminent risk of either residing in shelters or becoming unsheltered 91.205(c)/91.305(c)). Also discuss the needs of formerly homeless families and individuals who are receiving rapid re-housing assistance and are nearing the termination of that assistance

According to the Office to End Homelessness and the Continuum of Care data, individuals with an imminent risk of residing in shelters or becoming unsheltered typically have a combination of financial factors present in their lives: lack of living wage job, rent consuming more than 30 percent of their income, and high child care, medical, or transportation costs. In addition to these factors, individuals at risk of becoming homeless will often have additional issues present including family conflicts, domestic violence, doubling up with family members, recent crisis, housing with code or safety violations, family
members with disabilities, criminal histories, history of mental health or chemical dependency, difficulty navigating systems to access public benefits or community based services, and prior experience with homelessness.

While the city will continue its efforts to support the availability of rapid re-housing programs over the next five years, it recognizes that the loss of a job or underemployment will continue to be part of the haunting characteristics of participating households. As such, the city supports the expansion of programs targeting families and individuals who are nearing the end of rapid re-housing assistance and continue to need permanent full-time employment with a living wage, affordable housing, reliable transportation and follow-up services that are available when needed. Included amongst these services would be prevention assistance aimed at assisting households served through rapid housing programs in their efforts to maintain their housing if they should encounter temporary obstacles long after graduation.

If a jurisdiction provides estimates of the at-risk population(s), it should also include a description of the operational definition of the at-risk group and the methodology used to generate the estimates:

The city’s definition of the at-risk population was determined by federal and state guidance. The federal guidelines used are found in the Emergency Solutions Grant Rule and include the following at-risk characteristics:

An individual or family who:

(i) Has an annual income below 30 percent of median family income for the area’ and

(ii) Does not have sufficient resources or support networks immediately available to prevent them from moving to an emergency shelter or another place defined in Category 1 of the ‘homeless’ definition; and

(iii) Meets one of the following conditions:

1. Has moved because of economic reasons 2 or more times during the 60 days immediately preceding the application for assistance; or
2. Is living in the home of another because of economic hardship; or
3. Has been notified that their right to occupy their current housing or living situation will be terminated within 14 days after the date of application for assistance; or
4. Lives in a hotel or motel and the cost is not paid for by charitable organizations or by Federal, state or local government programs for low-income individuals; or
5. Lives in an SRO or efficiency apartment unit in which there resides more than 2 persons or lives in a larger housing unit in which there reside more than one and a half persons per room; or
6. Is exiting a publicly funded institution or system of care; or
7. Otherwise lives in housing that has characteristics associated with instability and an increased risk of homelessness, as identified in the approved Consolidated Plan.

The guidelines used for the Homeless Prevention Program considers households to be at-risk of homelessness and eligible for prevention assistance if they are facing a one-time crisis such as temporary loss of job, fire, illness, etc. that can be resolved with one-time financial assistance.

**Specify particular housing characteristics that have been linked with instability and an increased risk of homelessness**

The characteristic that has been linked clearly with instability and an increased risk of homelessness is a lack of affordable housing for lower-income households. The typical measure of housing affordability is whether tenants are paying more than 30 percent of their gross income on rent. According to the U.S. Census Bureau, just over half of all city renters paid more than 30 percent of their income on housing. The affordability issue is also illustrated by the fact city apartments rent for approximately $965 per month, yet extremely low-income individuals find this is a cost burden and cannot afford to pay rent costs.

Housing problems continue to impact a significant portion of the population in the city. Using the 2007-2011 CHAS data, the city identified that 18,245 households, approximately 60 percent with incomes 0-50 percent had cost burdens. A total of 3,635 small-family households comprised 31 percent of AMI living in the lowest income category at 30 percent AMI.

Another characteristic linked to instability and an increased risk of homelessness is the difficulty eligible individuals have in obtaining Permanent Supportive Housing. PSH is almost fully utilized, but a number of issues occur when eligible recipients are placed on a waiting list. They often remain homeless, move into rooming houses, or relapse into drugs or other harmful activities. Many eligible recipients even lost their eligibility for PSH during the waiting period.

Renter households were more likely to have one or more of the four housing problems defined by HUD. They comprised 72 percent of total households experiencing one or more of the four housing problems as compared to 28 percent of owner households. Approximately 20 percent of the renter households were living in the lowest income category. Households operating at a deficit see higher rates of homelessness, frequent changes in residence, and other issues. The dual effect of a low income and decreasing affordable housing stock has proven extremely problematic to the elderly and those with disabilities. The elderly and disabled are often impacted by fixed income, rising medical costs, and access to services.

The city seeks to address the housing problems residents experience by increasing the supply of affordable housing, reducing cost burden and reducing overcrowding, and facilitating investment to improve substandard housing in Norfolk neighborhoods, especially those with incomes below 30 percent AMI.
Discussion
NA-15 Disproportionately Greater Need: Housing Problems – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

HUD defines a disproportionately greater number of housing problems by a racial or ethnic group as when a group experiences housing problems at a rate greater than 10 percent of the income group as a whole. The data summarizes the percentage of each minority group experiencing any of four housing problems: cost burden (paying more than 30 percent of income for housing); overcrowding (more than one person per room); and lacking complete kitchen facilities or complete plumbing facilities (substandard housing).

Income classifications are defined as: extremely low-income (under 30 percent AMI); low-income (between 30 and 50 percent); moderate-income (between 50 and 80 percent); and middle-income (between 80 and 100 percent). Of the 10,240 households reported in the 2007-2011 CHAS, 3,585 were White, 5,700 were Black/African American, 220 were Asian, 80 were American Indian/Alaska Native, and 450 were Hispanic. The data shown in Table 13 notes that a disproportionate greater need exists as follows: Housing problems exist only for Black/African Americans, were 55.7 percent, compared to 17.3 percent for the jurisdiction as a whole, have one or more of the four housing problems. Considering the small number of one minority group, the age of the data, and the limited sample size, the results of this analysis should be used with caution.

According to regulations at 24 CFR 91.205(b)(2), 91.305(b)(2), and 91.405, jurisdictions must provide an assessment for each disproportionately greater need identified. Although the purpose of these tables is to analyze the relative level of need for each race and ethnic category, the data also provide information for the jurisdiction as a whole that can be useful in describing overall need.

*The four housing problems are:
1. Lacks complete kitchen facilities, 2. Lacks complete plumbing facilities, 3. More than one person per room, 4. Cost Burden greater than 30%

### Discussion

The 2007-2011 CHAS housing problems estimate for the City of Norfolk comprised of 32,830 households at incomes 0-100 percent that has one or more of four housing problems which lacks complete kitchen and plumbing facilities, more than one person per room, and cost burden paying greater than 30 percent of monthly income on housing costs for 31 percent of which are 10,240 households.

As incomes increase, the housing burden decreases. Therefore, moderate income households face a lower housing burden when compared to extremely low and low-income households. The largest percentage of housing problems in this group is faced by elderly Hispanic, owner households. In this group, 100 percent experience housing problems, which is disproportionately more than those in other ethnic groups. There is not much variance in the total percentage of housing problems within all ethnic groups.

More than 32,830 households comprised with the only race or ethnicity household type that had a disproportionate need in any of the income categories was the Black/African-American households. The disproportionate need in the extremely low income and low income categories of 48 percent.
households were effected. Although the housing burden is drastically reduced when looking at all income levels, it is still prevalent. Among all racial groups, renters and the elderly face the greatest cost burden.
NA-20 Disproportionately Greater Need: Severe Housing Problems – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

HUD defines a disproportionately greater number of severe housing problems is defined as when a member of a racial or ethnic group at an income level experiences housing problems at a rate greater than 10 percent of the income level as a whole. The City of Norfolk’s population is 246,139 with 105,347 (42.8 percent) Black/ African American, 121,346 (49.3 percent) being White, 10,830 (4.4 percent) as Asian American or Alaskan Native, 492 (0.2 percent) being Native Hawaiian and Other Pacific Islander and 8,368 (3.4 percent) as having two or more races.

Of the 52,780 households reported in the 2007-2011 CHAS, 21,150 (40 percent) were White, 26,145 (49.5 percent) were Black/ African American; 1,485 (2.8 percent) were Asian; 229 (0.4 percent) were American Indian/ Alaska Native; and 2,875 (5.4 percent) were Hispanic.

The data shown in the 0-30 percent AMI notes that a disproportionately greater need exists as follows: Housing problems exist for White were 36 percent, Black/African Americans, were 54 percent, compared to 8,840 households as a whole, have one or more of the four housing problems.

*The four severe housing problems are:
1. Lacks complete kitchen facilities, 2. Lacks complete plumbing facilities, 3. More than 1.5 persons per room, 4. Cost Burden over 50%

Discussion

The most disproportionate need is in households earning less than 30 percent AMI. The CHAS tables show that 64 percent of households at this earning level have severe housing problems. Also, the 2007-2011 CHAS housing problem estimate for the City of Norfolk had a total of 18,205 households in all income levels experienced at least one of the two severe housing problems, lacks complete kitchen facilities, lacks complete plumbing facilities, more than 1.5 persons per room, and cost burden paying greater than 50 percent of monthly income on housing costs. Both White and Black/ African American households had the majority of disproportionate need of the income categories. The disproportionate need was shown in the 0-80 percent income categories.
NA-25 Disproportionately Greater Need: Housing Cost Burdens – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction:

HUD defines a disproportionately greater number of severe housing problems is defined as when a member of a racial or ethnic group at an income level experiences housing problems at a rate greater than 10 percent of the income level as a whole. The City of Norfolk’s population is 246,139 with 105,347 (42.8 percent) African Americans, 121,346 (49.3 percent) being White, 10,830 (4.4 percent) as Asian American or Alaskan Native, 492 (0.2 percent) being Native Hawaiian and Other Pacific Islander and 8,368 (3.4 percent) as having two or more races.

Of the households reported in the 2007-2011 CHAS data in Table 21, 42,620 (51.0 percent) were White, 33,425 (40.0 percent) were Black/ African American, 2,519 (3.0 percent) were Asian, 329 (0.4 percent) were American Indian/ Alaskan Native, 95 (0.1 percent) were Pacific Islander, and 4,070 (5.0 percent) were Hispanic.

The data shown in the 30 percent to 50 percent AMI notes that a disproportionate greater need exists as follows: Housing cost-burdened households are the highest for Black/African Americans, where 56.2 percent, compared to 16.5 percent for the jurisdiction as a whole. There are housing cost burdens in the other income levels. Considering that housing cost burden was identified as a leading cause of homelessness, there is a need to provide housing assistance to cost burdened residents.

Table 21 – Greater Need: Housing Cost Burdens AMI

Discussion:

Consolidated Plan NORFOLK

OMB Control No: 2506-0117 (exp. 07/31/2015)
Over the next five year period, the City of Norfolk anticipates a mounting need for more housing programs to assist low- to moderate-income households with their housing costs. Maximizing opportunities to provide a variety of affordable housing choices to extremely low, low and moderate income households and those in categories with special needs, increasing access to homeownership, and assuring fair housing practices continue to be priority areas for the City of Norfolk. Like other localities in the region, this is an ongoing challenge, as a large percentage of households are facing housing cost burdens.
NA-30 Disproportionately Greater Need: Discussion – 91.205(b)(2)

Are there any Income categories in which a racial or ethnic group has disproportionately greater need than the needs of that income category as a whole?

Black/African American households with an income of less than (<) 30 percent AMI are indicated as having a disproportionately greater need than the needs of that income category as a whole for: having one more of four housing problems, and having one or more severe housing problems. Black/African American households also have a disproportionate greater need than the needs of the income category as a whole regarding housing cost burden of greater than 50 percent of their household income.

If they have needs not identified above, what are those needs?

The needs not identified above are improved incomes, housing rehabilitation assistance, homebuyer assistance, homebuyer education and counseling, demolition of deteriorated structures, affordable housing, code enforcement, additional Section 8 and Tenant-based rental assistance funding, public services identified in the public input session and online survey, and additional jobs and job skills.

Are any of those racial or ethnic groups located in specific areas or neighborhoods in your community?

To determine the location of minority groups with disproportionately greater needs, maps were created that match low- and moderate-income (LMI) areas with these populations. LMI areas are block groups where more than 51 percent of the households are low- and moderate-income. Areas of minority concentration are block groups where populations of racial or ethnic groups are at least 10 percent greater than for the city as a whole. LMI block groups with minority concentrations indicate where these disproportionately greater needs are located.

2000 Census data indicates that over half of Norfolk’s census tracts are low- to moderate-income (LMI). The data also indicates that 19.4 percent of Norfolk residents are categorized as LMI; for 2006 the percentage decreased to 16.9 percent (a 2.5 percent decrease). The number of census tracts with households with incomes less than 80 percent of AMI are scattered proportionately across the City of Norfolk. The table indicates the number of households and number of census tracts living below the poverty level.

Over the next five years, the city will continue to employ strategies and housing policies that will focus on the de-concentration of poverty. This will include increasing homeownership in low- and moderate-income neighborhoods, designing rehabilitation programs, providing opportunities and incentives that attract higher income demographics, including non-traditional households, creatively diverse housing options mixed income housing, townhouses, condos, etc. that appeal to a broad spectrum of the population (young professionals, retirees, etc.). Maps 1 and 2 located in the Appendix section depicts
concentration of low and very low owner-occupied housing units and low and very low household incomes.
NA-35 Public Housing – 91.205(b)

Introduction

The Norfolk Redevelopment and Housing Authority (NRHA) provides management and oversight of all public housing units. The City of Norfolk provides the oversight for the Tenant-based Rental Assistance (TBRA) programs. Data and information was provided by both NRHA and the City of Norfolk.

The NRHA provides Section 8 vouchers for Norfolk residents and TBRA vouchers are provided within the City of Norfolk. The TBRA voucher assists eligible families paying rent for apartments owned by private landlords. Participating families are responsible for finding their apartments and landlords that will accept the vouchers. Families must meet income guidelines to qualify for the Section 8 and TBRA programs. Both parties will enter into a lease agreement, with the tenant paying the security deposit in most cases. The TBRA program does allow payment of a security deposit in conjunction with TBRA. NRHA, and the city, inspect Section 8 or TBRA properties prior to move-in and on a yearly basis to ensure that apartments comply with HUD standards for safety, size and accessibility. The NRHA and the city also provide information on other affordable housing developments, some with units accessible for persons with disabilities.

**Table 25 – Ethnicity of Public Housing Residents by Program Type**

Data Source: PIC (PIH Information Center)
Section 504 Needs Assessment: Describe the needs of public housing tenants and applicants on the waiting list for accessible units:

The Housing Choice Vouchers waiting list has a significant portion of its families identified as female head of households. It is not known what percentage of these female head of households are victims of domestic violence. Domestic violence is a primary cause of homelessness among women.

Over the next five years, the City of Norfolk has identified the Public and Assisted Housing Needs that include:

- NRHA has a housing portfolio of 4,508 affordable rental housing units. Under NRHA management are 3,268 rental housing units of which 3,221 are public housing units and 47 are Project Based Voucher (PBV) units. Under private management are 1,240 rental housing units of which 81 are Project Based Vouchers (PBV) units and 1,159 are unassisted rental housing units.
- Restoration and revitalization need of public housing projects. NRHA plans to undertake three (3) projects during FY 2017.
- NRHA plans over the next five years to complete prior year site improvement projects, energy improvements, etc. in its inventory of public housing communities that have been prioritized by housing community.

Annually, NRHA properties are inspected by HUD to ensure the NRHA is compliant with Uniform Physical Conditioned Standards (UPCS) and to provide the agency with recommendations for improvement. NRHA uses the rating it receives from HUD to determine the priority level for completing activities in each community. Modernization has not been completed in all communities; however, routine maintenance is performed on a continuous basis. Age of property, safety concerns, energy efficiency, cost effectiveness and market attractiveness are the factors that determine the priority level (high, medium, low). The activities will be completed within a period of three to five years, depending on funding availability, with safety concerns being addressed first.

Most immediate needs of residents of Public Housing and Housing Choice voucher holders

- There are currently 1847 families on the Public Housing Waiting List consisting of the following types of families: 652 Disabled, 115 Elderly, 710 Families with Dependent Children and 370 Single Non-Elderly Individuals.
- There are currently 730 families on the Housing Choice Voucher Waiting List consisting of the following types of families: 173 Disabled, 18 Elderly, 350 Families with Dependent Children and 189 Single Non-Elderly Individuals. The Housing Choice Voucher Program Waiting List opens up for pre-applications on Saturday, June 4, 2016 from 9:00 a.m. to 3:00 p.m.; therefore, these statistics are projected to significantly change.
- The most immediate needs for public housing residents are additional parking and/or resident controlled parking; green space(s); many public housing units are in need of upgrades such as Central Air Conditioning; grocery stores, pharmacies and recreation for older youth in close proximity.
vicinity; affordable child care; infrastructure to resolve flooding issues; and more funding to address capital needs in each community.

- The most immediate needs for Housing Choice Voucher holders is reasonable accommodations for disabled families; an increased number of landlord participation in the program; increased number of housing meeting housing quality standards; and an increased number of housing units in the areas with low poverty rates.

**How do these needs compare to the housing needs of the population at large**

The needs identified for the Housing Choice Voucher holders reflect the needs of the population at large. Those needs consist of supportive services, transportation, job training and housing.

**Discussion**

The demand for public housing and vouchers in Norfolk continues to increase as does the number of low- and moderate-income residents. While NRHA distributes approximately 17K vouchers, families continue to apply to the Housing Choice Voucher waitlist. This shows a clear need in the community for additional ways to subsidize rents for low-income households.
NA-40 Homeless Needs Assessment – 91.205(c)

Introduction:

The City of Norfolk complies with all federally required data collection standards and commissions its own additional data gathering and research projects to better understand the needs of homeless individuals and families. The city and its partners use data gathered through the Point-In-Time (PIT) Count conducted annually in January and the Homeless Management Information System (HMIS) to inform the development of new programs, track the progress of existing programs and refine its overall response to homelessness.

The PIT Count offers information about individuals and families experiencing homelessness on a given night, while program level data collection reported through HMIS offers information about program utilization, an unduplicated count of individuals and families and veterans experiencing homelessness throughout the entire year. HMIS also offers system data when program level information is rolled up to the system level. While both sources of information play a role in the planning process, the data does have some limitations since the CoC data includes PIT information from the Union Mission (the city’s largest shelter provider), which, is a privately funded faith-based provider that currently does not participate in the SVHC’s HMIS system. Additionally, annual data may not be available for domestic violence and VASH programs. Therefore, estimates are based on the information provided by those who participate in HMIS.

The 2016 PIT Count was conducted on January 26, 2016, and revealed three major findings:1) A significant change in chronically homeless numbers over the past four years; 2) Continued downward decline in the number of chronically homeless individuals; and 3) Continued downward decline in the number of veterans experiencing homelessness.

Data Source Comments:

Indicate if the homeless population is:
Has No Rural Homeless

If data is not available for the categories "number of persons becoming and exiting homelessness each year," and "number of days that persons experience homelessness," describe these categories for each homeless population type (including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth):

The 2016 PIT Count showed the following statistics of homelessness and at-risk populations in the region and with the City of Norfolk. Emergency shelters operating within the City of Norfolk for people experiencing homelessness provided 50,825 nights of shelter in 2015. Of those 1,085 people were single persons and 369 were in families. In total, there were 1,221 adults and 232 children in the shelters. Those numbers may count the same person twice if they had more than one shelter stay. Point in Time data in January, 2016, found 519 persons in households sheltered, 106 of those were persons in households with children, and 457 were single households. There were 44 persons unsheltered; including one (1) household with two (2) children. The table below provides the 2016 PIT Count regionally by the Southeastern Virginia Homeless Coalition (SVHC) versus to the 2016 PIT count for the City of Norfolk.

Data Source

Comments:

Estimate the number and type of families in need of housing assistance for families with children and the families of veterans.

There are approximately 12 families that are families of veterans experiencing homelessness. The greatest need for housing assistance for families with children is threefold. The types of families are those affected by poverty with single parents in low-income jobs and often times with a mixture of substance abuse, domestic violence, mental health issues and child abuse in the family dynamic. They also have limited support systems. However, the January 26, 2016 PIT Count shows that there were no chronically homeless families.

Black/African American households and individuals are over represented in the population experiencing homelessness in Norfolk and people of Hispanic origin are underrepresented. According to the Hampton Roads HMIS shelter statistics for 2015, 78 percent were Black/African American, 17 percent were White, 2.91 were Hispanic origin, and 2.34 were other multi-racial. This is in a city where population is 44 per cent White, 45 percent Black/African American, 3 percent Asian, 0.2 percent Pacific Islander and 7 percent of Hispanic origin.

Describe the Nature and Extent of Unsheltered and Sheltered Homelessness.

It is always important to remember that the City of Norfolk is the central city of the Hampton Roads area surrounded by Virginia Beach, Chesapeake, Hampton, Portsmouth, Newport News and Suffolk. Also, it is noteworthy that the Union Mission, the largest regional shelter serving the single adult male population, is located within the city limits. What this means is that often people experiencing homelessness in
Norfolk may have also lived in other communities in the Hampton Roads area, while others may be lifelong Norfolk residents.

Beyond people living in the shelters there were over 487 children in Norfolk schools who were identified as homeless in 2015. Almost all of these are in families where they are doubled up and living with friends and relatives. Much of the homelessness in Norfolk is due simply to poverty. In any given year between the HUD definition of literal Homelessness and the more liberal definition offered by the McKinney-Vento Act for school aged children, 1,000 to 2,000 people are experiencing homelessness in Norfolk. People who are unsheltered are a smaller group. According to the 2016 annual PIT count, these persons tend to be nearly exclusively single member adult households, lacking community support or connections and who often times are facing issues of substance abuse, mental health and physical debilitation. On average, over the period from 2013-2016 approximately 253 adult households were counted as unsheltered in the January 26, 2016 PIT count versus less than one household with children.

People who are unsheltered are a smaller group. According to the 2016 annual PIT count, these persons tend to be nearly exclusively single member adult households, lacking community support or connections and who often times are facing issues of substance abuse, mental health and physical debilitation. On average, over the period from 2013-2016 approximately 253 adult households were counted as unsheltered in the January 26, 2016 PIT count versus less than one household with children.

Discussion:
NA-45 Non-Homeless Special Needs Assessment - 91.205 (b,d)

Introduction:
There are consistent patterns between the special needs population and the increased risk for homelessness because of lack of adequate housing facilities. There is no permanent housing available in Norfolk though there is a well-integrated service delivery system. The Norfolk Department of Human Services and the agencies that provide services for these populations work closely and cooperatively. The access to mainstream resources for these populations has a well-defined intake system. The main issue is one of capacity and adequate funding. There is a small number of services for people with addictions.

In addition to the homeless population, many non-homeless persons have special needs and may be at risk of becoming homeless. Based on information received via Consolidated Plan Community Needs Survey, the following populations were identified for housing and supportive services:

- Vulnerable Adults (elderly/ frail elderly)
- Persons with disabilities (mental, physical and developmental)
- Persons identified with HIV/AIDS
- Alcohol and Drug Abuse
- Victims of domestic violence

In addition, persons with special needs are those that are physically, emotionally or mentally impaired or suffer from mental illness, developmentally disabled, youth aging out of foster care, persons with addictions, HIV/AIDS and their families and victims of domestic violence.

