Mrs. Fiona E. Liston and Mr. Stephen T. McElhaney, actuaries with Cheiron, presented the results of the 2009 Actuarial Valuation. Mrs. Liston stated Cheiron has performed the actuarial valuation of the Employees' Retirement System for the City of Norfolk as of June 30, 2009. The purpose of the valuation is to:

- 1. Measure and disclose, as of the valuation date, the financial condition of the System*
- 2. Indicate trends in the financial progress of the System*
- 3. Determine the contribution rate to be paid by the City for Fiscal Year 2011; and*
- 4. Provide specific information and documentation required by the Government*

Accounting Standards Board (GASB)

Mrs. Liston explained that an actuarial valuation establishes and analyzes System assets and liabilities on a consistent basis and traces the progress of both from one year to the next. It includes measurement of the System's investment performance as well as an analysis of actuarial liability, gains and losses. The Actuarial Accrued Liability at June 30, 2009 was \$1,030 million and the Actuarial Value of Assets at June 30, 2009 was \$886 million, equaling to an Unfunded Actuarial Liability at June 30, 2009 of \$144 million.

As of June 30, 2009, the System's accrued liability was 86% funded based on the actuarial value of assets. The results of this valuation determine the contribution rate for the fiscal year

beginning July 1, 2010. The contribution rate for General employees is determined to be 15.47%. The contribution rate for Firefighters and Police is determined to be 28.15%. The composite rate is equal to 19.98% of annual payroll. Mrs. Liston discussed the anticipated funding situation if there is a prolonged period of low inflation and low earnings. After considerable discussion, the Board asked Mrs. Liston to provide a cost estimate for performing a projection of the City's anticipated funding situation if there is a prolonged period of low inflation and low earnings.
