

City of Norfolk CBPA Guidance Document for Filling & Grading within 100-foot CBPA Buffer

This guidance applies to both Resource Protection Areas (RPA) and Intensely Developed Areas (IDA) within the Chesapeake Bay Area overlay district. All trees/shrubs within the 100' CBPA buffer are protected under state law and city code. A permit is required for removal

To determine if your property is in the CBPA

<https://air.norfolk.gov/#/> Go to legend on the top right of the map, select the zoning option and turn on CBPA. Red (IDA) or green (RPA) checker pattern are the CBPA boundaries. Can also be determined by selecting the planning tab center of screen within blue stripe and scrolling to CBPA reference.

Raising Grade (Filling) around protected vegetation:

Raising the grade within the critical root zone (CRZ) of protected trees/shrubs within 100-foot CBPA Buffer requires an onsite inspection and fill permit to be issued prior to any work commencing.

Raising the grade within the CRZ can have negative consequences for tree/shrub health, including crown die-back, root loss and death. Fill soil within CRZ shall not exceed 4 inches in depth. Fill soil shall be uncontaminated with chemicals or other substances toxic to tree roots and have a sandy texture with good porosity that will not impede water infiltration.

Lowering Grade (Cutting) around protected vegetation:

Lowering the grade within the CRZ or protected trees/shrubs can have negative consequences for tree/shrub health including excessive root loss, crown die-back and death. An onsite inspection and tree permit are required to be issued prior to any work commencing.

Contact Jack Erwin, Landscape Coordinator, 757-664-4751 or jack.erwin@norfolk.gov for inspection and permit.