Describe the characteristics of special needs populations in your community:

Non-homeless persons with special needs include the elderly; frail elderly; persons with mental, physical and/or developmental disabilities; persons with drug and alcohol addictions; persons with HIV/AIDS and their families; and victims of domestic violence, dating violence, sexual assault, and stalking. Members of these special needs populations often have very low incomes. Data on special needs populations is limited, but generally speaking, there is a significant need for housing and/or supportive services for all special needs subpopulations and meeting these needs is a high priority for the city.

Unfortunately, funding to address the needs of these special needs populations is very limited and cannot address even most of the needs cited. However, the city will continue to provide funding for agencies and organizations that serve special needs populations and will encourage these groups to share information on services, resources, and best practices in an attempt to maximize the impact of the city’s funding.

What are the housing and supportive service needs of these populations and how are these needs determined?
The city of Norfolk does not receive HOPWA funding and therefore this is not applicable.

However, according to the Greater Hampton Roads HIV/AIDS Health Services through the Planning Council, there are approximately 7,000 persons living in the Hampton Roads areas. The agency provides testing as well as brings awareness to the public. Ongoing developments with HIV/AIDS will be maintained through collaboration with case managers and agencies to ensure services meet the needs for people living with HIV/AIDS (PLWHA). Since the last Consolidated Plan period, information from providers indicates housing stability continues to be a major barrier to maintain adequate care of people affected with HIV/AIDS. In addition to housing, services such as medical care, mental health care, financial assistance and transportation continue to be critical for this population. The combination of stable housing and consistent medical attention improves both the longevity and quality of life for PLWHA.

**Discuss the size and characteristics of the population with HIV/AIDS and their families within the Eligible Metropolitan Statistical Area:**

The city of Norfolk does not receive HOPWA funding and therefore this is not applicable.

However, according to the Greater Hampton Roads HIV/AIDS Health Services through the Planning Council, there are approximately 7,000 persons living in the Hampton Roads areas. The agency provides testing as well as brings awareness to the public. Ongoing developments with HIV/AIDS will be maintained through collaboration with case managers and agencies to ensure services meet the needs for people living with HIV/AIDS (PLWHA). Since the last Consolidated Plan period, information from providers indicates housing stability continues to be a major barrier to maintain adequate care of people affected with HIV/AIDS. In addition to housing, services such as medical care, mental health care, financial assistance and transportation continue to be critical for this population. The combination of stable housing and consistent medical attention improves both the longevity and quality of life for PLWHA.

There are many organizations that work together to increase housing and other services for the special needs community. Team work between organizations plays an important role in the success of establishing and running effective programs. Over the past ten years, Norfolk has greatly expanded its community mental health system. The community has a very active National Alliance on Mental Illness that has been instrumental in supporting a Crisis Mental Health Program for law enforcement personnel and also supporting the Norfolk Community Services Board that works closely with the Development of the Healing Place, a peer run drop in center for persons experiencing severe and persistent mental illness. The City of Norfolk and its not-for-profit providers have provided aftercare for youth aging out of care since 1985 and has two transitional housing programs that target unaccompanied youth (ages 18 to-24) who are experiencing homelessness.

**Discussion:**

Consolidated Plan NORFOLK 48

OMB Control No: 2506-0117 (exp. 07/31/2015)
NA-50 Non-Housing Community Development Needs – 91.215 (f)

Describe the jurisdiction’s need for Public Facilities:

Public facilities in the City of Norfolk include improvements to buildings, parks and recreational facilities, senior centers, handicapped centers, homeless facilities, youth centers, childcare centers, neighborhood facilities, fire stations and equipment, health facilities and facilities for special needs populations. CDBG funds may be used for such facilities when they are used for eligible populations or neighborhoods.

How were these needs determined?

Public facility needs were determined through the online ConPlan survey, agency and stakeholder consultation, and staff consultation. The online survey ranked public facility needs as “High”, “Medium”, “Low”, or “No Need”. Results of the survey indicated a strong “High” or “Medium” priority for all public facility questions.

Describe the jurisdiction’s need for Public Improvements:

The City of Norfolk public improvement needs include street improvements including sidewalks, curb, gutter, sewer, signage, trees, lighting, and landscaping.

How were these needs determined?

Public improvement needs were determined through a ConPlan online survey, Capital Improvement Plan (CIP), the City of Norfolk’s Comprehensive Plan, public street assessment through the Department of Public Works, and staff coordination.

Describe the jurisdiction’s need for Public Services:

Public Services needs in the City of Norfolk include senior services, youth services, transportation services, services for battered and abused spouses, health services, services for neglected and abused children, substance abuse services, employment training, crime awareness, fair housing counseling, child care, legal services, and mental health services.

How were these needs determined?

Public Services needs were determined through the ConPlan online survey, agency and stakeholder consultation, the public input session, and staff consultation. The ConPlan online survey ranked public service needs as “High”, “Medium”, “Low”, or “No Need”. Results of the survey indicated a strong “High” or “Medium” priority for all public service needs questions. Participants in the public input session also ranks the public services identified at that meeting.
Housing Market Analysis

MA-05 Overview

Housing Market Analysis Overview:

This section provides information on the affordability and condition of the housing market in the City of Norfolk. Many of the data tables were populated by HUD and use the American Community Survey (ACS) and the Comprehensive Housing Affordability Strategy (CHAS) five year (2007-2011) data set. ACS data shows that the city has 95,001 housing units with a homeownership rate of 64.4 percent which has increased since 2000. In 2000, Norfolk’s homeownership rate was 45.5 percent, in 2009, Norfolk’s homeownership rate was 46.7 percent. According to Norfolk’s Real Estate Market Overview the market trends in Norfolk shows a 14 percent drop in median sales price and a 2 percent rise in median rent per month.

The American Housing Survey data provided in AD-25 Attachments and Appendices shows that the majority of the city’s housing stock was built between 1950 and 1979; 46,422 housing units at 48 percent. The second largest category of housing units were built before 1950; 27,355 housing units at 28 percent. Units built after 2000 total 7,473 units at 8 percent. With the majority of the housing units being constructed prior to 1980, 73,777 units, at 77 percent of total number of homes, there is a greater risk for lead-based paint issues.

Norfolk is an older urban city with an aging housing stock. Over 63 percent of the city’s housing stock is 40 years or older and 28.4 percent of the houses were built prior to 1950. The city is landlocked with new development occurring only as a result of the demolition of existing structures to create opportunities for new development. Currently, developers are responding to a market which has less demand for home purchases, with new multi-family rental units. Therefore, to be competitive in the region, Norfolk’s housing must be rejuvenated and adapted to meet market expectations.

Substandard housing suitable for rehabilitation are units where the cost for improvements for completing all items to bring the property in standard condition when added to the debt on the property does not exceed the after-rehabilitation appraised value. However, given the markets in low-income areas, the feasibility of rehabilitating sub-standard units may not meet this requirement because of low value neighborhoods. Therefore, CDBG and HOME funds have been used to structure programs that compensate for weak markets and affordability. The city of Norfolk will continue its efforts over the next five years to assist low- to moderate-income households with basic maintenance and aesthetic improvements.
MA-10 Number of Housing Units – 91.210(a)(&(b)(2)

Introduction

According to ACS data, housing units in the City of Norfolk are primarily 1-unit detached structures, with 46,820 units at 49 percent. Three or more bedroom units comprise the majority of units, with 31,934 units at 81 percent and 13,118 units for renters at 29 percent.

Table 28 – Unit Size by Tenure
Data Source: 2007-2011 ACS

Describe the number and targeting (income level/type of family served) of units assisted with federal, state, and local programs.

The public housing inventory and the Housing Choice Voucher Program provide an affordable housing choice to very low-income households, the elderly, and the disabled living in Norfolk. The Norfolk Redevelopment and Housing Authority (NRHA) provides Section 8 vouchers for 2,763 units of scattered site housing for households up to 80 Percent AMI. In accordance with the NRHA Agency Plan, families selected for Section 8 vouchers are based on the following preferences: date and time of the completed application; residency preference for families who live, work, or have been hired or who are attending school in the jurisdiction; families who are graduates or are active participants in educational and
training programs designed to prepare the individual for the job market; disability; involuntary displacement due to the local government action related to code enforcement, public involvement or development; victims of domestic violence; welfare-to-work program eligibility; family unification program eligibility; and all families with children and families who include an elderly person or a person with a disability.

The Office to End Homelessness and the Department of Human Services provide approximately 63 Tenant-Based Rental Assistance (TBRA) vouchers for homeless households up to 60 per cent of AMI through the city administered HOME Program. The city provided home repair grants to 23 low- to moderate-income qualifying households in 2016. The city also sold 29 single family homes as of February 29, 2016 with 2nd mortgage purchase assistance and forgivable down payment and/or closing cost assistance grants in FY 2016.

Provide an assessment of units expected to be lost from the affordable housing inventory for any reason, such as expiration of Section 8 contracts.

The Norfolk Redevelopment and Housing Authority (NRHA) does not expect any affordable housing units to be lost from its Section 8 inventory. While it can be expected that some affordable housing units will be lost, additional affordable housing units will be replaced through new development and redevelopment of other tax credit projects. Overall, the City of Norfolk expects there will be a net gain of affordable housing units.

Does the availability of housing units meet the needs of the population?

The Housing Needs Assessment (sections NA-10, NA-15, NA-20, NA-25, and NA-30) and the Housing Market Analysis (sections MA-15 and MA-20) in this Consolidated Plan clearly indicate that the available housing units do not meet the needs of many of the very-low, low- and moderate-income residents living in Norfolk, particularly in terms of affordability.

Describe the need for specific types of housing:

Affordable housing for low-income and extremely low-income households is needed because market rents often translate into high housing cost burdens for low-income families. Special Needs handicapped accessible housing assistance continues to be needed, especially for the frail elderly and physically disabled population. Likewise, affordable housing for families with children remains a need throughout the City of Norfolk as evidenced by the numbers of people experiencing overcrowding.

Safe, Affordable, and Accessible Housing: There is a need for safe, affordable, and accessible renter and owner housing, be it new construction or rehabilitated, energy efficient older housing. As shown on the HUD mandated tables, there are approximately 10,240 very low, low, and moderate-income households living in Norfolk who are paying more than 30 percent of their incomes for housing.
**Permanent Supportive Housing for Persons with Special Needs:** There is a need for permanent supportive housing for persons with special needs, including chronically homeless individuals and families, persons with severe mental illness and/or chronic substance abuse, veterans and their families, persons living with HIV/AIDS and their families, and victims of domestic violence.

The Southeastern Virginia Homeless Coalition (SVHC) conducted both a sheltered and an unsheltered Point-In-Time Count on January 26, 2016. The 24-hour count was conducted across the six jurisdictions covered by SVHC that include: Norfolk, Chesapeake, Suffolk, Franklin, Isle of Wight County and Southampton County. Overall, 723 homeless persons were identified as being homeless in Norfolk, Chesapeake and Western Tidewater during the 24-hour period, of which 563 were from the City of Norfolk. The sheltered and unsheltered counts for each category is shown in table below.

Based on the latest PITC data, provided by The Planning Council, the chart below shows there is an increase both in the number of individuals with substance abuse issues and those with mental health issues. The data supports a need for increased services for these populations. The CoC is currently addressing this need through a Cooperative Agreement to Benefit Homeless Individuals (CABHI) grant offered by the Substance Abuse and Mental Health Services Administration (SAMHSA) and locally administered by the NCSB and The Healing Place of Hampton Roads.

In addition, the SVHC also realized a 53 percent decrease in the number of chronically homeless individuals identified between 2015 and 2016 shown in the charts attached comparing the Homeless Subpopulations for 2013 through 2016.

**Discussion**

The City of Norfolk continues to be challenged to preserve and increase the supply of affordable housing units and affordable rental units for all groups with needs which is by far the most critical housing need in Norfolk.
MA-15 Housing Market Analysis: Cost of Housing - 91.210(a)

Introduction

Between 2000 and 2011, the cost of housing significantly increased for renters and homeowners. The median home value increased 140 percent while the median contract rent increased 66 percent.

When compared to housing costs in other parts of the country, home values within the City of Norfolk have fluctuated in recent years. Foreclosures and short sales drastically reduced property values from their housing boom value. Although the adjustments made many units affordable, the simultaneous economic downturn made acquiring these properties difficult. The housing market continues to be stabilized through various initiatives offered through private and public sectors throughout the community. These initiatives have allowed units to become and remain affordable. However, there are many units that are in need of rehabilitation, which can increase the cost of these units. Cost burden appear to be the largest housing problem for many households.

Table 31 – Housing Affordability

Data Source: 2007-2011 CHAS
Is there sufficient housing for households at all income levels?

Despite the national housing downturn and prolonged recession, housing costs have increased substantially in the City of Norfolk with home prices increasing by 140 percent and rents climbing by 66 percent since the 2000 Census. There is a lack of decent affordable housing units across the board. From a pure quantitative standpoint there are ample units in the City of Norfolk to house the population. However, high home values and rents result in much of the housing stock being out of the affordable range for large portions of the population. Approximately 52 percent of owners with a mortgage and 59 percent of renters are currently cost burdened, pointing to a disconnect between the housing supply and residents’ income. Furthermore, 23 percent of homeowners without a mortgage are currently cost burdened. Starting at the 100 percent AMI income group there is a considerable lack of affordable units; this gap is progressively larger for moderate, low, and extremely low income groups. Finally, 41 percent of housing types in the region are single-family, detached with household sizes decreasing and single-person housing increasing, this housing type may not be as desirable for many households in the future.

The issue of severe cost burden exists for households throughout Norfolk. Extremely low income households, regardless of where they live, have high rates of severe cost burden. The situation lessens somewhat for low income and moderate-income households, although census tract rates above 50 percent for these household types remain common.

How is affordability of housing likely to change considering changes to home values and/or rents?

From 2000 to 2011 City of Norfolk’s median home value increased 140 percent, from $88,300 to $211,600 and the median rent increased 66 percent, from $449 to $746. Over the same period median income only went up 28 percent, going from $31,815 in 2000 to $43,914 in 2011. As such housing cost burden has increased tremendously in the city. Continued increases in housing values and rents without adequate income growth will further increase housing cost burden across the board.

With the emergency of more steady real estate market relative to both home values and rent levels, no significant change is anticipated in the overall affordability of the housing market. At this time, the housing market is more affordable for buyers as the median housing value has decreased. Provided that
lower income households can qualify for mortgages, it could be expected that the demand in the rental market may decrease. Conversely, rents may increase at a smaller rate or even slightly decrease if vacancy rates are high enough.

**How do HOME rents / Fair Market Rent compare to Area Median Rent? How might this impact your strategy to produce or preserve affordable housing?**

The median rent for the city of $746 (according to the 2011 ACS estimates in Table 28) means half of units rent for lower than this amount and half rent for more than $746. The largest rent cohort in the city was the $500 to $999 range – with 27,880, or 61 percent of the rental stock. The second largest rent cohort was the less than $500 group – with 8,032 units, or 18 percent of the rental stock. The third largest rent cohort was the $1,000 to $1,499 group – with 7,152, or 16 percent of the rental stock.

The median rent for the city of $746 falls between the High HOME Rent for a 1-bedroom and 2-bedroom unit, and also between a no-bedroom and 1-bedroom unit under Fair Market Rent. Overall, rents paid in Norfolk roughly fall within the ranges of Low and High HOME Rents as well as Fair Market Rent. As was highlighted above, 52 percent of city renters are currently cost burdened due to housing. The figure represents a 66 percent growth in renter cost burden since 2000. This points to the fact that as housing costs increases continue to outpace income growth a great number of renter households are deeply in need of assistance, either from direct rental assistance, Section 8 or through more affordable rents.

The HOME and Fair Market rents for efficiency and one-bedroom units in the City of Norfolk are less than the median rent reported in the 2007-2011 ACS, and greater than the median rent for two bedrooms or more. This information would seem to indicate that more affordable housing may be needed for two or more bedroom-units. The higher rents in those unit types may also encourage the market to utilize rental assistance programs, such as Section 8 and TBRA voucher.

**Discussion**

HUD considers a housing unit affordable if the occupant household expends no more than 30 percent of its income on housing costs. If the household spends more than 30 percent of its income on housing costs, the household is considered to be cost-burdened. Cost burdened households have less financial resources to meet other basic needs (food, clothing, transportation, medical, etc.), less resources to properly maintain the housing structure, and are at greater risk of foreclosure, eviction, and housing order from the City’s Department of Neighborhood Development for property code violations.

The city will be taking the approach of maintaining the supply of affordable housing, and expanding that supply when possible to address the needs of cost burdened households. The city has prioritized the creation of affordable rentals in the next five years due to limited supply of rental units and lack of public assistance relative to need.
MA-20 Housing Market Analysis: Condition of Housing – 91.210(a)

Introduction

The need for rehabilitation has already been discussed in the previous sections of the ConPlan. The majority of units, 78,763 were built before 2000. These homes are more likely to need repairs to provide safe, decent and affordable housing. Conditions of units may be associated with the lack of complete kitchen or plumbing facilities, more than one person per room, or having a cost burden greater than 30 percent of their household income. According to the Condition of Units chart below, 35 percent of owner-occupied units and 50 percent of renter-occupied units have at least one of the selected conditions.

Definitions

Substandard condition could be defined as housing that does not meet local building, fire, health and safety codes. Substandard condition but suitable for rehabilitation could be defined as housing that does not meet local building, fire health and safety codes but is both financially and structurally feasible for rehabilitation. It may be financially unfeasible to rehabilitate a structure when costs exceed 30 to 50 percent of the assessed value of the property.

Table 36 - Vacant Units

Data Source: 2005-2009 CHAS

Need for Owner and Rental Rehabilitation

Most of the City of Norfolk’s households have no housing problems, 25,379 owner-occupied units at 64 percent and 21,580 renter-occupied units of which 47 percent have none of the four evaluated housing problems. There are 13,800 homeowner-occupied units or 35 percent, and 22,079 renter-occupied units or 50 percent that have at least one housing problem. Since the age of Norfolk’s housing is a significant factor, it is presumed that many of these owner- and renter-occupied homes need housing rehabilitation.

Estimated Number of Housing Units Occupied by Low or Moderate Income Families with LBP Hazards

Lead-based paint (LBT) is a concern because of its effects on children: elevated blood levels in young children can lead to a host of problems from relatively subtle developmental disabilities to severe impairment or even death.

The use of lead-based paint was banned from residential usage in 1978. However, a majority of the structures constructed prior to the ban are at-risk of containing lead-based paint. Lead poisoning is most likely to occur in old, poorly maintained dwellings with deteriorated paint. Remodeling of homes with lead paint will exacerbate exposure if lead hazards have not been mitigated.

Approximately 32,493 owner-occupied housing units at 82 percent and 31,997 at 70 percent of the population of the City of Norfolk are low- to moderate-income. Using the data from Table 33 in which there are 32,493 owner-occupied, and 31,997 renter-occupied housing units built before...
1980. Regarding the hazard posed by lead-based paint, a significant percentage of housing units in Norfolk are at risk. Furthermore, the greater the age of a housing unit, the more likely it is to contain lead-based paint. Overall, Norfolk had a lower rate of children identified in housing units which consist of about three (3) percent in homeowner-occupied units and six percent renter-occupied units.

Table 38 - Public Housing Condition

**Describe the restoration and revitalization needs of public housing units in the jurisdiction:**

The city will collaborate with NRHA to utilize additional strategies to address the revitalization and restoration needs of public housing; to not only provide rental units but also create mixed-income communities to reduce the high density of low-income housing. The city is committed to implementing the initiatives to distribute affordable housing throughout the city, thereby, reducing low-income density. Various resources will be utilized to finance these initiatives including, but not limited to: low-income housing tax credits, new market tax credits, replacement housing funds/ factor funds, and partnerships with entities to further the goal of creating additional housing opportunities.

**Describe the public housing agency’s strategy for improving the living environment of low- and moderate-income families residing in public housing:**

To improve the management of and operation of public housing and improve the living environment for the extremely low-income, low-income, and moderate-income households residing in NRHA communities, the agency conducts assessments of its entire portfolio, paying particular attention to the developments that have not been renovated to determine feasibility of redeveloping, disposition, or total demolition. The assessment reviews the age of the buildings, systems, viability, and marketability and is conducted by using a consultant.

Additionally, NRHA staff conducts its own studies on an annual basis. Each site manager, the Directors of Property Management, Capital Fund, and Specialized Maintenance, in addition to support personnel use the analysis to determine the repair and replacement timeline. Based on the recommendations by the Focus Group, the agency’s capital-fund budget allocation is determined. The capital fund is an annual formula-based allocation provided to jurisdictions based on the number of units NRHA has in its inventory.

**Discussion:**
MA-30 Homeless Facilities and Services – 91.210(c)

Introduction

In Norfolk, the network of public, private, and non-profit agencies that comprise the Southeastern Virginia Homeless Coalition and the Continuum of Care (CoC) work in concert to meet the needs of homeless persons, actively promoting an approach that focuses on preventing and ending homelessness and rapidly returning people who have become homeless to housing. The vision of the CoC is to make homeless rare, brief and non-recurring.

Table 39 - Facilities and Housing Targeted to Homeless Households

Data Source Comments:
Describe mainstream services, such as health, mental health, and employment services to the extent those services are use to complement services targeted to homeless persons

HUD defines mainstream benefits and services as services that “consist of a wide variety of publicly funded services, programs, and entitlement for low-income people that address basic needs, including, but not limited to, income and employment, housing, food and nutrition, health and behavioral health services, child welfare, and transportation.”

The city’s benefits and services are provided through numerous state, and local governmental departments, and include services as such as mental health, co-occurring mental health and chemical dependency treatment and counseling services through the Norfolk Community Services Board; early childhood and youth services through a variety of non-profit agencies such as the YWCA of South Hampton Roads; educational assistance programs such as the United for Children initiative; and, employment services through the Virginia Employment Commission and Goodwill Industries. Additionally, homeless housing providers work diligently to ensure that their staff members are SOAR (SAMHSA’s SSI/SSDI Outreach, Access, and Recovery Technical Assistance) trained and their clients are aware of, and enrolled in, all applicable mainstream benefits, such as Temporary Assistance to Need Families (TANF), SNAP (food stamps), WIC, Social Security (SSI, SSDI, SSA) and the Virginia Department of Rehabilitative Services.

List and describe services and facilities that meet the needs of homeless persons, particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth. If the services and facilities are listed on screen SP-40 Institutional Delivery Structure or screen MA-35 Special Needs Facilities and Services, describe how these facilities and services specifically address the needs of these populations.

The following services and facilities meet the needs of homeless persons, particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth.

**Housing:** Provides access to shelter and housing options – SVHC Service Coordination Committees: instituted to provide the CoC with a central/coordinated assessment process which offers all clients experiencing homelessness with equal access to ongoing housing options beyond emergency shelter. Where appropriate households may be eligible for diversion services, short-term cash assistance, rapid rehousing, transitional housing, tenant based rental assistance or permanent supportive housing – SVHC – CoC Service Coordination Committee

**Health, Mental Health Care, Substance Abuse Counseling and Treatment:** Provides free, low cost health, mental health care, substance counseling and treatment - Norfolk Community Services Board and the Department of Human Services and various clinics in Norfolk.

**Transportation:** Provides light rail, and bus transportation - Bus passes are provided throughout the city in order to access services.
**Income Assistance:** Provides links to mainstream benefits – Norfolk Department of Human Services, Social Security Administration, and Virginia Employment Commission.

**Educational Opportunities and Job Training:** Provides GED classes, education, employment classes and training - Tidewater Community College (TCC), area high schools, Opportunity Inc., Workforce Development, and VIEW through the Norfolk Department of Human Services.

**Food and Nutrition:** Provides food, free meals, and other food assistance - Foodbank of Southeastern Virginia, and area churches and missions.

