

Reported Flooded Streets and Intersections

Intersections and streets displayed in red have historically flooded in past storms, and therefore may flood in future weather events. This map should be used to identify areas that have the potential of flooding during a storm. To report storm related flooding and other incidents call the Norfolk Cares Assistance Center at 757-664-6510 or MyNorfolk - Citizen Services Portal at <https://www.mynorfolk.org>