**Legal Aid and Mediation:** Provides free or low-cost legal assistance - Legal Aid of Southeastern Virginia and Community Mediation Center.

**Veteran’s Services:** Provides various services for veterans - Hampton VA Medical Center; Virginia Veterans and Family Services; STOP Inc., ForKids Inc., and Virginia Beach Community Development Corporation (SSVF providers); Virginia Employment Commission; etc.

**Homeless Advocacy:** Advocates for the rights of the homeless - Southeastern Virginia Homeless Coalition (SVHC) - Particular emphasis is placed on coordinating the CoC and implementing the federal Open Doors strategy including an emphasis on meeting the plan’s goals in ending homelessness amongst veterans, chronically homeless individuals and families, families with children, and unaccompanied youth. The network includes providers of housing and supportive services for the homeless, as well as governmental departments and area non-profit agencies that provide housing & services and link persons to mainstream benefits, helping the homeless to find and retain housing; Virginia Housing Alliance – a statewide advocacy group dedicated to ending homelessness and preserving affordable housing.
MA-35 Special Needs Facilities and Services – 91.210(d)

Introduction

There are a variety of service providers in Norfolk. These providers coordinate amongst themselves to ensure they are meeting community needs efficiently.

Including the elderly, frail elderly, persons with disabilities (mental, physical, developmental), persons with alcohol or other drug addictions, persons with HIV/AIDS and their families, public housing residents and any other categories the jurisdiction may specify, and describe their supportive housing needs

Supportive housing needs for people with disabilities tend to be specific to their need. With the aging population, the city anticipates seeing an increase in the need for specialized housing for elderly persons. The DHS, a network of providers deliver housing and supportive services to persons who are elderly, frail elderly, persons with mental, physical and/or developmental disabilities, persons with substance abuse addictions, or persons with HIV/AIDS.

Persons with drug and alcohol addictions need supportive housing that encourages sobriety. Norfolk residents have been instrumental in establishing the Healing Place facility that will provide support. The City of Norfolk also has mental health aides that check in on people with severe and persistent mental illness to provide support and medication compliance.

Describe programs for ensuring that persons returning from mental and physical health institutions receive appropriate supportive housing

The Norfolk Community Services Board and the Department of Human Services work with people while they are in mental health institutions to arrange supportive housing upon discharge. Physical health institutions have social workers who help plan for discharged patients to ensure supportive services are in place.

Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. 91.315(e)

The City of Norfolk is exploring providing a wider array of community substance abuse services in the coming year that may include housing.

For entitlement-consortia grantees: Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. (91.220(2))
The city’s priority for assisting those individuals categorized with special needs is listed in Non-Homeless Special Needs Table located on the next page. Each Special Needs category was assigned a priority based on the following criteria:

1. Current availability of services;
2. Priorities received based on Web-based Consolidated Plan Survey;
3. Comment received during public input session.

The supportive housing needs of the city’s non-homeless special needs population are estimated below:

**Goal 1:** Support organizations that assist the city’s special needs population. The city identified one goal; and it also identified five (5) strategies over the Five-Year Consolidated Plan which include:

**Strategy 1:** Support local and regional agencies that provide shelter, housing support services for homeless and those close to becoming homeless.

**Strategy 2:** Operate programs that assist low-income and special needs populations in all population groups.

**Strategy 3:** Operate programs to provide education and job training.

**Strategy 4:** Operate the Office to End Homelessness initiatives and other programs that prevent homelessness.

**Strategy 5:** Provide funding for the Tenant-Based Rental Assistance (TBRA) and the other homeless programs in efforts to assist individuals and families from becoming homeless.
MA-40 Barriers to Affordable Housing – 91.210(e)

Negative Effects of Public Policies on Affordable Housing and Residential Investment

Identified barriers to affordable housing include inadequate national funding for the Housing Choice Voucher Program, decreasing levels of Federal and state resources, HOME rule, and the cost and financing of housing stock maintenance.

There are a number of State and local regulations designed to promote the orderly development and maintenance of safe, decent and sanitary housing in the community. Sometimes these regulations can act as barriers to affordable housing. That does not appear to be the case in Norfolk.

To eliminate duplication, the city uses the building codes established by the State for uniform construction standards. These standards parallel the three National Code Standards and are minimum provisions to ensure general safety for the public. The State codes and guidelines are also appealable to the State. Consequently, the city’s building codes do not appear to hinder the development or preservation of affordable housing.

Also, the locally established Minimum Housing Code does not create a barrier for affordable housing. These standards parallel the National Minimum Housing Code Standards and are minimum requirements established to preserve and promote the public health, comfort, safety, personality and general welfare of the people. Their enforcement is necessary to preserve and encourage the private/public interests in housing and its maintenance. At the same time, these standards are appealable, locally, to ensure there are no undue hardships.

An examination of the community’s fee structure indicates the city’s building permit fees and charges are set at a median, as compared to surrounding Hampton Roads communities. In fact, in the case of new housing development, the city is currently subsidizing the cost of services because the cost to the city is greater than the development fees charged. The city’s positive, proactive position on housing development and preservation is further evidenced by its departmental restructuring to facilitate and better coordinate the development and housing process, as well as the substantial resources and technical assistance the city provides to the development and preservation of affordable housing.

The city’s zoning and land-use codes promote the morals, aesthetics, prosperity, health, safety and general welfare of all people in Norfolk. These codes are constructed to allow compatible development throughout the community and are flexible enough to encourage redevelopment in the community’s existing, established areas. These codes, like other local codes, are appealable locally to ensure equitable and fair treatment.

All residential properties are assessed on a citywide basis using market sales data of comparable properties in and around the immediate neighborhood. Citywide assessing appears to ensure an equitable treatment of residential property and provides an incentive to those who maintain and improve their properties.
MA-45 Non-Housing Community Development Assets – 91.215 (f)

Introduction

There are consistent patterns between the special needs population and the increased risk for homelessness because of lack of adequate housing facilities. There is no permanent housing available in Norfolk though there is a well-integrated service delivery system. The Norfolk Department of Human Services and the agencies that provide services for these populations work closely and cooperatively. The access to mainstream resources for these populations has a well-defined intake system. The main issue is one of capacity and adequate funding. There is a small number of services for people with addictions.

In addition to the homeless population, many non-homeless persons have special needs and may be at risk of becoming homeless. Based on information received via Consolidated Plan Community Needs Survey, the following populations were identified for housing and supportive services:

- Vulnerable Adults (elderly/ frail elderly)
- Persons with disabilities (mental, physical and developmental)
- Persons identified with HIV/AIDS
- Alcohol and Drug Abuse
- Victims of domestic violence

In addition, persons with special needs are those that are physically, emotionally or mentally impaired or suffer from mental illness, developmentally disabled, youth aging out of foster care, persons with addictions, HIV/AIDS and their families and victims of domestic violence.

**Table 46 – Median Earnings in the Past 12 Months**

**Data Source:** 2007-2011 ACS

**Based on the Business Activity table above, what are the major employment sectors within your jurisdiction?**

According to the Business Activity table above, the major employment sectors within the City of Norfolk include: Arts, Entertainment, Accommodations, Education, and Health Care Services, Manufacturing and Retail Trade.
Describe the workforce and infrastructure needs of the business community:

The city proposes over the next five years to strengthen its workforce within the business community to attain and retain well educated, motivated, healthy, skilled, trainable locally mobile, multi-talented employees. Each sector’s job needs include job readiness, job preparedness of employees with post-secondary education, and competence in basic and technical skills. The business community’s infrastructure needs are an efficient, safe, and reliable transportation system, including street, rail and airport facilities, access to water and sewer services through the Norfolk Department of Utilities, internet service, recreational facilities, entertainment venues and cultural attractions, improvement of hospitality services such as hotels and fine dining establishments, good schools, affordable housing for their workforce, and access to post-secondary colleges and universities.

Further needs were identified in Norfolk to promote business, government, and education and community service leaders and include:

- Attraction of similar companies with the same specific training needs
- Targeting of non-traditional students by technical schools
- Expansion of existing and development of additional mentoring programs that connect education with businesses
- Expansion of commuter rail
- Full funding of infrastructure support
- Improvement of riverfront access for quality of life
- Coordination of information and resources for potential and current small business owners
- Development of investor’s group to fund or finance small businesses
- Collaboration by local governments to provide information on city zoning and permitting process to potential and small business owners
- Development of a healthy downtown area
- Improvement of the image and services of the City of Norfolk Job Center with employers
- Improve the marketing efforts of job recruitment

Describe any major changes that may have an economic impact, such as planned local or regional public or private sector investments or initiatives that have affected or may affect job and business growth opportunities during the planning period. Describe any needs for workforce development, business support or infrastructure these changes may create.

The economic development mission for the City of Norfolk, through its Five-Year Consolidated Plan, has identified job creation and economic growth as a fundamental local government purpose. The Department of Economic Development plans to foster economic growth and create vibrant, healthy and welcoming places for businesses and residents to prosper.
The Department of Economic Development is charged with driving this economic development activity, working with businesses and development projects of all sizes, through the Community Infrastructure and Economic Development Initiatives, and its’ various lending and grant programs. Job creation is accomplished by offering borrowers and project funding through a portfolio of gap-financing products at below-market rates and terms. Subordinated low-interest loans are made available for business expansion, innovation and accelerated growth, real estate development and reutilization.

The Department of Economic Development plans to run a seasoned internal lending operation for this broad spectrum of business and economic expansion needs. It also intends to collaborate with other organizations to expand to large scale attraction opportunities in Norfolk.

In addition, the Department of Economic Development has applied for Section 108 loan authority of $19,000,000 to create a fund which will support real estate development in key communities as well as operating businesses. It is expected most, if not all, of the Section 108 loans will be lent in the 14 priority development areas (Broad Creek, Central Business Park, Church Street Triangle, Downtown, East Ocean View, Fort Norfolk, Hampton Boulevard, Little Creek, Military Circle, Newtown Road, Saint Paul’s Southside, Tidewater Drive South, and Wards Corner) and/or the six priority neighborhood districts (Berkley South, Chelsea, Downtown Arts Area, Five Points, Ocean View Avenue, Park Place/35th Street).

Additionally, for the operating businesses that will be considered for the Section 108 loans, priority will be given to those business or real estate development that target business in the City’s targeted industries clusters, including:

- Healthcare/Life Sciences
- Maritime. Supply Chain
- Defense/Cyberspace
- Innovation/Technology/Manufacturing
- Headquarters
- Policy Associations
- Creative/Artisanal/Film
- Retail
- Renewable Energy

How do the skills and education of the current workforce correspond to employment opportunities in the jurisdiction?

According to the Table 40, 28.64 percent of the civilian labor force in Norfolk has a bachelor’s degree or higher. Table 41 displays Occupation by Sector showing that the Management, business and financial sector has the highest number of people with 24.9 percent, or 20,257 persons. The Management, business and financial sector usually requires an education of a bachelor’s degree or higher to hold these positions. Sales and Office occupations represent 32.2 percent, or 26,216 persons in Norfolk’s workforce. This sector may or may not require an education beyond high school diploma or
equivalency. According to Table 43, there are 31,768 persons, or 28.7 percent of the population that are high school graduates. While there are insufficient sales and office jobs for this population, they may work in the service, construction, extraction, maintenance and repair; production, transportation and material moving occupations. Regardless of a worker’s home community, the workforce issues are similar. The dominant issue is the ongoing need for more educational and training opportunities.

With the dynamic of having a workforce that is more highly educated in general than the baseline needs of business means that low-skilled individuals are boxed out of competition for most jobs, even across the service sector. Still--the most rapidly changing needs in the employer community are for jobs that require specific short-term college training or a post-secondary non-degree award, which would include occupations such as Median Assistants and Computer Support Techs. This creates an opening for lower-skilled individuals to enter middle-class jobs through shorter term training interventions.

Describe any current workforce training initiatives, including those supported by Workforce Investment Boards, community colleges and other organizations. Describe how these efforts will support the jurisdiction’s Consolidated Plan.

There a variety of workforce development training and professional development opportunities available for Norfolk residents and workers in various employment sectors offered at area universities, Community College, Human Services employment programs and Opportunity Inc. facilities. These programs and training support the Consolidated Plan by providing the education and training needs for many current jobs. These facilities offer professional continuing education courses and MBA degree programs designed to be pursued on a part-time basis. Other training categories include:

- Educational institutions such as Tidewater Community College and Old Dominion University providing professional training and development customized for individual businesses. Programs are delivered either off-site at the company facility or on-site at one of the college campuses.
- The collaborative workforce system of Norfolk assists both employers and job seekers, facilitated by the Hampton Roads Workforce Development Board, which does business as Opportunity Inc. The Workforce Development serves as the liaison to determine employer needs. Both on-the-job training and new hire programs exist. [MW1] They also assist individuals in an effort to reenter the workforce after a layoff, incarceration, and employment opportunities for homeless individuals by offering networking and computer skills.
- Higher Education Institutions offer degree-seeking students certificates and degrees annually. These institutions focus on talent development programs linking the higher education and business communities to enhance college access and completion; address workforce needs; and promote and facilitate experiential learning, which connects classroom learning with professional practice for students and improves recruitment and retention efforts for employers.
The City of Norfolk through the Learning Center offers training through computer skills lab and a learning center. The Learning Center provides adult basic educational services on an individual basis including brushing up on academic skills, GED or high school equivalency diploma, or in need of tutoring. The Learning Center also offers workshops on job search preparation, career development and life skills.

**Does your jurisdiction participate in a Comprehensive Economic Development Strategy (CEDS)?**

If so, what economic development initiatives are you undertaking that may be coordinated with the Consolidated Plan? If not, describe other local/regional plans or initiatives that impact economic growth.

Currently, the City of Norfolk is updating its current Comprehensive Economic Development Strategy (CEDS). The city anticipates this will be completed within the upcoming year.

Since 2015, the Department of Economic Development has been restructured in order to develop an economic development plan for Norfolk. The plan laid out six major steps to move the City of Norfolk forward, along with goals. These major steps include:

1. Build awareness of Norfolk among employers in and around Hampton Roads area.
2. Align the funding priorities of Economic Development in order to better manage revolving loan funds with the goals of the strategic plan.
3. Bring the business, workforce training, and education communities closer together.
4. Place greater emphasis on entrepreneurship and small business development.
5. Address a gap in the city’s industrial/commercial real estate inventory.
6. Elevate the image of the City of Norfolk regionally.

The five goals are:

1. Support and expand the existing base through business retention and consolidation strategies.
2. Position the City of Norfolk for long-term economic growth and vitality.
3. Attract, retain and engage talent.
4. Ensure all parts of the city are economically, digitally, and physically connected.
5. Build a distinct image and brand for the City of Norfolk.

**Discussion**
MA-50 Needs and Market Analysis Discussion

Are there areas where households with multiple housing problems are concentrated? (include a definition of "concentration")

An area where households with multiple housing problems exist is defined as a census tract which contains one or more housing problems (one of four severe housing problems, housing cost burden >30 percent, housing cost burden >50 percent, overcrowding and substandard housing) which exist at a rate of at least 10 percent greater than in the City of Norfolk.

Based on this definition, HUD defines “housing problems” as one or more of the following:

Substandard Housing (Lacking complete plumbing or kitchen facilities).

Overcrowded (Housing more than 1.01 persons per room excluding bathrooms, porches, foyers, halls or half rooms).

Housing Cost Burden (Housing costs that are more than 30 percent of the household’s total gross income. For renters, cost includes rent paid plus utilities. For owners, cost includes mortgage payments, taxes, insurance, and utilities).

Household Has No/ Negative Income (Households whose income is zero or negative due to self-employment, dividends, and net rental income).

A “concentration” of multiple housing problems can be identified as households who experience multiple housing problems at a greater rate (10 percent points or greater) than the households for the Norfolk. The CPD Maps Reports for Norfolk, prepared by HUD, shows number of households that have or to not have “housing problems”. Cost burden was the major problem cited by most of the households having one or more “housing problems”.

Are there any areas in the jurisdiction where racial or ethnic minorities or low-income families are concentrated? (include a definition of "concentration")

Areas where racial or ethnic minorities or low-income families are concentrated is defined as census tracts where at least 40 percent of the population are racial or ethnic minorities. Areas where low-income families are concentrated is defined as census tracts where at least 51 percent of the households have incomes less than 80 percent AMI.

The low- to moderate- income census tracts have a concentration of racial minorities, where at least 40 percent of the census tract is comprised of non-white families. There are not census tracts with 40 percent or more of ethnic minorities as of the 2007-2011 ACS; have the greatest concentration of low-income families are located, where 51 percent or more of families are low-income.
What are the characteristics of the market in these areas/neighborhoods?

Census tracts with concentrations of households with any housing problems are found amongst the low and moderate income census tracts. These census tracts typically have a lack of shopping opportunities, depressed housing values, a larger percentage of rental housing, housing need rehabilitation, few job opportunities and households with lower incomes.

Are there any community assets in these areas/neighborhoods?

The City of Norfolk’s Comprehensive Plan describes many of the community assets and strategic opportunities in these areas. The areas will be key to achieving the goals laid out in the Comprehensive Plan to create complete, healthy connected neighborhoods throughout the city to meet the needs of Norfolk households. The low- to moderate-income census tract table using HUD 2000 Definition is provided in the attachment.

Are there other strategic opportunities in any of these areas?

There are strategic opportunities in many of the above listed census tracts that relate to one or more of the major planning and public infrastructure projects mentioned in MA-45 Non-Homeless Community Development Assets, including capital planning for infrastructure improvements, and economic development. The city’s economic plan emphasizes job creation and economic growth in cooperation with the private sector. Funding for this program uses local, non-federal resources and federal resources. There are also strategic opportunities in terms of housing. The NRHA’s Homebuyer Assistance Programs, using HOME resources, are frequently utilized in these areas, which improves residential neighborhood stability. In addition, CDBG funds will result in improvements to infrastructure and public facilities.
Strategic Plan

SP-05 Overview

Strategic Plan Overview

This section contains the Strategic Plan that will guide the City of Norfolk’s allocation of Community Development Block Grant (CDBG), HOME Investment Partnerships Program (HOME) and the Emergency Solutions Grant Program (ESG) funding during the FY 2017 – FY 2021 planning period.

The City of Norfolk’s Five Year Consolidated Plan identifies the community’s affordable housing, community development and economic development needs and outlines a comprehensive and coordinated strategy for addressing them. The city’s upcoming five-year strategy will focus primarily on leveraging U.S. Department of Housing and Urban Development (HUD) funds with local, state and private sector capital for the purposes of:

- Increasing homeownership rates in areas of the city that traditionally have had low rates of homeownership,
- Improving the existing housing stock through rehabilitation of owner-occupied substandard housing for low-income households,
- Financing for new or existing rental housing that serves low- and moderate-income households,
- Targeting economic development activities that promote job creation, and
- Achieving a functional end to homelessness for the chronically homeless, families with children, youth and others, while maintaining the system which achieved this goal for veterans.

The city will also leverage its existing social service infrastructure to continue providing public service and social service programs that serve other at-risk populations including youth.

Identify the needs in this target area.

What are the opportunities for improvement in this target area?

Are there barriers to improvement in this target area?

General Allocation Priorities

Describe the basis for allocating investments geographically within the jurisdiction (or within the EMSA for HOPWA).

The city does not receive HOPWA funds, the city receives federal CDBG, HOME and ESG funds that are intended to provide low- to moderate-income households with viable communities, which include access to decent housing, suitable living environment and expanded economic opportunities. Eligible activities include community facilities and improvements, housing rehabilitation and preservation, affordable housing development activities, public services, economic development as well as planning and administration. The entirety of CDBG and ESG funds are allocated to services for extremely low-, low- and moderate-income Norfolk households. Funds received through the HOME Program provide Community Housing Development Organizations (CHDOs) to develop affordable housing throughout the city. Fifteen (15) percent of the HOME allocation is earmarked for CHDO activities only. The process for establishing the priority for the selection of projects is predicated upon the following criteria:

- Meeting the statutory requirements of the CDBG, HOME and ESG programs;
- Meeting the needs of LMI residents;
- Focusing on low- and moderate-income areas;
- Coordination and leveraging of resources;
- Response to expressed needs;
- Sustainability and/or long-term impact, and
- Ability to demonstrate measurable progress and success.

The CDBG, HOME and ESG program funds minus program administration funds over the next five years are invested in LMI areas within the City of Norfolk as identified in the map on page 72. Establishing target areas helps DND direct funding and activities to certain areas of the city to enhance these areas while also preserving affordability. The basis for choosing target areas for investment is to consolidate scarce funding to create major improvements in selected areas of the city in need.

**Consolidated Plan** NORFOLK 83

OMB Control No: 2506-0117 (exp. 07/31/2015)
Description | Priority needs were chosen from among a larger list of overall needs. Priority needs formed the basis of selecting projects for the FY 2017 (PY 2016) annual plan and these needs will also help shape future annual plans. The city has identified the following priority needs mentioned above over the next five years that include: Affordable Housing, Community Development, Economic Development; Homelessness; Special Needs Population; and Planning and Administration activities for CDBG, HOME and ESG.

- **Affordable Housing:** Rehabilitation of rental and owner-occupied units; homeownership assistance.

| Basis for Relative Priority | The City of Norfolk plans to assist households with providing financial assistance to homeowners with housing rehabilitation needs, and provide landlords who owns privately owned homes with financial assistance in order to rehabilitate rental property for low- to moderate-income households. |

| Priority Need Name | Community Development: |
| Priority Level | High |
| Population | Non-housing Community Development |
| Geographic Areas Affected | |
| Associated Goals | Public Services

**Narrative (Optional)**

Priority needs were chosen from among a larger list of overall needs. Priority needs formed the basis of selecting projects for the FY 2017 (PY 2016) annual plan and these needs will also help shape future annual plans. The city has identified the following priority needs mentioned above over the next five years that include: Affordable Housing, Community Development, Economic Development; Homelessness; Special Needs Population; and Planning and Administration activities for CDBG, HOME and ESG.
The city attempts to address a variety of needs using HUD funded allocations. Housing for the homeless, especially permanent supportive housing, rapid re-housing options and affordable rental housing programs have been and are one of Norfolk’s top priorities.
**SP-30 Influence of Market Conditions – 91.215 (b)**

### Influence of Market Conditions

<table>
<thead>
<tr>
<th>Affordable Housing Type</th>
<th>Market Characteristics that will influence the use of funds available for housing type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tenant Based Rental Assistance (TBRA)</td>
<td>The data in Section NA-10 indicates that cost burden is the major housing problem facing renters in virtually all low- and moderate-income categories and family types. Moreover, severe cost burden is a problem for almost 8,105 extremely low-income households, 7,170 low-income households, and 5,775 moderate-income households. This clearly demonstrates a need for tenant-based rental assistance; but the limited amount of resources available prevents the city from providing this level of assistance beyond its use of TBRA to end homelessness.</td>
</tr>
<tr>
<td>TBRA for Non-Homeless Special Needs</td>
<td>See above description. The TBRA program is intended to assist low-income residents who may or may not have special needs. The city will continue its TBRA efforts by providing financial assistance to those in need of rental assistance.</td>
</tr>
<tr>
<td>New Unit Production</td>
<td>Market factors influencing development of new housing units, and particularly affordable housing units include: Cost of land, cost of infrastructure improvements required for development of land; development fees; construction requirements; and general economic conditions, including income and employment levels and market interest rates. HOME funds can be used to assist in the development of new affordable housing, targeting different levels of income, up to 80% AMI, and various locations citywide. Currently, the city has partnered with various contractors to construct and/or rehabilitate affordable housing units with CHDO dollars and rehab with CDBG funds.</td>
</tr>
<tr>
<td>Rehabilitation</td>
<td>Housing and market data more clearly demonstrate the need for the rehabilitation of existing units. Housing providers also cited the overwhelming need for rehabilitation and the reduction of lead-based paint hazards. Financial constraints limit many low- to moderate-income households to units that are old and likely to be in substandard condition. The city plans to continue supporting home repairs for owner-occupants, and substantial rehabilitation for multi-family units, to preserve the existing housing stock to better align the supply with market demand.</td>
</tr>
<tr>
<td>Acquisition, including preservation</td>
<td>Market conditions influencing acquisition, including preservation are: age of structure, cost of land, and cost of infrastructure improvements required for development of land and positive rate of return.</td>
</tr>
</tbody>
</table>

*Table 49 – Influence of Market Conditions*
SP-35 Anticipated Resources - 91.215(a)(4), 91.220(c)(1,2)

Introduction

The city's FY 2017 (PY 2016) Entitlement Grant Funding and estimated program income amounts are provided below. The city assumed flat funding for FY 2017 (PY 2016) in determining the budget. From the FY 2016 (PY 2015) grant allocations, the city actually received a 2 percent increase in CDBG funding, an 8 percent decrease in HOME, and a 6 percent increase in ESG.

**Table 50 - Anticipated Resources**

**Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied**

The city regularly applies for competitive federal, state, and foundation grants when it meets the application criteria. These funds are used as leverage with local and other grant funds to create new and expand existing programs and services. However, the nature and amount of such funding is unknown at this time. Listed below are the various non-HUD resources the city uses to support community development, housing and a wide range of public service activities.
Federal Resources

- Low-Income Housing Tax Credits
- Economic Development Initiative
- Continuum of Care
- Medicaid
- Ryan White Title II
- Department of Transportation
- Section 8 Moderate Rehabilitation Program for Single Room Occupancy
- Environmental Protection Agency

State Resources

- Housing Trust Fund
- Weatherization Assistance Program
- Department of Health
- Single Room Occupancy Program
- Supportive Housing Program
- Department of Transportation

Local Resources

- Community-Based Organizations
- Community Housing Development Organizations
- Financial Institutions (lending and donations)
- Land Donations
- Department of Human Services
- Local charitable foundations and fundraising activities
Other Resources

- United Way/ FEMA, EFSP

In addition to the receipt of CDBG, HOME and ESG funds, the city anticipates receiving $25.7 million to be available over the next five years and combined with other public and private sector sources to address its priority needs.

The city encourages applicants to seek other funding and in-kind contributions from private and public sources to match city funding. Other things being equal, applications with greater matching sources will receive favorable consideration. Although specific matching requirements are not currently defined, the city may implement them in the future. The city prefers not to be the sole source of funding for a project or program. Eligible match sources include, but are not limited to, non-federal funds, tax credit proceeds, privately activity bonds, municipal General Fund monies, lending institutions, foundations, government entities (city or state), earned revenue, volunteer time, and in-kind donations. The city works with NRHA and HOME subrecipients to ensure the HOME match requirement is satisfied as well as works with its ESG subrecipients to satisfy is dollar-for dollar match requirement.

If appropriate, describe publically owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

The city will consider the use of publicly-owned land for the construction of affordable housing for low- to moderate-income households as well as provide vacant/undeveloped lots to CHDOs for new construction of affordable housing units on a case-by-case basis.

Discussion

Additional creativity, local funding and more partnerships are all necessary if we are to combine to achieve plan objectives, including the use of Low Income Housing Tax Credits (LIHTC) funds for larger development projects.
**SP-40 Institutional Delivery Structure – 91.215(k)**

Explain the institutional structure through which the jurisdiction will carry out its consolidated plan including private industry, non-profit organizations, and public institutions.

Responsibility of Strengths and Gaps in the Institutional Delivery System

City Structure: The primary responsibility for development and administration of the Consolidated Plan and Annual Plan rests with the Department of Neighborhood Development (DND). DND provides programmatic and fiscal management for CDBG, HOME and ESG entitlement programs. The Department of Finance provides professional accounting for all fund disbursements and accounting services and approves all transactions in the Integrated Disbursement and Information System (IDIS), HUD’s financial system. This structure ensures segregation of duties and supports a system of checks and balances. Both DND and Finance work together to support the annual audit of grant funds. In addition, public agencies, for profit agencies, and non-profit organizations all assist with providing housing, community development, homeless, and other public services.

Public Agencies: DND will also enter into interdepartmental agreements with Economic Development, Public Works, and the Community Services Board and other city departments, where applicable, and make sure the city meets timeliness requirements. In order to implement the various elements of the Consolidated Plan and Annual Plan, the city will enter into agreements with outside agencies to carry out their CDBG, HOME and ESG grant activities, in compliance with regulatory requirements.

Norfolk Redevelopment and Housing Authority: The Norfolk Redevelopment and Housing Authority (NRHA) is an independent public corporation that was founded in 1940. NRHA is headed by a board of seven commissioners appointed by Norfolk City Council, who are responsible for determining policy and direction. NRHA Commissioners are residents of Norfolk and serve staggered four-year terms. The board elects a chairman and vice chairman, as well as selects an executive director who is responsible for NRHA’s activities and operations. NRHA is responsible for the construction, rehabilitation, modernization, operation, and management of all low-income public housing within the city.
CHDOs: The city is committed to increase the number of non-profit developers that can be designated as CHDOs. CHDO applications are accepted on a rolling basis and the city evaluates each application for CHDO regulations. Based on guidance provided by HUD, reviews will concentrate on staff capacity and demonstrated development experience. Certified CHDOs may then respond to the city’s RFPs, or propose projects for city consideration. Since capacity building for CHDOs has been a constant challenge due to staff turnover, the city works to ensure that they remain up to date on regulations and best practices, and are organizationally prepared to continue carrying out these activities.

Non-Profits: The city contracts with over 30 non-profit organizations to provide services to those impacted by homelessness, other special populations and the disabled. Services include transportation, substance abuse, food, health and other services to low- to moderate-income persons. Activities for people who are homeless and living with HIV-AIDS including prevention and support services are also funded through various non-profits. The city issues RFPs for the delivery of its residential rehabilitation and homeownership assistance programs. The community-based organizations that are selected to provide these services are designated as contractors and compensated on a fee-for-service basis.

Describe how the service delivery system including, but not limited to, the services listed above meet the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth)

Developing an effective and efficient program delivery system has been a priority for the city. While this system has been improved over the past few years, the city continues to monitor, assess, and seek ways to enhance its performance. Solid relationships have been built among the public agencies and non-profits that work with the city to implement these programs; and partners are encouraged to share their thoughts on how the delivery system and programs could work better.

The city’s strengths are of coordinating with other governments and agencies in the implementation of HUD and non-HUD funded programs and services. The DND is responsible for managing all HUD funds received by the city. The NRHA is responsible for managing HUD Section 8 funds, and the DHS and the OTEH are responsible for the TBRA HOME funding. The SVHC, a consortium of nearly all the homeless shelter providers and local government housing assistance agencies in the community including the CoC are equivalent, has been meeting over 20 years on a monthly basis to coordinate services for people who are low income and experiencing homelessness. It is a well developed system that works to efficiently provide services and address gaps in the service delivery system. The meetings allowed network members and other community agencies to coordinate planning efforts, address problems, cooperate in the delivery of services, collaborate on funding opportunities, and develop a service delivery system for the homeless population which incorporates the entire CoC components in most of the community’s homeless programs. The SVHC’s greatest need includes increasing the capacity of its housing first resources and services, particularly permanent housing; additional rapid re-housing and rental assistance options; the expanded availability of housing focused case management/housing stabilization services to fully utilize all housing resources and to broaden the effectiveness of homeless diversion efforts; and, expanded emergency housing resources to provide a safe and stable environment for households during the assessment and housing process.

Persons with HIV/AIDS: All services in our system are available to people who are experiencing homelessness. In addition, there is currently a wide array of services directed towards the needs of persons living with HIV/AIDS. Since there is a longstanding approach to serving the needs of people living with HIV/AIDS (PLWHA) community from a medical perspective, services for these clients become medically driven such as providing case management, primary care, pharmacology, treatment, and mental health services. The exception is the area of education and employment training. Often, those living with HIV/AIDS seek assistance when their condition has reached a high level of disability in which case it is much harder to find them steady employment.
The city has also been successful in addressing the needs of veterans experiencing homelessness. To reach this milestone the city brought together the resources of the local Veteran’s Administration Medical Center, the HUD-VASH program, non-profit partners implementing the Supportive Services for Veteran Families (SSVF) program, the CoC’s service coordination committees, the CoC’s lead agency, the city’s housing authority, other non-profit partners and the Office to End Homelessness. Working both within the CoC and collaboratively with neighboring CoC’s in the region, this veterans initiative was able to build a by-name list of homeless veterans which tracks a household from the time they are identified until they obtain permanent housing or exit the system.

**Describe the strengths and gaps of the service delivery system for special needs population and persons experiencing homelessness, including, but not limited to, the services listed above**

Overall, the City of Norfolk have excellent services and a service delivery system due to the professionalism and cooperation between and among service providers. Strategies to End Homelessness is recognized as one of the best CoC’s in the region. They are called upon to assist other CoC’s and speak at various conferences in an effort to share best practices.

**Homeless Population:** Since the implementation of the HEARTH Act, the CoC and the city have been re-tooling the homeless service system, developing a coordinated entry system using a common assessment form that ensures housing placements are made equitably based on the needs of household experiencing homelessness, rather than on where there might be an empty bed. In coordination with the ESG recipients the CoC’s service coordination process guarantees that all homeless households have the same access to programs and services regardless of where they enter the system. This system strength served as one of the catalysts which supported the city’s ability to meet the challenge to end veteran homelessness and has allowed local service providers to make strides in their efforts to reach the same goal for families with children, the chronically homeless and the general homeless population.

In recent years, the city has set forth in collaborating with other Hampton Roads cities to construct new permanent supportive housing. The Church Street Station project is estimate to begin construction over the 2016 summer and estimated to complete in 2017.

**Provide a summary of the strategy for overcoming gaps in the institutional structure and service delivery system for carrying out a strategy to address priority needs**

The city relies on a network of public sector, private sector, and non-profit agencies to implement the strategic plan. Over the next five years, the city expects to overcome gaps by providing: 1) Training and capacity building for non-profit organizations; 2) Monitor and identify weak links, improve program performance, and ensure compliance with applicable regulations; 3) Encourage collaboration among agencies to eliminate duplicative services to better serve residents, especially LMI households and special needs populations; and 4) Reallocate funding from low performing projects to support the development/expansion of best practice models.

| 6 | Public Facilities/ Site Improvements | The city plans to undertake public infrastructure projects including capital planning for infrastructure improvements that include improvements to buildings, parks and recreational facilities. In addition, the Department of Economic Development has applied for Section 108 loan authority of $19,000,000 to create a fund which will support real estate development in key communities as well as operating businesses. It is expected most, if not all, of the Section 108 loans will be lent in the 14 priority development areas (Broad Creek, Central Business Park, Church Street Triangle, Downtown, East Ocean View, Fort Norfolk, Hampton Boulevard, Little Creek, Military Circle, Newtown Road, Saint Paul’s Southside, Tidewater Drive South, and Wards Corner) and/or the six priority neighborhood districts (Berkley South, Chelsea, Downtown Arts Area, Five Points, Ocean View Avenue, Park Place/35th Street).

Additionally, for the operating businesses that will be considered for the Section 108 loans, priority will be given to those business or real estate development that target business in the City’s targeted industries clusters, including:
- Healthcare/Life Sciences
- Maritime. Supply Chain
- Defense/Cyberspace
- Innovation/Technology/Manufacturing
- Headquarters
- Policy Associations
- Creative/Artisanal/Films
- Retail
- Renewable Energy |
<p>| 7 | Homelessness                | Provide services for the HESG program that benefit those with street outreach, emergency shelter, homeless prevention and rapid re-housing as well as over ESG management and oversight costs. Over the next five year consolidated plan period, based on FY 2017 (PY 2016) HESG funding allocations, the city will receive and estimated amount totaling more than $1.61 million dollars towards providing direct services for the homeless and those at risk of becoming homeless. The HOME TBRA programs will receive an estimated $936 thousand towards assisting the homeless and those at-risk of becoming homeless. |</p>

Estimate the number of extremely low-income, low-income, and moderate-income families to whom the jurisdiction will provide affordable housing as defined by HOME 91.315(b)(2)

The City of Norfolk will assist over five years approximately 658,978 persons who are extremely low-income, low-income and moderate-income households who meet the existing HUD income limits. For Year 1 in particular, the city will provide for an estimated four (4) new and /or rehabilitated housing units through its CHDOs, providing 55* eligible first-time homebuyers direct financial assistance for homeownership acquisition, and providing 150 households with tenant-based rental assistance (TBRA) through the HOME program. During the Five-year Consolidated Plan, an estimated 100 low - to moderate-income households will be assisted through the above noted programs. *Projections based on FY 2016 Homebuyer Assistance funding and current program guidelines.
SP-50 Public Housing Accessibility and Involvement – 91.215(c)

Need to Increase the Number of Accessible Units (if Required by a Section 504 Voluntary Compliance Agreement)

The Norfolk Redevelopment and Housing Authority is not required to increase the number of accessible units per a Section 504 Voluntary Compliance Agreement. As major renovations are completed in public housing communities, a minimum of 5 percent of the units, as required by HUD, are made accessible. However, there are a large number of persons on NRHA’s transfer list for accessible units, particularly three bedrooms and larger.

Activities to Increase Resident Involvements

NRHA employs various strategies to promote public housing resident involvement in NRHA’s policy development and strategic decision-making processes. NRHA encourages residents to become involved through participation in Resident Councils, which operate at most public housing developments. NRHA staff provides technical assistance to Resident Council members and help to ensure that oversight is in place for annual election of officers.

Each Resident Council meets on a monthly basis to address general and property-specific issues. These meetings provide an opportunity for resident leaders to hear updates on major issues taking place at NRHA and within the affordable housing industry nationally. Time is allotted for resident leaders to raise issues or ask questions, which often become the basis for further dialogue. Discussions typically cover issues related to resident participation in governance, safety and security, community service requirements, summer programs, development plans, and job readiness.

Also, there is a Resident Advisory Board (RAB), representative of the population served by NRHA, consisting of public housing residents and housing choice voucher participants. The RAB meets during the annual plan process (about 5 months) to provide input on the plan submitted to HUD. In addition, if there are initiatives NRHA wish to undertake, the RAB convenes to provide input.

Lastly, a Resident Forum is held annually giving residents the opportunity to offer feedback and provide input into NRHA’s annual planning for public housing and housing choice voucher programs.

Is the public housing agency designated as troubled under 24 CFR part 902?

No

Plan to remove the ‘troubled’ designation

The Norfolk Redevelopment and Housing Authority is not designated as a troubled agency.
SP-55 Barriers to affordable housing – 91.215(h)

Barriers to Affordable Housing

Identified barriers to affordable housing include inadequate national funding for the Housing Choice Voucher Program, decreasing levels of Federal and state resources, HOME rule, and the cost and financing of housing stock maintenance.

There are a number of State and local regulations designed to promote the orderly development and maintenance of safe, decent and sanitary housing in the community. Sometimes these regulations can act as barriers to affordable housing. That does not appear to be the case in Norfolk.

To eliminate duplication, the city uses the building codes established by the State for uniform construction standards. These standards parallel the three National Code Standards and are minimum provisions to ensure general safety for the public. The State codes and guidelines are also appealable to the State. Consequently, the city’s building codes do not appear to hinder the development or preservation of affordable housing.

Also, the locally established Minimum Housing Code does not create a barrier for affordable housing. These standards parallel the National Minimum Housing Code Standards and are minimum requirements established to preserve and promote the public health, comfort, safety, personality and general welfare of the people. Their enforcement is necessary to preserve and encourage the private/public interests in housing and its maintenance. At the same time, these standards are appealable, locally, to ensure there are no undue hardships.

An examination of the community’s fee structure indicates the city’s building permit fees and charges are set at a median, as compared to surrounding Hampton Roads communities. In fact, in the case of new housing development, the city is currently subsidizing the cost of services because the cost to the city is greater than the development fees charged. The city’s positive, proactive position on housing development and preservation is further evidenced by its departmental restructuring to facilitate and better coordinate the development and housing process, as well as the substantial resources and technical assistance the city provides to the development and preservation of affordable housing.

The city’s zoning and land-use codes promote the morals, aesthetics, prosperity, health, safety and general welfare of all people in Norfolk. These codes are constructed to allow compatible development throughout the community and are flexible enough to encourage redevelopment in the community’s existing, established areas. These codes, like other local codes, are appealable locally to ensure equitable and fair treatment.

All residential properties are assessed on a citywide basis using market sales data of comparable properties in and around the immediate neighborhood. Citywide assessing appears to ensure an equitable treatment of residential property and provides an incentive to those who maintain and improve their properties.
Strategy to Remove or Ameliorate the Barriers to Affordable Housing

The city will continue its proactive position in regard to affordable housing by continuing to provide both financial and technical assistance to affordable housing activities and projects. The city is committed to the principle that all individuals should have available to them an equal opportunity for housing choices regardless of their race, color, religion, familial status, sex, national origin or handicap. The city will also continue to plan for and assemble vacant lots for the construction of new infill housing. The city also fosters and maintains its affordable housing stock through the code enforcement program, a systematic exterior inspection program targeted towards city’s Rehabilitation program; the housing rehabilitation grant program which provides low- to moderate-income homeowners assistance with addressing the orders through the code enforcement program. The CHDO Program which purchases and rehabilitates substandard housing or builds new houses on infill sites to provide affordable homeownership opportunities to eligible first-time homebuyers. The Homebuyer Assistance Program provides direct financial assistance to eligible first-time homebuyers for affordable homeownership acquisition. The city will also continue to monitor relevant public policies to ensure they do not change in such a manner as to constitute a barrier to affordable housing.
SP-60 Homelessness Strategy – 91.215(d)

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

The City of Norfolk provides outreach services through several different programs across departments that target people experiencing homelessness including those who are not sheltered and who are hard-to-serve and may need ongoing efforts to engage. The Office to End Homelessness (OTEH) initiates planned outreach activities that include visiting known locations where people experiencing homelessness tend to congregate/stay to attempt engagement and assessment of those encountered. Additionally, OTEH outreach staff respond to requests from other city departments (Police, Libraries, etc.) and the community at large to investigate areas that have been identified as possible sites where people who are homeless may be staying. OTEH also coordinates annual outreach events through Project Homeless Connect (PHC) drawing people experiencing homelessness to a centralized one-stop-shop for service delivery on a large scale.

The Norfolk Community Services Board (CSB) operates the Projects for Assistance in Transition from Homelessness (PATH) program. PATH provides outreach and assistance to adults with serious mental illness, with or without co-occurring substance use disorders, who are experiencing homelessness or who are at risk of becoming homeless. PATH services include community-based outreach, mental health, substance abuse, case management and other supportive services. PATH staff also provide outreach to the community at large to educate citizens about homelessness and mental health disorders.

The City of Norfolk’s Road2Home Program is a CSB initiative aimed at providing a comprehensive approach, including specialized outreach services, for assisting single adults who are chronically homeless and/or Veterans who have behavioral health issues and are homeless to access needed services and housing.

The City of Norfolk Department of Human Services (DHS) operates the Homeless Action Response Team (HART) does outreach to families experiencing homelessness who call in to the Housing Crisis Hotline and are referred to HART. Outreach workers provide direct support to the Hotline including a rapid and mobile response to families in immediate crisis.

All of these programs work collaboratively as part of the Norfolk Street Outreach Team. Team members communicate across disciplines to connect people to the most appropriate outreach program based on their needs and eligibility. Outreach workers assess needs utilizing a coordinated entry approach and common assessment tool (VI-SPDAT) and bring cases to the appropriate Services Coordination Committee for housing and services referrals.
Addressing the emergency and transitional housing needs of homeless persons

The Union Mission, a men’s and women’s shelter opened 365 days a year, increased its capacity to serve single adult men to 250 beds last year. In June 2016, Union Mission will operationalize its new Women’s and Family Shelter that will provide 70 beds for single adult women and seven units for families of various sizes utilizing a flexible space model. This added capacity will need to be analyzed over time to ascertain the impact on shelter needs in Norfolk. HART continues to successfully divert a significant number of referrals away from shelter and the city will continue to evaluate the need for any additional family units/beds. Low barrier shelter access for single adult men remains a challenge.

Transitional Housing Programs will need to be studied moving forward as the efficacy of this model is being scrutinized more closely from a funding standpoint. HUD did not fund a transitional housing program that had been serving single women and women with children in Norfolk in the 2015 competition. All existing transitional housing placements are secured through the SCC process or direct referrals from the Hotline.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.

An effective strategy to ensure that homeless households make the transition to permanent housing and independent living is prioritizing safe and stable housing and making affordable housing options more accessible to homeless households. Many homeless households that struggle to transition into permanent housing and independent living suffer from mental illness and substance addiction. Recent trends through homeless prevention, rapid re-housing programs and the Housing First model prioritize placing homeless individuals and families into permanent housing quickly, and linking them to supportive services in the community. This is accomplished by prioritizing cases and maintaining a housing registry through the SCC process. HMIS data and the housing registries are used to monitor the length of time individuals and families remain homeless and to inform decisions about future funding targets.

Accessibility to affordable housing is being addressed through a proposed partnership with the Norfolk Redevelopment and Housing Authority (NRHA). Through this initiative, NRHA agrees to set aside up to 20 percent of its Public Housing units and Housing Choice Vouchers to serve referrals from the SCC processes. While final details and approval are still being decided, it is believed that this partnership has the capacity to close the gap in affordable housing for many experiencing homelessness.
Help low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families who are likely to become homeless after being discharged from a publicly funded institution or system of care, or who are receiving assistance from public and private agencies that address housing, health, social services, employment, education or youth needs.

The City of Norfolk relies upon its prevention providers to identify risk factors through the analysis of Homeless Management Information System (HMIS) data for households that may become homeless and establishing priorities for assistance. This includes households with a prior history of homelessness. HART diverts households from entering shelter through the use of a Diversion Assessment. The Hotline connects households who are eligible to community-wide prevention programs to avert homelessness whenever possible.

Individuals or families who are connected to publicly funded systems of care and institutions are served primarily through the Department of Human Services and the CSB as well as the city’s non-profit partners. Agencies ensure that people are connected to benefits and entitlement programs for which they are eligible to lessen the impact of poverty to the greatest degree possible to reduce the likelihood of homeless episodes. Additionally, many agencies offer training and work programs to increase the likelihood of increasing household incomes.

The city continues to work with its partners on improving discharge planning from Foster Care, Hospitals, Mental Health and Correctional facilities. While there are protocols in place for these systems, it is imperative that the city remains vigilant to ensure that those procedures are implemented in an effective manner to avoid people “falling through the cracks”.
SP-65 Lead based paint Hazards – 91.215(i)

Actions to address LBP hazards and increase access to housing without LBP hazards

The City will ensure continued integration and coordination of its efforts in housing and public health programs. The City of Norfolk will collaborate with and work with the NRHA. The city assists through referrals from its Property Maintenance Code Enforcement program, CDBG Renovation Right Grant Program and Homebuyer Assistance programs.

The city anticipates to perform lead hazard control activities for a minimum of 100 housing units located in the City of Norfolk through July 2017. The city program addresses lead hazard control activities primarily for households with children under the age of six in owner-occupied homes, as well as renter-occupied homes with or without children under the age of six. Lead hazard control activities primarily include window replacement in homes funded with other resources. The city is currently training assessors in DND. Certified employees currently perform housing code enforcement inspections, work write ups and cost estimates for the city’s Home Rehabilitation Program. Inspectors also complete progress and financial inspections, as well as visual clearance inspections for all repair projects.

For FY 2017 the city will expand its efforts to identify lead-based paint hazards through implementation of a Homeowner’s Rehabilitation Loan Program, which is funded through the CDBG and HOME Program funds and will complete a Lead Risk Assessment for all homes funded with greater than $5,000 of CDBG and/or HOME Program funds, identify hazards, and implement interim controls or abatement of lead-based paint hazards consistent with program requirements. The city anticipates that an additional 10 homes will be lead-safe for low-income and moderate-income families.

How are the actions listed above related to the extent of lead poisoning and hazards?

For all structures constructed prior to 1978, all work performed on areas that potentially contain lead-based paint shall be tested for lead-based paint. If the lead-based paint is positively identified, treating or removing the lead-based paint in disturbed areas, including interim controls and lead-safe work practices, will be incorporated into the project as required by the amount of CDBG and/or HOME funding. CDBG funding may be used to rehabilitate the property depending upon the level of intervention required. If the homes are built prior to 1978 and the rehabilitation disturbs any lead surface, appropriate lead abatement techniques will be used.

The HOME TBRA programs require visual assessment for lead-based paint hazards as part of the housing inspection if the unit was built before 1978 and a child under the age of six lives in the unit. If a visual assessment reveals lead-based paint, the renter owner must complete paint stabilization, clean up, and clearance activities before allowing occupancy. Also, renters must sign a receipt that they received the “Protect Your Family From Lead in Your Home” brochure that is kept on file. The providers are required to inform the local health department about children at risk for lead-based paint poisoning.

How are the actions listed above integrated into housing policies and procedures?

The city’s CDBG and HOME program policies include provisions for compliance with applicable lead-based paint hazard regulations.
SP-70 Anti-Poverty Strategy – 91.215(j)

Jurisdiction Goals, Programs and Policies for reducing the number of Poverty-Level Families

The City of Norfolk utilizes approximately 15% allowable to fund public service activities, HOME and ESG funds and local resources to projects that will provide services to foster self-sufficiency and provide affordable housing opportunities and transitional shelter. The goal is to provide opportunities for Norfolk residents to realize a greater degree of economic stability and quality of life by participating in at least one of the following programs:

1. Sufficiency Programs

Family Sufficiency Programs: This program operated by NRHA combines case management, workforce development, credit repair, and homebuyer counseling with the provision of down payment and closing cost assistance from the establishment of personal escrow accounts that result from the reservation of increased rent payments resulting from resident income growth. Participants in the Family Self Sufficiency work towards setting and obtaining future life and career goals by accomplishing specific activities and objectives.

Norfolk Workforce Development Center (WDC): The WDC offers Norfolk residents’ convenient access to an array of job skills training and public benefits programs as well as access to several City of Norfolk and non-governmental partner agencies. Some of the services provided include:

- Virginia Initiative for Employment not Welfare (VIEW)
- Food Stamp Employment and Training Program (FSET)
- Volunteer Income Tax Assistance Site (VITA)

Permanent Supportive Housing Services: Various such as funded CoC, CDBG, and ESG agencies provide case management and after school tutoring to households with disabilities who are living in permanent supportive housing to help them overcome the educational and emotional barriers that prevent self-sufficiency created by the trauma of homelessness.

Transitional Housing Programs: Providers will provide transitional housing to approximately house single adult homeless individuals for up to two years. Each client served will receive case management to becoming independent by addressing substance abuse, recovery, education, employment, physical, and mental health issues, budgeting and life skills counseling.

2. Homeless Services

For FY 2017 the city will recommend a number of programs dedicated to serving the needs of the homeless populations. Each awarded agency will offer some level of supportive services to program participants. Housing stabilization services for existing housing assistance programs have been identified as a system’s level gap that will need to be addressed moving forward.
Services will range from family counseling to job skill development, all of which are intended to promote self-sufficiency and prevent a return to homelessness.

The Family Sufficiency Program operated by ForKids, Inc. provide an array of scattered-site, independent living arrangements for youth (16-21 years of age) at a time. The long-term goal is to teach the skills necessary to maintain housing and lead a responsible adult lifestyle. The program offers independent living skills training, education planning, individualized treatment planning and assessment, as well as weekly in-house group meetings for support and Family Self Sufficiency information.

How are the Jurisdiction poverty reducing goals, programs, and policies coordinated with this affordable housing plan

Although the mission is to meet the emergency needs of the homeless and at-risk households, it does provide a forum to discuss the many other objectives of its participating members which include measures to reduce poverty and provide affordable housing. The city has recognized the need for taking more coordinated and cooperative approach to addressing anti-poverty and affordable housing needs and policies are implemented in the daily work of DND and will remain. Another approach is the increased funding of the TBRA programs administered by the city as well as homebuyer programs administered by the Norfolk Redevelopment and Housing Authority (NRHA).
SP-80 Monitoring – 91.230

Describe the standards and procedures that the jurisdiction will use to monitor activities carried out in furtherance of the plan and will use to ensure long-term compliance with requirements of the programs involved, including minority business outreach and the comprehensive planning requirements

The City of Norfolk through the Department of Neighborhood Development (DND) will utilize the standards and procedures for monitoring CDBG, HOME and ESG subrecipients. The city will continue to use various administrative mechanisms to track and monitor the progress of HUD-funded projects that are under its control and jurisdiction. The goal is to ensure that consolidated plan related programs and activities are carried out in a timely manner in accordance with federal regulations and other statutory or regulatory requirements. The primary monitoring goals of the city is to provide technical assistance, identify deficiencies and promote corrections in order to improve, reinforce, or augment the City of Norfolk’s Consolidated Plan performance.

The city will monitor all CDBG, HOME and ESG subrecipient activities as required by HUD in accordance with the agreement between the agencies and the city, and as required by CDBG, HOME and ESG regulations. Subrecipients are required to submit program and financial reports to facilitate monitoring. Annual monitoring includes ensuring that the subrecipients comply with the terms of their agreements including income and client eligibility, reporting requirements and timeliness. Staff will utilize both “desk monitoring” and internal and/or on-site monitoring to assess the quality of the program performance over the duration of the agreement. Improvements to the monitoring systems and process occur on an ongoing basis.

Other efforts will include on-going communication with subrecipients through the provision of on-site technical assistance when requested. In addition, frequent contacts, written communications, analysis of reports and annual audits (where applicable) and administrative and environmental guidance by city staff will be made.

The Department of Neighborhood Development (DND) will continue to monitor its grant programs in accordance with local policies and procedures and federal regulations as well as reviews the annual single audit reports from its federal grant subrecipients. DND staff will continue to monitor its subrecipients of federal CDBG, HOME and ESG funds. The monitoring process will include on-and off-site reviews to ensure compliance with the goals and objectives of the program and federal regulations. The Department of Finance is tasked to manage the accounting system and the auditors review subrecipients performance data, contractual agreements, environmental reviews, annual single audit reports, etc.
Expected Resources

AP-15 Expected Resources – 91.220(c)(1,2)

Introduction

The city's FY 2017 (PY 2016) Entitlement Grant Funding and estimated program income amounts are provided below. The city assumed flat funding for FY 2017 (PY 2016) in determining the budget. From the FY 2016 (PY 2015) grant allocations, the city actually received a 2 percent increase in CDBG funding, an 8 percent decrease in HOME, and a 6 percent increase in ESG.

**Table 54 - Expected Resources – Priority Table**

**Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied**

The city regularly applies for competitive federal, state, and foundation grants when it meets the application criteria. These funds are used as leverage with local and other grant funds to create new and expand existing programs and services. However, the nature and amount of such funding is unknown at this time. Listed below are the various non-HUD resources the city uses to support community development, housing and a wide range of public service activities.
Federal Resources
- Low-Income Housing Tax Credits
- Economic Development Initiative
- Continuum of Care
- Medicaid
- Ryan White Title II
- Department of Transportation
- Section 8 Moderate Rehabilitation Program for Single Room Occupancy
- Environmental Protection Agency

State Resources
- Housing Trust Fund
- Weatherization Assistance Program
- Department of Health
- Single Room Occupancy Program
- Supportive Housing Program
- Department of Transportation

Local Resources
- Community-Based Organizations
- Community Housing Development Organizations
- Financial Institutions (lending and donations)
- Land Donations
- Department of Human Services
- Local charitable foundations and fundraising activities

Other Resources
- United Way/ FEMA, EFSP

In addition to the receipt of CDBG, HOME and ESG funds, the city anticipates receiving $25.7 million to be available over the next five years and combined with other public and private sector sources to address its priority needs.

The city encourages applicants to seek other funding and in-kind contributions from private and public sources to match city funding. Other things being equal, applications with greater matching sources will receive favorable consideration. Although specific matching requirements are not currently defined, the city may implement them in the future. The city prefers not to be the sole source of funding for a project or program. Eligible match sources include, but are not limited to, non-federal funds, tax credit proceeds, privately activity bonds, municipal General Fund monies, lending institutions, foundations, government entities (city or state), earned revenue, volunteer time, and in-kind donations. The city works with NRHA and HOME subrecipients to ensure the HOME match requirement is satisfied as well as works with its ESG subrecipients to satisfy is dollar-for dollar match requirement.
If appropriate, describe publically owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

The city will consider the use of publicly-owned land for the construction of affordable housing for low-to moderate-income households as well as provide vacant/undeveloped lots to CHDOs for new construction of affordable housing units on a case-by-case basis.

Discussion

Additional creativity, local funding and more partnerships are all necessary if we are to combine to achieve plan objectives, including the use of Low Income Housing Tax Credits (LIHTC) funds for larger development projects.

Table 56 – Project Information

Describe the reasons for allocation priorities and any obstacles to addressing underserved needs

The city developed its priorities and allocations based on input, discussions with stakeholders, citizens and the Community Assessment Survey. The city will continue to support non-profit agencies, homeless providers, local housing authority, and special needs groups to meet the needs of underserved persons throughout the community; however, the primary obstacle in meeting underserved needs remains the lack of funding. Federal and state and local funding simply isn't enough to meet demand. Over the past five years the city saw more than 18 percent and 50 percent reduction, respectively. Reductions in state aid to the city and the local budget have prohibited the city from being able to cover this funding gap, leaving many worthy and valuable programs unfunded and under-funded.

In addition to the projects listed above, the city will allocate funding that involves households that are cost burdened and severely cost burdened by placing priority on providing funds for housing rehabilitation, homeless assistance and services and affordable rental housing.

### Planned Activities
The city plans to allocate HOME CHDO funding to a certified CHDO organization for new construction, acquisition and/or rehabilitation of housing units. The CHDO will invest strategically in Norfolk neighborhoods in an effort for income qualified homebuyers in purchase a housing unit.

A location has not been defined yet; however, it is anticipated that the planned activity include selection of a developer for the two housing units, an execution of an agreement and begin site design during the program year.

AP-50 Geographic Distribution – 91.220(f)

Description of the geographic areas of the entitlement (including areas of low-income and minority concentration) where assistance will be directed

Low- and moderate-income families and individuals reside in communities throughout the City of Norfolk. Grants and other resources are geographically distributed throughout the city for community development and housing programs. All proposed Consolidated Plan activities are intended to primarily benefit populations that have special needs and citizens with low- and moderate-incomes. Assistance will be directed to areas of the city in which 51 percent or more of households are low- and moderate-income. The city certifies that 70 percent of all CDBG funds expended in FY 2017 (PY 2016) will be used for activities which benefit low- and moderate-income persons and special needs populations.

Table 57 - Geographic Distribution

Rationale for the priorities for allocating investments geographically

The city proposes to utilize its funding for Fiscal Year 2017 to finance a variety of capital improvement projects and economic development activities in order to target community areas of greatest need and significant potential for positive intervention. The majority of funding will be used towards homeowner rehabilitation, community infrastructure and economic development activities. In addition, the city will focus on funding community development activities including special needs targeting low-to moderate-income households that also include such needs as abused children, battered spouses, elderly persons, severely disabled adults, homeless persons, illiterate persons and people living with HIV/AIDS.

The FY 2017 strategy is to continue focusing resources on revitalization and other housing and community development needs in Norfolk’s communities due to high concentrations of poverty and blight. The city’s service delivery strategy focuses mainly in low- to moderate-income census tract areas. Revitalization funds will also be focused in business corridors of Norfolk.

Discussion

As the second largest city geographically and the largest city population wise in the Norfolk area since it is increasing difficult to spread diminishing resources across such a large area. The lack of land available
for building or existing structures available for rehabilitation within the City creates a serious barrier that needs to be worked around. The high cost of construction and land acquisition has demanded that the city collaborate with surrounding jurisdictions to create affordable housing to be shared by a formula for each jurisdiction base on the amount of development and maintenance funds placed into the project.
Affordable Housing

AP-55 Affordable Housing – 91.220(g)

Introduction

This section specifies the goals for the number of homeless, non-homeless, and special needs populations to be provided affordable housing and the number of affordable housing units supported by program type in FY 2017 (PY 2016) by July 1, 2016. To that end, the city projects to accomplish the following objectives to reduce the burden of housing costs and availability.

<table>

</tbody>
</table>

Table 59 - One Year Goals for Affordable Housing by Support Type

Discussion

The production is based on actual numbers from prior years and anticipated funding for the total allocation from HUD. The production of new units will be funded through the HOME Program. The rehabilitation of existing units will be funded through the CDBG Program.

Households by Population Type: Through the Low-Income Housing Trust Fund, the city projects it will support, 1,164 housing units targeted for the homeless population group. An additional 75 units targeted to seniors, people with disabilities and people living with HIV/AIDS will be assisted. Funding for affordable housing for non-homeless, low-income individuals will support 100 households.

Households by Program Type: Tenant-based rental assistance funded by HOME and ESG funds will assist approximately 175 households. HOME and CDBG funds will support construction of 4 housing units and rehabilitation of 100 housing units. The city is unable to determine if any acquisition units it will support.

Home Repair Program: The program will provide minor repairs, paint and accessibility and structure improvements to income-eligible homeowners as well reduce lead hazard in conjunction with ongoing housing rehabilitation projects.
AP-60 Public Housing – 91.220(h)

Introduction

In 2015, Norfolk Redevelopment and Housing Authority (NRHA), amended its current PHA Plan, which outlines the agency’s mission and strategic goals that will guide NRHA’s current and future work. NRHA continues to pursue and/or plan for future implementation of the Plan’s initiatives, which includes demolition and renovation in some communities.

Actions planned during the next year to address the needs to public housing

NRHA will continue with its commitment to provide affordable units throughout its public housing stock. In addition, NRHA will enable low-income households to choose their place of residence in the private market, further increasing housing opportunities for program participants by subsidizing a portion of the monthly rental obligation through the allocation of a Housing Choice Voucher (HCV) made directly to the landlord. In FY 2017, NRHA will continue to utilize Project Based Vouchers to expand affordable housing opportunities in particularly low poverty areas in the City. Approximately 100 Based Vouchers will be made available through a competitive bid process.

Actions to encourage public housing residents to become more involved in management and participate in homeownership

NRHA will continue to include residents in the planning and implementation of programs by working closely with the tenant organizations in each public housing community. Monthly meetings are held with the tenant organizations to keep them abreast of NRHA initiatives and to obtain their input and feedback. NRHA distributes a survey to each new public housing resident when they move in and when they move out. The purpose of the survey is to obtain feedback on the move in process and input on the services desired to assist residents in improving their quality of life while in public housing. The survey also assists in determining their level of customer satisfaction. An exit survey is conducted at move out to address any issues that may improve the process and/or how information is communicated.

The results of the surveys are used as measurements of NRHA’s strengths and deficiencies in its overall service delivery. NRHA will continue to utilize the Resident Advisory Board, which consists of residents of public housing and participants in the housing choice voucher program. As new initiatives and policies are developed, input from the Board will be sought. Overall, resident input will be incorporated into day-to-day operations and policies when feasible. Program descriptions for encouraging homeownership among public housing residents are provided in the ‘Discussion’ section.

If the PHA is designated as troubled, describe the manner in which financial assistance will be provided or other assistance

The public housing agency is not designated by HUD as “troubled” or performing poorly. Historically,
NRHA received the highest HUD ratings for property management and housing choice voucher programs. NRHA will continue to maintain its high performer status through ongoing monitoring and review of key property management indicators. The indicators are physical condition of communities, financial assessment, management operations, and capital fund.

**Discussion**
AP-65 Homeless and Other Special Needs Activities – 91.220(i)

Introduction

The city will receive an ESG allocation totaling $348,293 that will benefit the city’s population of homeless and those at-risk of becoming homeless. The city and its partners including the Office to End Homelessness, the Department of Human Services, and the Norfolk Community Services Board continue to make significant progress in implementing Norfolk’s original Blueprint to End Homelessness (“the Plan”). The three core tenets of the Plan are to:

- Prevent homelessness wherever possible;
- Rapidly re-house people when homelessness cannot be prevented; and
- Provide a wraparound services that promote housing stability and self-sufficiency.

The city joins the SVHC CoC’s vision to make homelessness “rare, brief and non-occurring”. The Plan originally called for a change from a shelter-based system, focused on temporary fixes; to a housing-first model emphasizing long-term living solutions for the literally homeless. To that end, Norfolk and its non-profit homeless provider partners have reduced the number of temporary shelter and transitional beds while significantly increasing the inventory of rapid re-housing, tenant-based rental assistance, permanent supportive housing and permanent housing slots.

Describe the jurisdictions one-year goals and actions for reducing and ending homelessness including

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

All agencies receiving funding through the U.S. Department of Housing and Urban Development’s (HUD) Continuum of Care (CoC) and the Emergency Solutions Grant (ESG) homeless assistance programs are required to have in place a coordinated process by which households experiencing homelessness are assessed and prioritized for homeless assistance. Reaching out to homeless persons, especially unsheltered persons, and assessing their individual needs. The estimated date for all activities will begin July 1, 2016 through June 30, 2017.

Outreach and Engagement: The city will utilize CDBG and ESG funds to support the work of the Norfolk Street Outreach Partnership. The Partnership targets unsheltered homeless individuals, including youth, chronically homeless, and veterans living on the street, connecting them to basic needs such as shelter, food, clothing and urgently needed addiction, medical and/or mental health services. The team also assesses the vulnerability of those they encounter and advocates for a permanent housing solution. - 455 individuals served.

Addressing the emergency shelter and transitional housing needs of homeless persons

Addressing the emergency shelter and transitional housing needs of homeless persons: In
coordination with the CoC and area homeless service providers, the emergency shelter component of the city’s network provides a safe platform for addressing the urgent housing needs of a household when a diversion strategy or a housing first placement is not immediately possible. Supported by the CDBG and ESG programs, the goal is to continue to reduce the average length of stay for a household in emergency shelter, while ensuring enough time is provided to allow a client to stabilize and be assessed and connected to long-term housing. - 555 individuals served.

**Transitional Housing:** While the city has joined the CoC in adopting the “housing first” model, the city also recognizes the value of continuing to support the operation of high performing transitional housing to focus on those households who require a more intensive service oriented program than rapid rehousing options traditionally can provide, but do not require the length of stay connected with permanent supportive housing--160 households served.

**Foodbank Food Supply:** As part of its emergency food program, the Foodbank of Southeastern Virginia provides food to shelters throughout the city to feed people who are homeless. Approximately seven shelters located within the city participate--200,000 individuals served.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again

Building on the successful coordination of the city’s and CoC’s resources Norfolk will utilize its funding to support the following approaches:

**Rapid Re-Housing Assistance:** Tenant-based rental assistance programs including Rapid Re-Housing and HOME-TBRA will be used to help households who have already fallen into homelessness be re-housed as quickly as possible by providing a security deposit and/or short-term rental assistance until sufficient income or a permanent tenant-based subsidy is in place--125 households will be served.

**Permanent Supportive Housing Services:** Virginia Supportive Housing (VSH) opened Crescent Square in Virginia Beach in March 2016 and is on target to complete the sixth regional Single Room Occupancy (SRO) apartment complex, Church Street Station in Norfolk late in 2017, adding 40 additional units for disabled and/or chronically homeless Norfolk residents.

**The Norfolk Community Services Board** was awarded a SAMSHA grant that will provide mental health and substance abuse case management and treatment services for people experiencing homelessness while re-housing them with existing rental subsidies or with subsidies provided through the grant.

**The Norfolk Redevelopment and Housing Authority** is proposing that a portion of the PH units
(approximately 80) and HCV vouchers (approximately 36) annually be targeted to homeless households in the agency’s FY 2017 plan—175 individuals served.

**Shelter Plus Care:** The city also offers rental subsidies paired with a range of supportive services to disabled homeless individuals or families, including chronically homeless. Services include case management, employment assistance, and counseling and substance use services—Planned Outcomes 2017 - 1,000 individuals served.

**Permanent Housing with Short-Term Supports:** This program model targets households that need short term assistance (up to 12 months) with supportive services to move them towards a goal of self-sufficiency. HOME funded TBRA continues to expand and is serving households with good outcomes—100 individuals served.

**Helping low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families and those who are:** being discharged from publicly funded institutions and systems of care (such as health care facilities, mental health facilities, foster care and other youth facilities, and corrections programs and institutions); or, receiving assistance from public or private agencies that address housing, health, social services, employment, education, or youth needs

The CoC, in coordination with regional efforts, emphasizes systems integration efforts that focus on appropriate discharge planning for special populations. The South Eastern Coalition is charged with addressing coordination between child-welfare, corrections, homeless providers and other relevant entities. Additionally, the Mayor’s and Chair’s Regional Taskforce on Homelessness convenes a group to improve systems coordination in these areas. The city’s HART Team through the Department of Human Services coordinates homeless prevention resources. These services contribute to homelessness prevention for low-income households.

**Homeless Prevention:** The city supports the HART Team works in coordination with the Regional Housing Crisis Hotline call center to conduct initial evaluations and referrals to available prevention assistance agencies, including the city’s Rental Assistance Program, to provide homeless prevention supportive services. 105 individuals served with ESG rental assistance; 75 individuals served with homeless prevention supportive services; 2,000 Norfolk individuals served by the Regional Housing Crisis Hotline.

**Community Service Centers:** Direct services are offered through various outside agencies where assessments, case management, counseling for victims of domestic violence, emergency food, transportation, and emergency rental and utility assistance are provided. Workforce services are co-located at various agencies as well as provides veterans employment assistance that helps veterans access a variety of benefit programs.

**Emergency Food Assistance for At-Risk Populations:** The city provides emergency food assistance for
at-risk populations using the Foodbank of Southeastern Virginia to increase the availability and accessibility of healthy and fresh food options to help at-risk residents meet their nutritional needs--75 agencies participate.

Discussion

Partner with market rental landlords and private homeowners in an effort to increase the supply of affordable rental units and single family homes for low income individuals and families with high housing barriers, ensure access to supportive services and mainstream resources that addresses poor credit and rental histories and advocate for housing developers to create more affordable housing for low income families.

Planned activities in this area include:

- Continue to fund Rapid Re-Housing Programs and provide training to providers;
- Develop unified policies and standards for homeless programs;
- Improve connections between Intake and homeless programs to reduce the number of households entering homelessness and reduce the length of time people experiencing homelessness;
- Continue to develop permanent supportive resources; and
- Improve the use of HMIS data to analyze performance and outcomes both at the continuum and provider level.
AP-75 Barriers to affordable housing – 91.220(j)

Introduction:

The barriers listed in the second question of this section still all exist but the real barriers that influence cities and developers from creating more affordable housing are three-fold before we even have a discussion about the areas outlined below. The three barriers are:

1. A lack of affordable or appropriate land, especially in an area that would meet the requirements for the integration of low-mod housing into market rate areas;
2. HUD and federal regulatory requirements no longer contained just within CPD;
3. Lack of reasonable, appropriate permanent financing beyond the highly competitive Low Income Housing Tax Credit (LIHTC) Program. Without LIHTC funds, most new construction projects have no hope of being funded.

Also, there is increased reliance on Project Based Vouchers from the Housing Choice Voucher program to subsidize the rents for the programs that work their way through all the regulatory requirements and get built. With the PIH funding streams now being called into account by Congress and the high cost of subsidy as home ownership decreases and reliance on rental housing increases along with higher rent rates because of the increased demand, even B and C level rental properties face rental gaps that put increasing pressure on subsidies. The increased subsidies combined with flat or lower HCV funding levels reduce the number of participants to be served.

Actions it planned to remove or ameliorate the negative effects of public policies that serve as barriers to affordable housing such as land use controls, tax policies affecting land, zoning ordinances, building codes, fees and charges, growth limitations, and policies affecting the return on residential investment

DND works with each developer on their project to guide them through the regulatory process of HUD and the local jurisdiction. This is increasingly difficult with reduced staff at the HUD level, the developer level and the department level. The city see one or two projects annually, which is a manageable level. However, the city continues to work to eliminate barriers that may limit the production of feasible affordable housing construction that are within the capacity of a local government to address. Foremost among these are zoning and land use regulations. Gap between supply and demand for rental housing in Norfolk continues to pose problems for Norfolk residents, particularly low-income households and persons with disabilities. Although the city and its partners administer a variety of affordable housing programs, getting the information to those who need the assistance can be challenging. The result is the potential for actual reduction of diversity in impacted neighborhoods, along with the concentration of poverty and segregation of persons in protected classifications within poorer neighborhoods. In order to reduce community tensions which may be exacerbated by race, class, and ethnic differences, the city is addressing these concerns in the following areas: 1) Continue to process and mediate fair housing choice complaints referred to Hampton Roads Community Housing Resource Board.
(HRCHRB). The HRCHRB will continue to review project marketing plans for compliance against the city’s Affirmatively Furthering Fair Housing Rule and will require outreach efforts; **2) NIMBY (Not in My Backyard) Opposition to Affordable Housing:** Community opposition (NIMBY) is still one of the greatest barriers to affordable housing in Norfolk. The city will continue to implement viable programs to promote affordable housing development in the community; **3) Lack of Funding for Affordable Housing:** The city during FY 2017 will coordinate housing rehabilitation for owner-occupied residences through a deferred payment loan program. Financial assistance is provided through due-on-transfer loans with no interest and no monthly payments. Unfortunately, the primary barriers to the production of affordable housing in Norfolk remain the high cost of construction and high property values. These are, for most part, beyond the control of the local jurisdiction. The repayment amount of the deferred payment loans is based on the increase in property value created by the repairs which becomes due upon transfer of property ownership. The owner only pays closing costs, which are usually in the range of about $300. A promissory note is secured by a recorded deed of trust (lien) for the amount of increase in the property’s value resulting from the repairs. For those who qualify, the city intends to offer Veterans and Senior Tax Relief programs and Tax Abatement Program; and lastly, **4) Lack of Supportive Services Matched with Housing:** The city will continue to monitor the changes in the mortgage industry to create opportunities to connect homeowners, particularly priority need owners, with available resources, counseling, and assistance. Historically, the HOME Program was a significant resource for addressing barriers to affordable housing. However, over the past Consolidated Plan period (2012 – 2016), funding has decreased by more than 70 percent. The HOME Program is utilized to create and maintain opportunities for low- and moderate-income households to secure affordable housing.

**Discussion:**

Affordable housing needs and lack of affordable land, lack of sustainable funding, increased building cost and large gaps between low- and moderate-income levels and Fair Market Rents create challenges that require creative solutions, constant collaboration among non-profits, state and federal agencies working toward a common goal with reduced staff sizes. This is not impossible but certainly challenging during this phase of affordable history.
AP-85 Other Actions – 91.220(k)

Introduction:

The City of Norfolk continues to invest federal funds for the FY 2017 (PY 2016) program year in projects and programs meeting the priority needs of the community. The priority needs include the need to renovate rental housing, renovate owner-occupied housing, provide public facility improvements and promote economic development activities. This section describes the planned actions the city will carry out to meet the strategies identified below.

Actions planned to address obstacles to meeting underserved needs

The city’s programs over the years have been heavily oriented toward fostering and maintaining affordable housing. Roughly 50 percent of the city’s annual CDBG and HOME funding goes toward housing. The city will maintain its efforts to rehabilitate owner dwelling units, provide rehabilitation towards rental units, and assist lower-income homebuyers to purchase affordable housing units. Over the past five years, CDBG Program funding saw reductions totaling more than $1.7 million, and the HOME program experienced reductions totaling $1.1 million dollars.

Even though the city received CDBG and HOME reductions in funding, the city will continue its efforts to foster and maintain affordable housing. The allocation of federal dollars is influenced by the availability of leveraged resources. As a result of these conditions, the city has shifted greater resources towards programs that assist existing housing stock, with particular attention to those programs serving homes falling into disrepair or presenting imminent hazards to residents.

The city will also continue its efforts in providing subsidy assistance for income-eligible residents under 30 percent AMI, and supporting the Supportive Housing Program (SHP) funding, in the provision of supportive services that aid in and help overcome obstacles to moving from homelessness or near homelessness to self-sufficiency. Addressing the lack of affordable rental units and homeownership opportunities through the Housing Trust Fund which will be used to support the development of quality housing for low- to moderate-income Norfolk residents.

Actions planned to foster and maintain affordable housing

The majority of the city’s housing resources, especially federal dollars, will work to expand the number of affordable units available across different types of markets, with special attention to renter populations at the lowest income levels and those that require supportive services.

The last few years have seen a shift from homeownership in Norfolk and across the country fueled by lending restrictions, credit ratings damaged during the economic crisis, and consumer perceptions that housing is not a safe investment. To rebuild homeownership markets, the city will partner with other community-based organizations to provide education and counseling for potential homebuyers. The city will continue to expand its post-purchase education efforts and will continue to fund programs that enable homeowners including those who may be underwater on their mortgages and stay in their homes.

The city will also begin its efforts with the Low-Income Housing Trust Fund, which will address the lack of
affordable rental units and homeownership opportunities that will be used to support the development of quality housing for low- to moderate-income Norfolk residents.

**Actions planned to reduce lead-based paint hazards**

The city will continue to prevent lead poisoning by maximizing the availability of affordable lead safe housing. The City of Norfolk and partnering agencies will work together to increase public awareness and knowledge about lead poisoning prevention in Norfolk. This includes lead-safe educational materials, in-home consultations, and other services to program participants.

Current lead-based paint rules require contractors performing renovation, repair and painting projects that disturb lead-based paint provide the ‘Renovate Right: Important Hazard Information for Families, Child Care Providers, and Schools’ lead hazard information pamphlet to owners and occupants of child care facilities and to parents and guardians of children under six that attend child care facilities built prior to 1978.

HUD promotes lead training whenever it is offered in Virginia. Both CDBG and HOME programs allow funds to be used to assist with the cost of lead-based paint removal activities, depending upon the type of activity being funded. For instance, once a home is selected for rehabilitation and the initial inspection reveals lead hazards, the rehabilitation plan for the structure is revised to include the necessary abatement. The current maximum amounts available for the Housing Rehabilitation Loan and Home Repair Grant are $25,000 and $10,000 respectively. These funds may be used to rehabilitate the property depending upon the level of intervention required.

The HOME TBRA programs requires a visual assessment for lead-based paint hazards as part of the housing inspection if the unit was built before 1978 and a child under the age of six years lives in the unit. If a visual assessment reveals lead-based paint, the rental owner must complete paint stabilization, clean up, and clearance activities before allowing occupancy. Any program participant whose unit was built prior to 1978 will also receive a brochure titled, “Protect Your Family from Lead in your Home.” Renters must sign a receipt for the brochure that is kept on file. The providers are required to inform the local health department about children at risk for lead-based paint poisoning.

**Actions planned to reduce the number of poverty-level families**

The City of Norfolk is dedicated to supporting a continuum of coordinated services to enhance the lives of Norfolk residents, particularly those in need, from birth through the senior years. The city works to promote the independence and well-being of individuals, support families and strengthen neighborhoods by providing direct assistance and administering resources to a network of community-based organizations, social service providers and institutions. The city will continue to use CDBG funding to provide services for low-income residents with the objective of providing basic needs and improving their quality of life and the quality of life for all citizens in the city. The city’s Human Services Grant (HSG) and other funding sources are used to support and address the critical and emergency human service
needs of low-income persons and families. The goal of the Human Service Grant funds is to provide or help individuals and households access services that support positive outcomes that promote and help self-sufficiency. Service programs are tailored to meet immediate, short-term, or long-term goals.

**Actions planned to develop institutional structure**

The City of Norfolk, through the Department of Neighborhood Development (DND), is the lead entity for implementing the FY 2016-FY 2017 First-Year Action Plan. DND works closely with other city government departments such as: Finance, Planning, Public Works, Economic Development, Budget, City Attorney, Police, Community Services Board, etc.

The city also works closely with community-based nonprofit organizations and community development corporations have made major contributions to neighborhood stability and growth, often by managing comprehensive, multi-strategy efforts that address not only housing development, but safety, education, health job skills and retail development. These established partners help implement housing-related programs and strategies that reflect neighborhood needs and culture. The city will continue to encourage private support of these organizations and provide direct support by funding a wide-ranging network of citywide and community-based agencies, as resources allow.

**Actions planned to enhance coordination between public and private housing and social service agencies**

The Norfolk Department of Neighborhood Development (DND) has a hand in creating and rehabilitating strong, healthy housing markets, and DND will continue to strengthen its relationships and coordinate activities with other city departments. In addition, the city will continue to enhance its relationships with partnering agencies by identifying areas of improvement and DND will continue streamlining services where possible as well as continue to improve the reimbursement process, monitoring report preparation, and reporting.

Most importantly would be the coordination of resources among active plans, and communication to all implementation partners involved, will provide opportunities for greater impact while reducing duplication of effort.

**Discussion:**

The longstanding policy of the city is to affirmatively further fair housing. To that end, the city is actively engaged in activities which promote fair housing and which facilitate handling of complaints as they arise. In 2012, in conjunction with its Five Year Consolidated Plan, the city commissioned an Analysis of Impediments (AI) to Fair Housing Choice. AI identifies impediments and offers recommendations that have become the city’s road map for action. The report offers a number of recommendations which the city continues to implement. The Impediments to Fair Housing report may be viewed on the city’s website at: http://www.norfolk.gov/index.aspx?NID=424.
Program Specific Requirements

AP-90 Program Specific Requirements – 91.220(l)(1,2,4)

Introduction:

This section describes specific HUD program requirements for the Community Development Block Grant (CDBG), HOME Investment Partnerships (HOME), and the Emergency Solutions Grant (ESG) programs.

Community Development Block Grant Program (CDBG)

Reference 24 CFR 91.220(l)(1)

Projects planned with all CDBG funds expected to be available during the year are identified in the Projects Table. The following identifies program income that is available for use that is included in projects to be carried out.

1. The total amount of program income that will have been received before the start of the next program year and that has not yet been reprogrammed
2. The amount of proceeds from section 108 loan guarantees that will be used during the year to address the priority needs and specific objectives identified in the grantee’s strategic plan.
3. The amount of surplus funds from urban renewal settlements
4. The amount of any grant funds returned to the line of credit for which the planned use has not been included in a prior statement or plan
5. The amount of income from float-funded activities

Total Program Income: 0

Other CDBG Requirements

1. The amount of urgent need activities
2. The estimated percentage of CDBG funds that will be used for activities that benefit persons of low and moderate income. Overall Benefit - A consecutive period of one, two or three years may be used to determine that a minimum overall benefit of 70% of CDBG funds is used to benefit persons of low and moderate income. Specify the years covered that include this Annual Action Plan. 100%

HOME Investment Partnership Program (HOME)

Reference 24 CFR 91.220(l)(2)

1. A description of other forms of investment being used beyond those identified in Section 92.205 is
as follows:

Refer to Appendix F for the HOME Resale Policy and Procedures attached.

2. A description of the guidelines that will be used for resale or recapture of HOME funds when used for homebuyer activities as required in 92.254, is as follows:

Refer to Appendix F for the HOME Resale Policy and Procedures attached.

3. A description of the guidelines for resale or recapture that ensures the affordability of units acquired with HOME funds? See 24 CFR 92.254(a)(4) are as follows:

Refer to Appendix F for the HOME Resale Policy and Procedures attached.

4. Plans for using HOME funds to refinance existing debt secured by multifamily housing that is rehabilitated with HOME funds along with a description of the refinancing guidelines required that will be used under 24 CFR 92.206(b), are as follows:

Refer to Appendix F for the HOME Resale Policy and Procedures attached.

**Emergency Solutions Grant (ESG)**

Reference 91.220(l)(4)

1. Include written standards for providing ESG assistance (may include as attachment)

Refer to Appendix E for the ESG Written Standards.

2. If the Continuum of Care has established centralized or coordinated assessment system that meets HUD requirements, describe that centralized or coordinated assessment system.

Tasked with developing, sustaining, and coordinating a comprehensive continuum of care of homeless services for the citizens of Southeastern Virginia, the SVHC includes more than 100 member agencies and individuals working to address homelessness across 1,700 square miles of land and six jurisdictions: Norfolk, Chesapeake, Suffolk, Franklin, Isle of Wight County, and Southampton County. All of these entities are committed to working together to engage individuals, groups, and organizations throughout the community, including faith partners and members of the private sector, providing services to persons experiencing homelessness or have an interest in the process. Although the 2011 merger resulted in an instantaneous improvement of the coordination of the region’s services including an enhancement of the area’s HMIS implementation and the more efficient allocation of available resources; the merger actually set the platform for the development of the current CoC wide-coordinated assessment process. Utilizing federal, state, local and private
resources the merged CoC eliminated existing barriers by establishing a “no wrong door” approach for its delivery system implementing a regional service coordination process for the placement of all persons into transitional, permanent and permanent supportive housing, while developing new housing options, a Regional Housing Crisis Hotline and implementing effective strategies to exceed the required performance criteria established under the HEARTH Act and end homelessness. The HEARTH Act requires performance criteria include measures to reduce the length of time individuals and families remain homeless, the rate of households returning to homelessness, the number of homeless individuals and families, and the number of homeless individuals and families who become homeless.

The HEARTH Act also requires continuums to take measures to encourage homeless people to participate in services and include all homeless people served in the homeless management information system (HMIS), while also working to promote jobs and income growth for homeless individuals and families. The City of Virginia Beach opened its Crescent Square Regional Apartments project in December 2015, which includes 10 units of PSH for single homeless adults in Norfolk with two designated units for chronically homeless individuals. City of Norfolk is waiting for the Church Street Station Apartments project development which is set to begin occupancy by early 2017. To stimulate the development of the fifth regional permanent supportive housing project aimed at serving the hardest to serve amongst the homeless single adult population, the city donated the tract of land for the 80 unit building and provided financial resources through its CDBG, HOME and locally funded Capital Improvement Program.

3. Identify the process for making sub-awards and describe how the ESG allocation available to private nonprofit organizations (including community and faith-based organizations).

The city utilizes the Request for Proposal process to allocate ESG funds. The city will ensure that all programs awarded meet the ESG categorical requirements. If the jurisdiction is unable to meet the homeless participation requirement in 24 CFR 576.405(a), the jurisdiction must specify its plan for reaching out to and consulting with homeless or formerly homeless individuals in considering policies and funding decisions regarding facilities and services funded under ESG. In January 2015, a Point-In-Time (PIT) Count was conducted.

The DND issues a request for proposal at a minimum of every two years for all of its homeless services for ESG and annually for CDBG and HOME. These services include emergency and interim shelter, outreach and engagement and specialized mental health and substance abuse services. DND recently issued within the last year an RFP for its mental program for the first time. Applications are evaluated by internal and external partners who are local experts on these program areas. DND utilizes standard selection criteria in its RFPs.

Grants are awarded for a one-year period with an option taken in FY 2016 to extend for up to one additional year for CDBG for FY 2017. The extension option is contingent upon successful performance of the program and services provided, and upon availability of funds.
The city advertises funding opportunities through local newspapers, posting on the City of Norfolk’s webpage, and provide open communication to our for-profit and non-profit organizations.

The City of Norfolk has administered ESG funds since the original program began in 1986. The process for making sub-awards was similar to that used over the last 25 years. Historically, the City publishes requests for ESG proposals in the late fall annually. Agencies submitting application(s) will be required to obtain a letter of support from the CoC endorsing the applicant’s proposed project. FY 2017 ESG Focus Group reviewed the FY 2016 awarded and vetted. In order to ensure compliance with HUD’s obligation period, the city will continue to request Council’s approval to obligate ESG funds by May of every year. The contracts will begin to be developed in July annually and executed within 60 days of HUD’s Annual Plan approval.

If religious organizations apply and receive ESG funds, the organization will provide all eligible activities under this program in a manner that is free from religious influence and in accordance with the following principles:

- It will not discriminate against any employee or applicant for employment on the basis of religion and will not limit employment or give preference in employment to persons on the basis of religion; and
- It will not discriminate against any person applying for shelter or any of the eligible activities under this part on the basis of religion and will not limit such housing or other eligible activities or give preference to persons on the basis of religion; and
- It will provide no religious instruction or counseling, conduct no religious worship or services; engage in no religious proselytizing, and exert no other religious influence in the provision of shelter and other eligible activities under this part. Applicants that are primarily religious organizations are encouraged to contact the city for specifics or refer to 24 CFR 576.23.

4. If the jurisdiction is unable to meet the homeless participation requirement in 24 CFR 576.405(a), the jurisdiction must specify its plan for reaching out to and consulting with homeless or formerly homeless individuals in considering policies and funding decisions regarding facilities and services funded under ESG.

Currently, one member of the Southeastern Coalition is a formerly homeless person. Their participation serves to inform the homeless perspective and to help the committee direct any changes in homeless policies. The Continuum of Care (CoC) and the City of Norfolk are working towards enhancing the input from homeless and formerly homeless participants that would include: appointing a homeless representative who understands the process annually to serve on the CoC Review Group, and receive input from the Community Services Board Consumer Advisory Committee.

5. Describe performance standards for evaluating ESG.

Performance measure for ESG activities by program model are listed below. Some performance measures are blank, because agencies negotiate the target with the Department of Neighborhood Development based on target population and program model.

Discussion:

CITIZEN PARTICIPATION PLAN

CITIZEN PARTICIPATION PLAN DESCRIPTIONS:

Section 1: Introduction

Section 2: Encouragement of Citizen Participation

Section 3: Development of the Consolidated and Annual Plan

Section 4: Anti-Displacement and Relocation Plan

Section 5: Public Hearings and Notices

Section 6: Assessment of Performance

Section 7: Amendments to the Consolidated or Annual Plans

Section 8: Technical Assistance

Section 9: Comments and Complaints

Section 10: Record Availability and Accessibility to the Public
CITIZEN PARTICIPATION PLAN

SECTION 1: INTRODUCTION

The Citizen Participation Plan sets forth the jurisdiction's policies and procedures for participation by the citizens of the City of Norfolk (“City”) in activities funded by three federal programs: the Community Development Block Grant ("CDBG"), the Home Investment Partnership ("HOME"), and the Emergency Solutions Grant ("ESG") Program.

SECTION 2: ENCOURAGEMENT OF CITIZEN PARTICIPATION

The City of Norfolk’s Department of Neighborhood Development (DND) is responsible for assuring that all citizen participation requirements under the federal guidelines are met in the development of the Citizen Participation Plan, the Consolidated Plan or Annual Plan, Substantial Amendments thereunto, and Performance Reports. The requirements are set forth in Title 24, Part 91.105, Citizen Participation Plan – Local Governments.

The City of Norfolk will:

- Provide for and encourage citizens to participate in the development of any consolidated or annual plan, any substantial amendment to the consolidated or annual plan, and the performance report.
- The city will especially encourage participation by low-to-moderate income persons, particularly those living in areas where CDBG funds are proposed to be used and residents of predominately low-to-moderate income neighborhoods.
- Take appropriate action to encourage participation of minorities, non-English speaking persons, and persons with disabilities.
- Encourage the participation of local and regional institutions including Norfolk Redevelopment and Housing Authority (NRHA), businesses, developers, nonprofit organizations, philanthropic organizations, and community-based and faith based organizations.
- Encourage, in conjunction with NRHA, the participation of residents of public and assisted housing developments.
- Explore alternative public involvement techniques and quantitative ways to measure efforts that encourage citizen participation.

SECTION 3: DEVELOPMENT OF THE CONSOLIDATED PLAN AND ANNUAL PLAN

At least 30 days prior to adoption of the Consolidated Plan or Annual Plan the city will make available to citizens, public agencies, and other interested parties a draft of these documents. The draft plan(s) will include:

- The anticipated amount of assistance the city expects to receive from the Community Development Block Grant (CDBG), HOME Investment Partnership Program (HOME) and Emergency Solutions Grants (ESG) including program income.
- The range of activities that may be undertaken, including the estimated amount that will benefit persons of low-to-moderate income.

The city will provide the opportunity for citizens, public agencies, and other interested parties to review and comment on the Draft Consolidated or Annual Plan by taking the following steps.
1. The city will publish a summary of the draft consolidated plan or annual plan in one or more newspapers of general circulation. This summary will describe the contents and purpose of the draft consolidated or annual plan and will include a list of the locations where copies of the entire draft plan(s) may be examined.

2. The city will make copies of the draft consolidated or annual plan available for examination at all Norfolk Library branches, at the Department of Neighborhood Development (DND), and on the City of Norfolk's DND webpage.

3. The city will consider all comments or views of citizens received in writing, or orally at the public hearings, in preparing the final Consolidated or Annual plan. A summary of these comments or views, and a summary of any comments or views not accepted and the reason therefore, shall be attached to the final Consolidated or Annual Plan.

4. After HUD approves the Consolidated or Annual Plan the city will make the document available to the public by posting the final plan on the city’s website: www.norfolk.gov.

SECTION 4: ANTI - DISPLACEMENT AND RELOCATION PLAN

The city will comply with the acquisition and relocation requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended and implement regulations at 49 CFR 24. All of the City of Norfolk’s Consolidated Plan activities are designed to eliminate (or minimize) the occurrence of displacement. Program guidelines and limitations are structured so that temporary displacement is unlikely.

If an involuntary displacement should occur, it is the City of Norfolk’s policy to provide housing referral assistance and, if required, make relocation payments in accordance with local, state and federal law.

SECTION 5: PUBLIC HEARINGS AND NOTICES

The City will conduct at least two public hearings per year to obtain citizen’s views and to respond to proposals and questions.

The first scheduled hearing shall occur at least 30 days prior to the issuance of the draft Consolidated or Annual Plan. The purpose of this hearing is to obtain the views of citizens on housing and community development needs (including priority non-housing community development needs) as well as the development of proposed activities and to discuss program performance.

The second public hearing will occur at least 30 days prior to adoption of the Consolidated or Annual Plan. This meeting will allow citizens, public agencies, and other interested parties to comment on the draft consolidated or annual plan.

Notice of the public hearings will be published in one or more newspapers of general circulation and on the city’s website. The city will seek to accommodate non-English speaking or hearing impaired citizens to the best of its ability upon advanced request of at least 10 days.

Public Hearings shall be held in the City Hall Building, City Council Chambers, and/or other facilities that are handicapped accessible and are centrally located.
SECTION 6: ASSESSMENT OF PERFORMANCE

At least 15 days prior to submitting the Consolidated Annual Performance Evaluation Report (CAPER) to HUD, the City of Norfolk will publish a notice of availability and opportunity to comment in a newspaper of general circulation.

The draft CAPER will be made available to citizens, public agencies, and other interested parties on the city’s website.

The city will consider all comments or views of citizens received in writing by the specified deadline in preparing the CAPER. A summary of these comments or views shall be attached to the final CAPER submitted to HUD. It is anticipated that the notice of availability and opportunity to comment will be published in the first or second week of September and the CAPER will be submitted to HUD not later than September 28th each year.

SECTION 7: AMENDMENTS TO THE CONSOLIDATED OR ANNUAL PLANS

A. Amendments in General

The city shall amend its approved Consolidated Plan or Annual Plan whenever it makes one of the following decisions as referenced in 24 CFR, Part 91.505, the city will officially amend its approved Consolidated Plan whenever it decides to pursue any of the following:

(1) To make a change in its allocation priorities or a change in the method of distribution of funds;

(2) To carry out an activity, using funds from any program covered by the Consolidated Plan (including program income), not previously described in the action plan portion of the Consolidated Plan; and

(3) To change the purpose, scope, location, or beneficiaries of an activity included in the annual action plan.

All amendments are limited to changes from one eligible activity to another and all proposed amendments must be reviewed and approved by an official representative of the city. All amendments will be made public and the city will notify HUD when an amendment has been made. Comments or views of citizens received in writing shall be considered during the amendment process and shall be attached to the amendment.

B. Substantial Amendment

A substantial amendment is any change in the use of CDBG funds from one eligible activity to another. When it has been determined that a substantial change must be made to the Consolidated Plan, it will be published for review in at least one newspaper of general circulation. Citizens will have a 30-day period to submit written responses. A summary of these comments and a summary of any comments or views not accepted will be attached to the substantial amendment.

Upon completion of the substantial amendment process, the city shall notify HUD that an amendment has been made. A copy of the amendment will be provided to the HUD office for the jurisdiction and shall include a transmittal letter signed by an official representative of the city.

SECTION 8: TECHNICAL ASSISTANCE

The city shall provide technical assistance to persons of low and moderate income that request such assistance in developing proposals for funding assistance under any of the programs covered by the
consolidated plan. The technical assistance shall consist of the provision of available and relevant information. Technical assistance will be provided for and arranged by the Department of Neighborhood Development, HUD Entitlement Unit, 810 Union Street, 401 Monticello Avenue, 1st Floor, Norfolk, VA 23510.

SECTION 9: COMMENTS AND COMPLAINTS

The City of Norfolk will consider any comments or views of citizens received in writing, or orally at public hearings, on the preparation of the Consolidated Plan, amendments to the Plan, and performance reports. A summary of all comments or views, as well as how they were addressed in the relevant document (or, if applicable, why they could not be accommodated), will be included in the final Consolidated Plan, amendments to the Plan, or performance reports.

With regard to citizen complaints, the city will make every reasonable effort to issue a written response to every written complaint or grievance within 15 working days of receipt. When this is not possible, the city shall, within 15 working days of receipt of a complaint, issue a letter indicating the status of the complaint review and the approximate anticipated date of a complete response.

SECTION 10: RECORD AVAILABILITY AND ACCESSIBILITY TO THE PUBLIC

Availability of Records

The adopted Consolidated Plans, Annual Action Plans, Substantial Amendments, and Performance Reports will be made available to the public, and upon request, in a form accessible to persons with disabilities and in a language that can be understood by non-English speaking persons, when requested.

The translation and/or modification of these documents will occur in as timely a manner as possible.
APPENDIX B

ADVERTISING INFORMATION
NOTICE OF PUBLIC COMMENT PERIOD

FIVE-YEAR (FY 2017-FY 2021) CONSOLIDATED PLAN,
STRATEGIC PLAN AND FY 2017 (FY 2016) ANNUAL
ACTION PLAN

The City of Norfolk’s Five-Year Consolidated Plan, Strategic Plan, and the FY 2017
(FY 2016) Annual Action Plan for the period of July 1, 2016 to June 30, 2017 will be
available for public review and comment from April 19, 2016 through May 19, 2016. This
Consolidated document reports on the following: Community Development Block Grant
Program; HOME Investment Partnership Program; and the Emergency Solutions Grant
Program. Copies of the report will be available for review at all Branch Libraries. All
comments should be addressed to the Department of Neighborhood Development,
401 Monticello Avenue, 1st Floor, Norfolk, VA 23510. Comments received after 12 noon
on Thursday, May 19, 2016 will be sent to the U.S. Department of Housing and Urban
Development (HUD). Alternate formats will be available for the visually impaired upon
request. For additional information or to make comments please contact the
Department of Neighborhood Development at (757) 664-4080 or email:
leila.larock@norfolk.gov. Office hours are 8:30 a.m. - 5:00 p.m. Monday - Friday.

The City of Norfolk does not discriminate on the basis of race, color, religion, sex,
handicap, familial status, or national origin in admission or access to, or treatment or
employment in, its federally assisted programs and activities. The City of Norfolk’s
Section 504 Coordinator is the Director of Human Services.

Marcus D. Jones
City Manager

APPENDIX E

ESG WRITTEN POLICY AND PROCEDURES
ESG Written Standards

Introduction: The city has developed standards for providing assistance with ESG funds as required by 24 CFR 576.400(e). These standards are in accordance with the ESG Program released by the HUD on December 4, 2011 and the final rule for the definition of homelessness also released by HUD on December 4, 2011. These initial standards have been created in coordination with the City of Norfolk's Continuum of Care (CoC) which includes connected Hampton Roads areas such as Virginia Beach, Portsmouth, and Chesapeake.

These standards represent goals for providing services for the community and the entire continuum, though it is expected that the standards will become more expansive as more experience and data is collected from services provided.

As noted by HUD, the development of comprehensive, coordinated, and effective policies and procedures is a process that takes a substantial amount of time and thought. Consequently, the city has established initial standards for ESG and will continue to develop and refine these standards in the Annual Action Plan as the city and CoC adapt and develop additional strategies for targeting resources and as new best practices are established. The city will ensure the following written standards required by HUD in the Interim Rule 575.400 Subpart E(e)2 are maintained or developed if needed to govern the new activity. The written standards will include:

- Standard policies and procedures for evaluating individuals and families eligible for assistance under ESG;
- Policies and procedures for admission, diversion, referral, and discharge by emergency shelters assisted under ESG, including standards regarding length of stay, and safeguards to meet the safety and shelter needs of special populations, e.g., victims of domestic violence, dating violence, sexual assault, and stalking and individuals and families who have the highest barriers to housing and are likely to be homeless the longest;
- Policies and procedures for assessing, prioritizing, and reassessing individuals' and families' needs for essential services related to emergency shelter;
- Policies and procedures for coordination among emergency shelter providers, essential services providers, homelessness prevention, and rapid re-housing assistance providers; other homeless assistance providers; and mainstream service and housing providers (see § 576.400(b) and (c)) for a list of programs with which ESG-funded activities must be coordinated and integrated to the maximum extent practicable);
- Policies and procedures for determining and prioritizing which eligible families and individuals will receive homelessness prevention assistance and which eligible families and individuals will receive rapid re-housing assistance;
- Standards for determining what percentage or amount of rent and utilities costs each program participant must pay while receiving homelessness prevention or rapid re-housing assistance;
- Standards for determining how long a particular program participant will be provided rental assistance and whether and how the amount of that assistance will be adjusted over time; and
- Standards for determining the type, amount, and duration of housing stabilization and/or relocation services to provide to a program participant, including the limits on the homelessness prevention or rapid re-housing assistance that each program participant may receive, such as the maximum amount of assistance, the maximum number of months the program participant...
received assistance; or the maximum number of times the program participant may receive assistance.

The city has proposed to work with the CoC to develop common forms, recordkeeping policies, and evaluation tools for the Homeless Prevention and Rapid Re-Housing Program (HPRP) in order to:

a. Enhance compliance amongst all HUD homeless funding streams;
b. Facilitate audits of ESG/CoC funded programs; and
c. Provide common outcome data and measurable results.

ESG standards have been scaled down in comparison to homeless prevention and rapid re-housing (HPRP) since ESG funding is significantly less than HPRP and requires greater targeting of homeless populations and services. These standards are not static and will be changed to address the current conditions of our community. It is imperative the city and CoC partners work together to establish policies, develop creative programming, and pursue funding sources to address the needs to transition populations from vulnerability to self-sufficiency.

Individuals and families may access ESG funding through one of the five methods listed below. The city, in partnership with a local providers such as Department of Human Services (DHS), The Planning Council and ForKids has implemented a Regional Housing Crisis Hotline for targeting referrals to one of the following five methodologies:

1. Connecting households with children to the case management, diversion services, prevention services or shelter/housing options offered through the city’s designated housing support service provider by directly linking them to NDHS’ HART program.
2. Receiving a referral to the city’s designated emergency housing or community based supportive service provider or other CoC participating agency which provides services to single adults or youth experiencing homelessness while residing in the City of Norfolk; or
3. Providing referrals to outreach services through the Norfolk Street Outreach Partnership which will connect clients to the resources they require through the CoC’s service coordination committees;
4. Providing referrals to a community service center which will connect clients to the resources they require through the CoC’s service coordination committees.
5. Providing a referral to a city designated homeless prevention provider.

Once connected these providers will complete the screening process by collecting information from the client. If eligibility is established then the case manager will determine if the client has accessed mainstream benefits, particularly public assistance benefits. Clients who have not accessed these benefits will be directed to apply for benefits as part of the process and the benefits will be assessed in the determination of the provision of ESG assistance.

Upon meeting with the case manager, clients will be required to complete a comprehensive client intake form, bring proof of benefits documentation, and other supporting documentation (i.e., income, lease, eviction notices, etc.) to verify housing status and client eligibility. For those who need assistance applying, staff will assist with this process. A common client intake form is available but will be modified to provide improved flow in the system. It will be further developed in coordination with the CoC.

The initial screening will determine:

1. If the combined household income is below 30 percent AMI and if the household has assets that exceed the program asset limit;
2. If the household’s living situation qualifies as either literally homeless or at imminent risk of homelessness; and
3. If households that qualify as at-risk of homelessness have one or more additional risk factors which make shelter entry more likely if not assisted. These factors include persons with eviction notices, currently living in a place they do not hold a lease, such as doubled up with family or friends, in a hotel/motel or in an institutional environment.

The initial screening also collects specific demographic information on the household (HMIS universal data elements), qualifies the household for other services, and gathers information on those seeking assistance for analysis and program refinement. Households determined initially eligible will receive a full assessment of housing barriers and household resources. Households may be screened out at this point if:

1. The household appears to have other resources and/or housing options to avoid homelessness; and/or
2. The household has very high or multiple barriers to re-housing and can be referred to another program that would be better suited over the long-term.

All ESG subrecipients will be provided with a set of written minimum standards in that would include, but are not limited to the following:

- Must follow the new definition of homelessness and serve only those meeting the definition of homeless;
- Programs only allow to serve those currently on the street or in emergency shelters;
- Must follow HUD income Criteria for the program (below 30 percent AMI);
- Clients should pay no more than 30 percent of their income towards their rent while in the program;
- Must meet with clients receiving assistance at least once per month;
- Must re-evaluate for continued assistance;
- No more than 24 months of assistance can be provided. Assistance should be determined by the case manager each month;
- Require participation in the HMIS;
- Housing Case Management must be focused to include:
  ✓ Monthly Case Management for re-evaluation of the need and level of services;
  ✓ Follow-up for clients exiting the program;
  ✓ Limits on the amount of financial assistance awarded to a client/household;
  ✓ Programs to provide shallow subsidies;
  ✓ Implementation of Housing First Model;
  ✓ Coordination with mainstream resources (i.e. TANF, Medicaid, Social Security through SOAR, VA (SSVF and HUD-VASH), etc.

The organization(s) selected to administer the city’s Rapid Re-Housing Program is expected to further develop written standards in conjunction with the CoC’s governing:

- Selection;
- Case management;
- Method of determining assistance levels;
- Method of determining terms of assistance;
- Follow-up policies and protocols; and
- Administrative procedures.
APPENDIX F

HOME RECAPTURE POLICY AND PROCEDURES
HOME RECAPTURE POLICY AND PROCEDURES

The City of Norfolk does not intend to use forms of investment other than those described in 24 CFR 92.205(b) or use HOME funds to refinance existing debt secured by multifamily housing that is being rehabilitated with HOME funds. The City plans to use HOME funds for homeownership in accordance to 24 CFR 92.254 and adopting the “reduction during affordability period” recapture option described in 24 CFR 92.254(a)(5)(ii)(Z). The following are key terms and conditions relating to Norfolk Redevelopment and Housing Authority’s administration of the HOME program as a subrecipient of the City:

Principal Residence: The Property purchased must be the principal residence of the borrower during the affordability period. The “borrower” is not allowed to temporarily sublease the “property.” With prior written approval from NRHA, an exception to the principal residence requirement can be made to military individuals/families required to temporarily move for deployment purposes only if the following are applicable:

- Borrower is deployed (as defined by the military). This exception for military families is not applicable to a change in military duty station, whether voluntary or involuntary.
- A copy of deployment order is provided to NRHA HOME Program.
- The property can either remain vacant or be temporarily rented to an income eligible household until the HOME-assisted owner returns from deployment.
- Income eligibility of the household renting must be determined by NRHA using the HOME Program Income Limits.
- The rent charged must not exceed the prevailing HUD Fair Market Rent for the unit size and must be approved by NRHA.
- The initial term of the temporary lease cannot exceed the initial term of the deployment order and any subsequent term of the temporary lease cannot exceed any subsequent term of the deployment order.
- A copy of the temporary lease agreement must be provided to the NRHA HOME Program.
- The deployed borrower(s) must notify the NRHA HOME Program in writing within 10 calendar days of returning from ordered deployment (if during the affordability period) and provide verification of principal residence.

Affordability Period: The Property occupied by the borrower must remain affordable for a specific period of time, depending on the level of HOME assistance provided to the borrower as a direct subsidy. The affordability period for the borrower’s direct subsidy HOME loan is as follows:

<table>
<thead>
<tr>
<th>HOME Assistance Provided Per Unit</th>
<th>Affordability Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less Than $15,000</td>
<td>5 Years</td>
</tr>
<tr>
<td>$15,000 - $40,000</td>
<td>10 Years</td>
</tr>
<tr>
<td>Greater Than $40,000</td>
<td>15 Years</td>
</tr>
</tbody>
</table>

Forgiveness Terms: The date of forgiveness shall begin on the date of closing. The direct subsidy HOME loan will be forgiven each annual anniversary date as follows:

ATTACHMENTS & APPENDICES
### HOME Assistance Provided Per Unit | Terms of Forgiveness
--- | ---
Less Than $15,000 | 5 Years @ 20% Per Year
$15,000 - $40,000 | 10 Years @ 10% Per Year
Greater Than $40,000 | 15 Years @ 6.67% Per Year

**Recapture Restrictions:** In the event the property does not continue to be the principal residence of the borrower for the duration of the affordability period due to the borrower either selling, permanently vacating or transferring the property voluntarily or involuntarily, the amount of HOME assistance provided to the borrower as direct subsidy will be recaptured on a prorated basis according to the time the borrower has owned and occupied the property measured against the required affordability period. Direct subsidy includes down payment, closing cost, interest subsidies, any assistance that reduced the purchase price from fair market value to an affordable price, or other HOME assistance provided that enabled the borrower to purchase the property. In the event of a voluntary or involuntary sale of the property during the affordability period, the direct subsidy will be recaptured from available net proceeds; therefore, the prorated amount recaptured will not exceed what is available from net proceeds and NRHA shall forgive repayment of any direct subsidy HOME loan amount in excess of the net proceeds. Net proceeds are defined as sales price minus (a) the payoff of superior loans and/or other amounts; and (2) closing costs.

To preserve the affordability of the property in the event the property is sold or transferred voluntarily or involuntarily during the affordability period, NRHA or an eligible Community Housing Development Organization (CHDO) will have a purchase option, right of first refusal, or other preemptive right to purchase the property within 45 days of NRHA receiving from the borrower either a written notice that the property will be sold, written notice of a deed-in-lieu of foreclosure or a written notification of foreclosure. If NRHA or an eligible CHDO purchases the property, the property will be sold to an income eligible family in a reasonable period of time following the purchase. If NRHA or an eligible CHDO choose not to purchase the property, the borrower has the option to sell to any willing buyer with no restriction on the resale price or on the income of the new homebuyer.

A subsequent homebuyer of the Property determined income eligible for HOME assistance may assume the borrower’s existing direct subsidy HOME loan (subject to the loan’s principal residence requirement, affordability period and recapture requirements) provided that no additional HOME assistance is provided. In the event a subsequent homebuyer of the Property determined income eligible for HOME assistance needs a direct subsidy HOME loan in excess of the balance owed on the borrower’s HOME loan, the balance owed cannot be assumed and will be recaptured from the borrower and a separate direct subsidy HOME loan will be provided to the subsequent homebuyer with a new affordability period based on the amount of direct subsidy provided.
Refinancing Restrictions: During the affordability period, the borrower is not permitted to refinance the property without specific written permission from NRHA. NRHA will allow the subordination of its lien interest only for the sole purpose of the “borrower” refinancing for a first mortgage interest rate reduction, resulting in a monthly principal and interest payment reduction, and not for the purpose of removing cash or equity from the property proceeds. The borrower must make payable to NRHA the unforgiven amount of the principal balance of the Note, in accordance with the forgiveness terms and recapture restrictions, at the time of refinancing if cash or equity is removed.

Foreclosures: The borrower must immediately send NRHA any and all notices regarding a foreclosure or a deed-in-lieu of foreclosure to: Norfolk Redevelopment & Housing Authority, ATTN: HOME Program for Homebuyers, P.O. Box 968, Norfolk, VA 23501. Within 45 days of NRHA receiving any such notice from the borrower, NRHA or an eligible CHDO will have a purchase option, right of first refusal, or other preemptive right to purchase the property prior to foreclosure or deed-in-lieu of foreclosure in order to preserve affordability of the property. In the event NRHA or an eligible CHDO choose not to purchase the property and ownership of the property transfers pursuant to a foreclosure or deed-in-lieu of foreclosure, NRHA will recapture any net proceeds that may be available from the foreclosure or deed-in-lieu of foreclosure. In the event of foreclosure, deed-in-lieu of foreclosure or assignment of the first mortgage to the Secretary of Housing and Urban Development, all restrictions of borrower’s direct subsidy HOME loan shall be negated with no further force or effect and any subsequent person or entity receiving title to the Property shall receive title free and clear from the restrictions of the borrower’s direct subsidy HOME loan.

Enforcement of Recapturing Direct Subsidy HOME Loans: Each applicant, co-applicant and/or spouse is required to sign a “HOME Program Application” and “Defined Rules & Restrictions of Borrowed HOME Program Funds” which outlines the guidelines of the Principal Residence Requirement, Affordability Period, Forgiveness Terms, Recapture Restrictions, Refinance Restrictions and Foreclosures. Each borrower receiving a direct subsidy HOME loan will be required to sign a Home Investment Partnership Program Promissory Note and Deed of Trust on the Date of Settlement. The Home Investment Partnership Program Deed of Trust is recorded with the City of Norfolk’s Circuit Court as a second lien to cover a Home Investment Partnership Promissory Note which contains language setting forth Principal Residence Requirement, Affordability Period, Forgiveness Terms, Recapture Restrictions, Refinance Restrictions and Foreclosures.

In addition to the above documents, before or at the time of the sale NRHA will prepare a HOME written agreement that NRHA and the City of Norfolk will execute with the borrower(s) of the direct subsidy HOME loan. The HOME written agreement is a separate legal document apart from any loan instrument which clearly outlines requirements of the direct subsidy HOME loan regarding the Principal Residence Requirement, Affordability Period, Forgiveness Terms, Recapture Restrictions, Refinance Restrictions and Foreclosures.

CONPLAN COMMUNITY SURVEY ASSESSMENT FOR PUBLIC AGENCIES AND RESIDENTS
Five - Year Consolidated Plan Development
FY 2017 – FY 2022
Community Needs Survey from
Residents and Public Agencies

The City of Norfolk is in the process of developing a new Consolidated Plan for the use of entitlement funding made available by the U.S. Department of Housing and Urban Development (HUD). The Plan will cover fiscal years 2017 through 2022 and will identify the city’s priorities for allocating these federal grant funds to address residents’ and public agencies’ needs under the Community Development Block Grant, HOME Investment Partnership Program and the Emergency Solutions Grant Program.

The Consolidated Plan, as required by HUD, is an important policy document. It sets forth both housing and community development needs and establishes strategies for meeting identified needs, consistent with available funding resources.

Please provide your perception of critical needs in the community by completing the ConPlan Survey for either public agencies and/or Norfolk residents. In addition, we would like to gain an understanding of Norfolk agencies and the supportive role they play in the community. Use the links below to access either Resident and/or Resident Survey or you may utilize the surveys located here on Norfolk’s Webpage at http://www.norfolk.gov/index.aspx?

Norfolk Resident Survey: https://www.surveymonkey.com/r/J3jNjTH
Public Agency Survey: https://www.surveymonkey.com/r/KCos9TS

Paper surveys will be made available by request. Please call 757-664-4775 for more information.

Consolidated Plan NORFOLK

OMB Control No: 2506-0117 (exp. 07/31/2015)
CERTIFICATIONS

In accordance with the applicable statutes and the regulations governing the consolidated plan regulations, the jurisdiction certifies that:

Affirmatively Further Fair Housing -- The jurisdiction will affirmatively further fair housing, which means it will conduct an analysis of impediments to fair housing choice within the jurisdiction, take appropriate actions to overcome the effects of any impediments identified through that analysis, and maintain records reflecting that analysis and actions in this regard.

Anti-displacement and Relocation Plan -- It will comply with the acquisition and relocation requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, and implementing regulations at 49 CFR 24; and it has in effect and is following a residential anti-displacement and relocation assistance plan required under section 104(d) of the Housing and Community Development Act of 1974, as amended, in connection with any activity assisted with funding under the CDBG or HOME programs.

Anti-Lobbying -- To the best of the jurisdiction's knowledge and belief:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of it, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement;

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, it will complete and submit Standard Form-115, "Disclosure Form to Report Lobbying," in accordance with its instructions; and

3. It will require that the language of paragraph 1 and 2 of this anti-lobbying certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

Authority of Jurisdiction -- The consolidated plan is authorized under State and local law (as applicable) and the jurisdiction possesses the legal authority to carry out the programs for which it is seeking funding, in accordance with applicable HUD regulations.

Consistency with Plan -- The housing activities to be undertaken with CDBG, HOME, ESG, and HOPWA funds are consistent with the strategic plan.

Section 3 -- It will comply with section 3 of the Housing and Urban Development Act of 1968, and implementing regulations at 24 CFR Part 135.

[Signature/Authorized Official] [Date]
Specific CDBG Certifications

The Entitlement Community certifies that:

Citizen Participation -- it is in full compliance and following a detailed citizen participation plan that satisfies the requirements of 24 CFR 91.105.

Community Development Plan -- its consolidated housing and community development plan identifies community development and housing needs and specifies both short-term and long-term community development objectives that provide decent housing, expand economic opportunities primarily for persons of low and moderate income. (See CFR 24 576.2 and CFR 24 part 570)

Following a Plan -- It is following a current consolidated plan (or Comprehensive Housing Affordability Strategy) that has been approved by HUD.

Use of Funds -- it has complied with the following criteria:

1. Maximum Feasible Priority. With respect to activities expected to be assisted with CDBG funds, it certifies that it has developed its Action Plan so as to give maximum feasible priority to activities which benefit low and moderate income families or aid in the prevention or elimination of slums or blight. The Action Plan may also include activities which the grantee certifies are designed to meet other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community, and other financial resources are not available.

2. Overall Benefits. The aggregate use of CDBG funds including section 108 guaranteed loans during program year(s) shall fully benefit persons of low and moderate income in a manner that ensures that at least 70 percent of the amount is expanded for activities that benefit such persons during the designated period.

3. Special Assessments. It will not attempt to recover any capital costs of public improvements assisted with CDBG funds including Section 108 loans guaranteed by assessing any amount against properties owned and occupied by persons of low and moderate income, including any fee charged or assessment made as a condition of obtaining access to such public improvements.

However, if CDBG funds are used to pay the proportion of a fee or assessment that relates to the capital costs of public improvements (assisted in part with CDBG funds) financed from other revenue sources, an assessment or charge may be made against the property with respect to the public improvements financed by such other source other than CDBG funds. Also, in the case of properties owned and occupied by moderate-income (not low-income) families, an assessment or charge may be made against the property for public improvements financed by a source other than CDBG funds if the jurisdiction certifies that it lacks CDBG funds to cover the assessment.

Excessive Force -- It has adopted and is enforcing:

1. A policy prohibiting the use of excessive force by law enforcement agencies within its
jurisdiction against any individuals engaged in non-violent civil rights demonstrations; and

2. A policy of enforcing applicable State and local laws against physically barring entrance to or exit from a facility or location which is the subject of such non-violent civil rights demonstrations within its jurisdiction;

Compliance With Anti-discrimination laws – The grant will be conducted and administered in conformity with title VI of the Civil Rights Act of 1964 (42 USC 2000d), the Fair Housing Act (42 USC 3601-3619), and implementing regulations.

Lead-Based Paint -- Its activities concerning lead-based paint will comply with the requirements of 2 CER Part 35, subparts A, B, J, K and R;

Compliance with Laws -- It will comply with applicable laws.

City Manager
Title
OPTIONAL CERTIFICATION
CDBG

Submit the following certification only when one or more of the activities in the action plan are designed to meet other community development needs having a particular urgency as specified in 24 CFR 570.208(c):

The grantee hereby certifies that the Annual Plan includes one or more specifically identified CDBG-assisted activities which are designed to meet other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community and other financial resources are not available to meet such needs.

City Manager
Title
Specific HOME Certifications

The HOME participating jurisdiction certifies that:

Tenant Based Rental Assistance -- If the participating jurisdiction intends to provide tenant-based rental assistance:

The use of HOME funds for tenant-based rental assistance is an essential element of the participating jurisdiction's consolidated plan for expanding the supply, affordability, and availability of decent, safe, sanitary, and affordable housing.

Eligible Activities and Costs -- It is using and will use HOME funds for eligible activities and costs, as described in 24 CFR § 92.205 through 92.209 and that it is not using and will not use HOME funds for prohibited activities, as described in § 92.214.

Appropriate Financial Assistance -- Before committing any funds to a project, it will evaluate the project in accordance with the guidelines that it adopts for this purpose and will not invest any more HOME funds in combination with other Federal assistance than is necessary to provide affordable housing.

[Signature] [Date]

Authorize Official
ESG Certifications

The Emergency Solutions Grants Program Recipient certifies that:

Major rehabilitation/conversion – If an emergency shelter’s rehabilitation costs exceed 75 percent of the value of the building before rehabilitation, the jurisdiction will maintain the building as a shelter for homeless individuals and families for a minimum of 10 years after the date the building is first occupied by a homeless individual or family after the completed rehabilitation. If the cost to convert a building into an emergency shelter exceeds 25 percent of the value of the building after conversion, the jurisdiction will maintain the building as a shelter for homeless individuals and families for a minimum of 10 years after the date the building is first occupied by a homeless individual or family after the completed conversion. In all other cases where ESG funds are used for renovation, the jurisdiction will maintain the building as a shelter for homeless individuals and families for a minimum of 3 years after the date the building is first occupied by a homeless individual or family after the completed renovation.

Essential Services and Operating Costs – In the case of assistance involving shelter operations or essential services related to street outreach or emergency shelter, the jurisdiction will provide services or shelter to homeless individuals and families for the period during which the ESG assistance is provided, without regard to a particular site or structure, so long the jurisdiction serves the same type of persons (e.g., families with children, unaccompanied youth, disabled individuals, or victims of domestic violence) or persons in the same geographic area.

Renovation – Any renovation carried out with ESG assistance shall be sufficient to ensure that the building involved is safe and sanitary.

Supportive Services – The jurisdiction will assist homeless individuals in obtaining permanent housing, appropriate supportive services (including medical and mental health treatment, victim services, counseling, supervision, and other services essential for achieving independent living), and other Federal State, local, and private assistance available for such individuals.

Matching Funds – The jurisdiction will obtain matching amounts required under 24 CFR 576.201.

Confidentiality – The jurisdiction has established and is implementing procedures to ensure the confidentiality of records pertaining to any individual provided family violence prevention or treatment services under any project assisted under the ESG program, including protection against the release of the address or location of any family violence shelter project, except with the written authorization of the person responsible for the operation of that shelter.

Homeless Persons Involvement – To the maximum extent practicable, the jurisdiction will involve, through employment, volunteer services, or otherwise, homeless individuals and families in constructing, renovating, maintaining, and operating facilities assisted under the ESG program, in providing services assisted under the ESG program, and in providing services for occupants of facilities assisted under the program.

Consolidated Plan – All activities the jurisdiction undertakes with assistance under ESG are consistent with the jurisdiction’s consolidated plan.

Discharge Policy – The jurisdiction will establish and implement, to the maximum extent practicable and where appropriate policies and protocols for the discharge of persons from
publicly funded institutions or systems of care (such as health care facilities, mental health facilities, foster care or other youth facilities, or correction programs and institutions) in order to prevent this discharge from immediately resulting in homelessness for these persons.

APPENDIX TO CERTIFICATIONS

INSTRUCTIONS CONCERNING LOBBYING AND DRUG-FREE WORKPLACE REQUIREMENTS:

A. Lobbying Certification

This certification is a material representation of facts upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or continuing this transaction imposed by section 1492, title 11, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

B. Drug-Free Workplace Certification

1. By signing and/or submitting this application or grant agreement, the grantee is providing the certification.

2. The certification is a material representation of fact upon which reliance is placed when the agency awards the grant. If it is later determined that the grantee knowingly rendered a false certification, or otherwise violates the requirements of the Drug-Free Workplace Act, HUD, in addition to any other remedies available to the Federal Government, may take such action authorized under the Drug-Free Workplace Act.

3. Workplaces under grants, for grantees other than individuals, need not be identified on the certification. If known, they may be identified in the grant application. If the grantee does not identify the workplaces at the time of application, or upon award, if there is no application, the grantee must keep the identity of the workplace(s) on file in its office and make the information available for Federal inspection. Failure to identify all known workplaces constitutes a violation of the grantee's drug-free workplace requirements.

4. Workplace identifications must include the notional address of buildings (or parts of buildings) or other sites where work under the grant takes place. Categorical descriptions may be used (e.g., all vehicles of a mass transit authority or State highway department while in operation, State employers in each local unemployment office, persons in current public or public assistance employees).

5. If the workplace identified to the agency changes during the performance of the grant, the grantee shall inform the agency of the change(s), if it previously identified the workplace in question (see paragraph three).

6. The grantee may insert in the space provided below the site(s) for the performance of work done in connection with the specific grant:
This information with regard to the drug-free workplace is required by 26 CFR part 21.

7. Definitions of terms in the Nonprofit Arsenic and Tobacco Use and Drug-Free Workplace programs are as follows:

"Controlled substance" means a controlled substance as defined in Schedule I, II, or III of the Controlled Substances Act (21 U.S.C. 812) and as further defined by regulation (21 CFR 1308.11 through 1308.15);

"Conviction" means a finding of guilt (including a plea of nolo contendere) or imposition of sentence, or both, by any judicial body charged with the responsibility to determine violations of the Federal or State criminal drug statute;

"Criminal drug statute" means a Federal or State criminal statute involving the manufacture, distribution, dispensing, use, or possession of any controlled substance;

"Employee" means the employee of a grantee directly engaged in the performance of work under a grant, including: (i) All "direct change" employees; (ii) all "indirect change" employees unless their impact or involvement is insignificant to the performance of the grant; and (iii) temporary personnel and consultants who are directly engaged in the performance of work under the grant and who are on the grantee’s payroll. This definition does not include workers not on the payroll of the grantee (e.g., volunteers, even if used to meet a matching requirement; consultants or independent contractors not on the grantee’s payroll; or employees of subrecipients or subcontractors in covered workplaces).
## Application for Federal Assistance SF-424

**1. Type of Applicant:** Select Applicant Type:
- City or Township Government
- Other (specify)

One CPD Response to City of Norfolk’s Funding Project Explanation
Ask A Question

Thank you for submitting a question to HUD Exchange Ask A Question.

This question has been answered, and the response to your question is below.

Answer from Kathleen Snavley of 662106-1984 (ST)
I am trying to fund our FY 2017 (PT 2016) Activities for our CDBG, HOME, and ESG programs. However, the funding is not available for FY 2016. Why is this?

Thank you.

Response

Hello Kathleen:

Thank you for your inquiry.

The City's HUD grant programs (CDBG, HOME, and ESG) begin on FY 2016, but the grant funds will not display in ESG 0f 19 until 1) the City has exhausted the grant agreements with HUD, and 2) the grants are loaded into the system. This may be several months after the beginning of the program year.

It is recommended that you contact your HUD Field Office Representative for more information.

Please submit a new inquiry to the HUD Exchange Ask A Question for additional assistance.

Thank you.

SF 424 HUD Submission Version Page 2 Version 2.0
CERTIFICATIONS

In accordance with the applicable statutes and the regulations governing the consolidated plan regulations, the jurisdiction certifies that:

Affirmatively Further Fair Housing -- The jurisdiction will affirmatively further fair housing, which means it will conduct an analysis of impediments to fair housing choice within the jurisdiction, take appropriate actions to overcome the effects of any impediments identified through that analysis, and maintain records reflecting that analysis and actions in this regard.

Anti-displacement and Relocation Plan -- It will comply with the acquisition and relocation requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, and implementing regulations at 49 CFR 23; and it has in effect and is following a residential anti-displacement and relocation assistance plan required under section 108(d) of the Housing and Community Development Act of 1974, as amended, in connection with any activity assisted with funding under the CDBG or HOME programs.

Anti-Lobbying -- To the best of the jurisdiction's knowledge and belief:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of it, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, or an officer or employee of Congress, or an employee of a Member of Congress in connection with the making of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement;

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, it will complete and submit Standard Form 115, "Disclosure Form to Report Lobbying," in accordance with its instructions; and

3. It will require that the language of paragraph 1 and 2 of this anti-lobbying certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipient shall certify and disclose accordingly.

Authority of Jurisdiction -- The consolidated plan is authorized under State and local law (as applicable) and the jurisdiction possesses the legal authority to carry out the programs for which it is seeking funding, in accordance with applicable HUD regulations.

Consistency with plan -- The housing activities to be undertaken with CDBG, HOME, ESG, and HOPWA funds are consistent with the strategic plan.

Section 3 -- It will comply with section 3 of the Housing and Urban Development Act of 1988, and

Date 5/26/16

[Signature]
Specific CDBG Certifications

The Entitlement Community certifies that:

Citizen Participation — It is in full compliance and following a detailed citizen participation plan that satisfies the requirements of 24 CFR 91.105.

Community Development Plan — Its consolidated housing and community development plan identifies community development and housing needs and specifies both short-term and long-term community development objectives that provide decent housing, expand economic opportunities primarily for persons of low and moderate income. (See CFR 24 570.2 and CFR 24 part 570)

Following a Plan — It is following a current consolidated plan (or Comprehensive Housing Affordability Strategy) that has been approved by HUD.

Use of Funds — It has complied with the following criteria:

1. Maximum Feasible Priority. With respect to activities expected to be assisted with CDBG funds, it certifies that it has developed its Action Plan so as to give maximum feasible priority to activities which benefit low and moderate income families or aid in the prevention or elimination of slums or blight. The Action Plan may also include activities which the grantee certifies are designed to meet other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community, and other financial resources are not available.

2. Overall Benefit. The aggregate use of CDBG funds, including section 108 guaranteed loans, during program year(s) specified by the grantee consisting of one, two, or three consecutive program years, shall principally benefit persons of low and moderate income in a manner that ensures that at least 70 percent of the amount is expended for activities that benefit such persons during the designated period.

3. Special Assessments. It will not attempt to recover any capital costs of public improvements assisted with CDBG funds, including Section 108 loan or guaranteed funds, by assessing any amount against properties owned and occupied by persons of low and moderate income, including any fee charged or assessment made as a condition of obtaining access to such public improvements.

However, if CDBG funds are used to pay the proportion of a fee or assessment that relates to the capital costs of public improvements (required in part with CDBG funds) financed from other revenue sources, an assessment or charge may be made against the property with respect to the public improvements financed by a source other than CDBG funds.

The jurisdiction will not attempt to recover any capital costs of public improvements assisted with CDBG funds, including Section 108, unless CDBG funds are used to pay the proportion of fee or assessment attributable to the capital costs of public improvements financed from other revenue sources. In this case, an assessment or charge may be made against the property with respect to the public improvements financed by a source other than CDBG funds. Also, in the case of properties owned and occupied by moderate-income (not low-income) families, an assessment or charge may be made against the property for public improvements financed by a source other than CDBG funds if the jurisdiction certifies that it lacks CDBG funds to cover the assessment.

Excessive Force — It has adopted and is enforcing:

1. A policy prohibiting the use of excessive force by law enforcement agencies within its
2. A policy of enforcing applicable State and local laws against physically barring entrance to or exit from a facility or location which is the subject of such non-violent civil rights demonstrations within its jurisdiction;

Compliance With Anti-discrimination laws -- The grant will be conducted and administered in conformity with Title VI of the Civil Rights Act of 1964 (42 USC 2000a), the Fair Housing Act (42 USC 3601-3619), and implementing regulations.

Lead-Based Paint -- Its activities concerning lead-based paint will comply with the requirements of 24 CFR Part 35, subparts A, J, J, K and R;

Compliance with Laws -- It will comply with applicable laws.

OPTIONAL CERTIFICATION
CDBG

Submit the following certification only when one or more of the activities in the action plan are designed to meet other community development needs having a particular urgency as specified in 24 CFR 570.208(c).

The grantee hereby certifies that the Annual Plan includes one or more specifically identified CDBG-assisted activities which are designed to meet other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community and other financial resources are not available to meet such needs.

Specific HOME Certification

The HOME participating jurisdiction certifies that:

Tenant Based Rental Assistance -- If the participating jurisdiction intends to provide tenant-based rental assistance:

The use of HOME funds for tenant-based rental assistance is an essential element of the participating jurisdiction's consolidated plan for expanding the supply, affordability, and availability of decent, safe, sanitary, and affordable housing.

Eligible Activities and Costs -- it is using and will use HOME funds for eligible activities and costs, as described in 24 CFR § 92.205 through 92.209 and that it is not using and will not use HOME funds for prohibited activities, as described in § 92.214.

Appropriate Financial Assistance -- before committing any funds to a project, it will evaluate the project in accordance with the guidelines that it adopts for this purpose and will not invest any more HOME funds in combination with other Federal assistance than is necessary to provide affordable housing;

Title: City Manager
ESG Certifications

The Emergency Solutions Grants Program recipient certifies that:

Major rehabilitation/conversion – If an emergency shelter’s rehabilitation costs exceed 75 percent of the value of the building before rehabilitation, the jurisdiction will maintain the building as a shelter for homeless individuals and families for a minimum of 10 years after the date the building is first occupied by a homeless individual or family after the completed rehabilitation. If the cost to convert a building into an emergency shelter exceeds 75 percent of the value of the building after conversion, the jurisdiction will maintain the building as a shelter for homeless individuals and families for a minimum of 10 years after the date the building is first occupied by a homeless individual or family after the completed conversion. In all other cases where ESG funds are used for renovation, the jurisdiction will maintain the building as a shelter for homeless individuals and families for a minimum of 3 years after the date the building is first occupied by a homeless individual or family after the completed renovation.

Essential Services and Operating Costs – In the case of assistance involving shelter operations or essential services related to street outreach or emergency shelter, the jurisdiction will provide services or shelter to homeless individuals and families for the period during which the ESG assistance is provided, without regard to a particular site or structure, so long the jurisdiction serves the same type of persons (e.g., families with children, unaccompanied youth, disabled individuals, or victims of domestic violence) or persons in the same geographic area.

Renovation – Any renovation carried out with ESG assistance shall be sufficient to ensure that the building involved is safe and sanitary.

Supportive Services – The jurisdiction will assist homeless individuals in obtaining permanent housing, appropriate supportive services (including medical and mental health treatment, victim services, counseling, supervision, and other services essential for achieving independent living) and other Federal State, local, and private assistance available for such individuals.

Matching Funds – The jurisdiction will obtain matching amounts required under 24 CFR 576.201.

Confidentiality – The jurisdiction has established and is implementing procedures to ensure the confidentiality of records pertaining to any individual provided family violence prevention or treatment services under any project assisted under the ESG program, including protection against the release of the address or location of any family violence shelter project, except with the written authorization of the person responsible for the operation of that shelter.

Homeless Persons Involvement – To the maximum extent practicable, the jurisdiction will involve, through employment, volunteer services, or otherwise, homeless individuals and families in constructing, renovating, maintaining, and operating facilities assisted under the ESG program, in providing services assisted under the ESG program, and in providing services for occupants of facilities assisted under the program.

Consolidated Plan – All activities the jurisdiction undertakes with assistance under ESG are consistent with the jurisdiction’s consolidated plan.

Discharge Policy – The jurisdiction will establish and implement, to the maximum extent practicable and where appropriate policies and protocols for the discharge of persons from
publicly funded institutions or systems of care (such as health care facilities, mental health facilities, foster care or other youth facilities, or correction programs and institutions) in order to prevent this discharge from immediately resulting in homelessness for these persons.

APPENDIX TO CERTIFICATIONS

INSTRUCTIONS CONCERNING LOBBYING AND DRUG-FREE WORKPLACE REQUIREMENTS:

A. Lobbying Certification

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

B. Drug-Free Workplace Certification

1. By signing and/or submitting this application or grant agreement, the grantees is providing the certification.

2. The certification is a material representation of fact upon which reliance is placed when the agency awards the grant. If it is later determined that the grantees knowingly provided a false certification, or otherwise violates the requirements of the Drug-Free Workplace Act, HUD, in addition to any other remedies available to the Federal Government, may take action authorized under the Drug-Free Workplace Act.

3. Workplaces under grants, for grantees other than individuals, need not be identified on the certification. If known, they may be identified in the grant application. If the grantees does not identify the workplace at the time of application, or upon award, if there is no application, the grantees must keep the identity of the workplace(s) on file in its office and make the information available for Federal inspection. Failure to identify all known workplaces constitutes a violation of the grantees drug-free workplace requirements.

4. Workplace identifications must include the actual address of buildings (or parts of buildings) or other sites where work under the grant takes place. Categorical descriptions may be used (e.g., all vehicles of a mass transit authority or State highway department while in operation, State employees in each local unemployment office, performers in concert halls or radio stations).

5. If the workplace identified to the agency changes during the performance of the grant, the grantees shall inform the agency of the change(s). If it previously identified the workplace in question (see paragraph three).

6. The grantees may insert in the space provided below the site(s) for the performance of the work done in connection with the specific grant.
Check if there are workplaces on file that are not identified here.

This information with regard to the drug-free workplace is required by 24 CFR part 21.

7. Definitions of terms in the Nonprevention Suspension and Debarment common rule and Drug-Free Workplace common rule apply to this certification. Greater attention is called, in particular, to the following definitions from these rules:

"Controlled substance" means a controlled substance in Schedules I through V of the Controlled Substances Act (21 U.S.C. 812) and as further defined by regulation (21 CFR 1308.11 through 1308.15);

"Conviction" means a finding of guilt (including a plea of nolo contendere) or imposition of sentence, or both, by any judicial body charged with the responsibility to determine violations of the Federal or State criminal drug statutes;

"Criminal drug statute" means a Federal or non-Federal criminal statute involving the manufacture, distribution, dispensing, use, or possession of any controlled substance;

"Employee" means the employee of a grantee directly engaged in the performance of work under a grant, including: (I) All "direct change" employees; (II) all "indirect change" employees whose impact or involvement is insignificant to the performance of the grant; and (III) temporary personnel and consultants who are directly engaged in the performance of work under the grant and who are on the grantee's payroll. This definition does not include workers not on the payroll of the grantee (e.g., volunteers, even if used to meet a matching requirement; consultants or independent contractors not on the grantee's payroll; or employees of subgrantees or subcontractors in covered workplaces).
## Appendix - Alternate/Local Data Sources

<table>
<thead>
<tr>
<th></th>
<th>Data Source Name</th>

<tbody>
<tr>
<td>1</td>
<td>ConPlan Survey for Public Agencies &amp; Residents</td>
</tr>
</tbody>
</table>

**List the name of the organization or individual who originated the data set.**

The Department of Neighborhood Development developed both the Survey for the Public Agencies and for the Norfolk Residents in Survey Monkey.

**Provide a brief summary of the data set.**

Both surveys provided various questions and ratings for specific needs of Norfolk.

**What was the purpose for developing this data set?**

To gather and collect specific needs that range from approximate number of clients serviced in one's agency and services the agency provides to the most and least importation need information from both residents and public agencies.

**Provide the year (and optionally month, or month and day) for when the data was collected.**

The city made available to the public both by advertising in the Virginian Pilot newspaper and providing the information on the City of Norfolk's webpage beginning October 13 through November 30, 2016.

**Briefly describe the methodology for the data collection.**

The Department of Neighborhood Development paid and utilize the Survey Monkey. As the results were provided for by the agencies and Norfolk residents Survey Monkey was able to collect and calculate the data sets for each question asked within the two surveys.

**Describe the total population from which the sample was taken.**

The Public Agency Survey received 20 responses and the Norfolk Resident Survey received 83 responses of which 80 live and work in the City of Norfolk. The Norfolk resident responses were 72 property owners and 6 renters.

**Describe the demographics of the respondents or characteristics of the unit of measure, and the number of respondents or units surveyed.**

Norfolk Residents who responded to the Norfolk Resident Survey comprised of 66 White/Caucasian respondents, 8 Black/ African American respondence, 1 of Hispanic Origin respondence, and 3 residents skipped this question.

Public Agencies who responded to the Public Agency Survey comprised of 78 out of 84 who responded to this question which respresents 65 White/ Caucasian respondents, 7 Black/ African American respondence, 1 of Hispanic Origin respondence, 3 residents chose other demographics not listed, and 2 respondents skipped this question.
